

MARINE ECOLOGY, Volume V: Ocean Management, Part 1

edited by **O. Kinne**,
Biologische Anstalt Helgoland

This is the final volume in the series, and introduces the readers to man's use of oceans and coastal waters for his own ends. It describes and evaluates all the essential information available on structures and functions of interorganismic coexistence; on organic resources of the seas, on pollution of marine habitats and on the protection of life in oceans and coastal waters.

Contents: Part 1: ZONATIONS AND ORGANISMIC ASSEMBLAGES: Introduction to Part 1 — Zonations and Organismic Assemblages; Zonations; General Features of Organismic Assemblages in the Pelagial and Benthic; Structure and Dynamics of Assemblages in the Pelagial; Structure and Dynamics of Assemblages in the Benthic; Major Pelagic Assemblages; Specific Pelagic Assemblages; Major Benthic Assemblages; Specific Benthic Assemblages; Author Index; Taxonomic Index; Subject Index; Part 2: ECOSYSTEMS AND ORGANIC RESOURCES: Introduction to Part 2 — Ecosystems and Organic Resources; Oceanic Ecosystems; Coastal and Estuarine Ecosystems; Phyto-benthos Resources; Fisheries Resources; Resource Management; Author Index; Taxonomic Index; Subject Index; Part 3: POLLUTION AND PROTECTION OF THE SEAS: Introduction to Part 3 — Pollution and Protection of the Seas; Contamination due to Radioactive Materials; Heavy Metals and Their Compounds; Oil and Oil Dispersants; Pesticides and Technical Organic Chemicals; Domestic Wastes; Thermal Deformations; Protection of Life in the Seas — the Great Challenge; Author Index; Taxonomic Index; Subject Index.

Advances in Marine Biology

Volume 19

edited by J.H.S. Blaxter, Sir Frederick S. Russell
and Sir Maurice Yonge

February 1982, xii + 382pp., £12.20 (UK only) / \$25.50, 0.12.296840.9

Contents

C.C. Emig: The biology of Phoronida. P.W. Glynn: Coral communities and their modification relative to past and prospective Central American seaways. J. Davenport: Environmental simulation experiments upon marine and estuarine animals. R.S. Bailey: The population biology of blue whiting in the North Atlantic.

Handbook of Marine Mammals

Volume 1: The Walrus, Sea Lions, Fur Seals and Sea Otter

Volume 2: Seals

edited by Sam H. Ridgeway and Richard J. Harrison

Volume 1: 1981, xvi + 236pp., £14.60 (UK only) / \$33.50, 0.12.588501.6

Volume 2: 1981, xvi + 350pp., £20.20 (UK only) / \$48.50, 0.12.588502.4

With the aid of distribution maps, identification pointers and spectacular photographs and drawings, as much as is known of each animal about its biology and life history is reviewed, and its identifying characteristics and distribution described. Similarities and differences are stressed and some mention is made of economical and commercial aspects. A full bibliography is included for each chapter.

THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

TERMS OF MEMBERSHIP

	£
Annual Members, receiving the Journal . . . per annum	15.00
Annual Members, without the Journal . . . per annum	3.00
Founders	100.00
Governors	500.00

Annual subscriptions become due on 1 January.

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth,
