Hellenism, Rome, and Early Christianity

EDITED WITH AN INTRODUCTION BY ATHANASIOS MOULAKIS

Reaching from the decline of the Greek Polis to Saint Augustine, this first volume fills the gap left between volumes 3 and 4 of *Order and History*. VOLUME II

The Middle Ages to Aquinas

EDITED WITH AN INTRODUCTION BY PETER VON SIVERS

Voegelin's magisterial account of medieval political thought opens with a survey of the structure of the period and continues with an analysis of the Germanic invasions, the fall of Rome, and the rise of empire and monastic Christianity. 264 pages, \$34.95

VOLUME III

The Later Middle Ages

EDITED WITH AN INTRODUCTION BY DAVID WALSH

Voegelin continues his exploration of one of the most crucial periods in the history of political thought. VOLUME IV

Renaissance and Reformation

EDITED WITH AN INTRODUCTION BY DAVID L. MORSE
AND WILLIAM M. THOMPSON

By closely examining the sources, movements, and persons of the Renaissance and the Reformation, Voegelin reveals the roots of today's political ideologies in this fourth volume. This insightful study lays the groundwork for his critique of the modern period and is essential to an understanding of his later analysis. 320 pages, \$34.95

VOLUME V

Religion and the Rise of Modernity

EDITED WITH AN INTRODUCTION BY JAMES L. WISER

Examining the emergence of modernity within the philosophical and political debates of the sixteenth century, *Religion and the Rise of Modernity* resumes the analysis of the "great confusion" introduced in Volume IV of *History of Political Ideas*. 280 pages, \$34.95

VOLUME VI

Revolution and the New Science

EDITED WITH AN INTRODUCTION BY BARRY COOPER

Volume VI of Voegelin's account of the history of Western political ideas continues from the point reached in the previous volume with the study of the mystic-philosopher Jean Bodin. For the first time, the theoretical problem of the historicity of evocative symbols of political order becomes the focus of Voegelin's analysis. January, 248 pages, \$34.95

DANIEL T. RODGERS

Germany

A New History

HAGEN SCHULZE

Translated by Deborah Lucas Schneider

In one concise volume, Hagen Schulze brilliantly conveys the full sweep of German history through the events that have defined a nation at the center of European culture. This dramatic account of Germany's legacy, often overshadowed and distorted by the nation's recent past, offers a hope-

ful answer to the perennial question of what kind of country it is and will be.

Germany's Second Chance

Trust, Justice, and Democratization

ANNE SA'ADAH

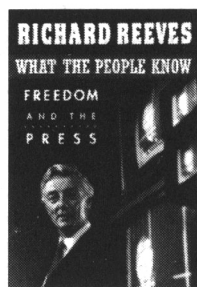

How does a country reconstitute itself as a functioning democracy after a period of dictatorship? Drawing on evidence from intellectual debates, trials, literary works, controversies about the actions of public figures, and partisan competition, Anne Sa'adah analyzes German responses to the problem of reconciliation after 1945 and again after 1989. She depicts the moral and political ambiguities and disappointment inherent to even successful processes of democratization.

What the People Know

Freedom and the Press

RICHARD REEVES

"Journalist Reeves...takes the high moral ground journalistically, arguing that after its spectacular successes reporting segregation, Vietnam, and Watergate, the press has become less of a watchdog and more willing to bare its fangs at politicians (who have become easy targets) while letting

up on corporate conglomerates (who increasingly own newspapers and broadcasting companies and are more likely to bite back with lawsuits). Meanwhile, the press gives us the soft stories that we apparently want. In this short, gracefully argued book, Reeves offers convincing reasons for this decline and a plea for journalism to return to its roots."

Reinventing Russia

Russian Nationalism and the Soviet State, 1953–1991

YITZHAK M. BRUDNY

Brudny argues that the rise of the Russian nationalist movement was a combined result of the reinvention of Russian national identity by a group of intellectuals, and the Communist Party's active support of this reinvention in order to gain greater political legitimacy. He meticulously reconstructs both the development of Russian nationalist thought from Khrushchev to Yeltsin, and the Communist Party response to Russian nationalist ideas.

Asian Values and Human Rights

A Confucian Communitarian Perspective

WM. THEODORE DE BARY

In this provocative book, one of our most learned scholars of China moves beyond the political shouting match surrounding human rights in China by contextualizing this debate from a Confucian and a historical perspective. He highlights the philosophical development of Confucianism as well as the

Chinese historical experience with community organization, constitutionalism, education, and women's rights.

"Wm. Theodore de Bary combines linguistic clarity with historical scholarship. While disputing the politicians' appropriation of 'values,' he emphasizes the importance of community and communitarianism... An informative and provocative book."

The Grabbing Hand

Government Pathologies and Their Cures

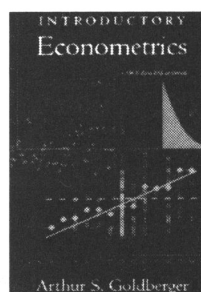

**ANDREI SHLEIFER AND
ROBERT VISHNY**

In many countries, public sector institutions impose heavy burdens on economic life: heavy and arbitrary taxes retard investment, regulations enrich corrupt bureaucrats, state firms consume national wealth, and the most talented people turn to rent-seeking rather than productive activities. As a consequence of such predatory policies—described in this book as the grabbing hand of the state—entrepreneurship lingers and economies stagnate. The authors of this collection of essays describe many of these pathologies and examine their consequences for growth in medieval Europe, developing countries, transition economies, and in the current U.S. economy.

Introductory Econometrics

ARTHUR S. GOLDBERGER

This is a textbook for the standard undergraduate econometrics course. The structure is similar to that of Goldberger's graduate-level textbook, *A Course in Econometrics*, but this new book is richer in empirical material, makes no use of matrix algebra, and is primarily discursive in style. Goldberger provides many theoretical and empirical exercises and, on an accompanying diskette, offers real micro- and macro-economic data sets.

Loose Connections

Joining Together in America's
Fragmented Communities

ROBERT WUTHNOW

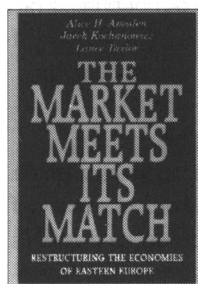

Acknowledging that there has been a significant change in group affiliations—away from traditional civic organizations—Robert Wuthnow shows that many Americans are finding new and innovative ways to help one another through short-term task-oriented networks. These more fluid groups are better suited to dealing with today's needs than the fraternal orders and ladies' auxiliaries of the past. Wuthnow looks at the challenges that must be faced if these innovative forms of civic involvement are to flourish.

"A readable synthesis of international law and political science, *The New Sovereignty* is a valiant and coordinated attempt to answer Kenneth Oye's question: 'If international relations can approximate both a Hobbesian state of nature and Lockean... society, why does cooperation emerge in some cases

and not in others?'... One of the many strengths of this book is an analytical style that is at once legalistic and political. Such an approach is clearly an attempt to bridge the gap between international relations scholars and international lawyers, as well as between theoreticians and policymakers. The authors' understanding is as broad as it is deep."

There is also a chapter on minority women officeholders, a topic that has, to date, been under-examined.

ANNOUNCING AN IMPORTANT NEW SERIES FROM
OXFORD UNIVERSITY PRESS

The Religion and Global Politics Series

General Editor:
John L. Esposito,
Georgetown University

About the General Editor
John L. Esposito is Professor of Religion and International Affairs at Georgetown University, where he is also Director of the Center for Muslim-Christian Understanding: History and International Affairs. A former President of the Middle East Studies Association, he has written and edited several books and articles.

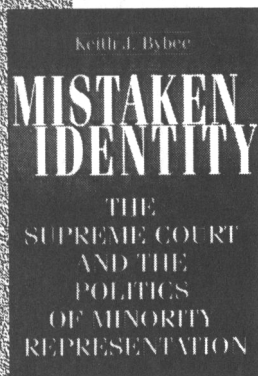

At the dawn of the twenty-first century, the worldwide resurgence of religious beliefs and practices is pervasive. Especially visible is the widespread influence of politicized religion or "religious fundamentalism" upon international affairs. A reversal of what many saw as an inexorable process of both modernization and secularization across the globe now poses major challenges for anyone attempting to understand or respond to the realities of international politics.

Oxford's new **Religion and Global Politics Series** is a cutting-edge effort to address these challenges by publishing scholarship on the ever-changing relationship between religion and world affairs. The series will counter the popular, yet erroneous, equation of development with secularization and westernization while questioning the false assumptions underlying the frequent opposition of tradition and modernity, religion and progress, and faith and reason.

The Religion and Global Politics Series seeks bridges rather than borders; it will fully explore the dynamism, complexity, and variety of religion in the modern world.

Mistaken Identity

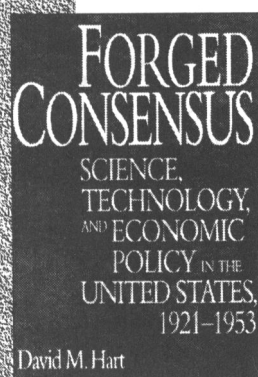

The Supreme Court and the Politics of Minority Representation

Keith J. Bybee

Is it ever legitimate to redraw electoral districts on the basis of race? The U.S. Supreme Court has treated race-conscious redistricting either as a requirement of political fairness or as an exercise in corrosive racial quotas. Cutting through these contradictory positions, Keith Bybee examines the theoretical foundations of the Court's decisions and the ideological controversy those decisions have engendered. He uncovers erroneous assumptions about political identity on both sides of the debate and formulates new terms on which minority representation can be pursued.

"Throughout this book, Keith Bybee presents a fine balance of historical, legal, and political philosophical argument. He knows what he is doing in each genre; this is an impressive display of scholarly mastery."

Forged Consensus

Science, Technology, and Economic Policy in the United States, 1921-1953

David M. Hart

In this thought-provoking book, David Hart challenges the creation myth of post-World War II federal science and technology policy. According to this myth, the postwar policy sprang full-blown from the mind of Vannevar Bush in the form of *Science, the Endless Frontier* (1945). Hart puts Bush's efforts in a larger historical and political context, demonstrating in the process that Bush was but one of many contributors to this complex policy.

Hart places these policy entrepreneurs in the broad scheme of American political development, and shows that policymakers today are still grappling with the legacies of the forged consensus.

Does Conquest Pay?

The Exploitation of Occupied Industrial Societies

Peter Liberman

Can foreign invaders successfully exploit industrial economies? The resurgence of nationalism has led many policymakers and scholars to doubt that conquest still pays. Peter Liberman demonstrates that expansion can, in fact, provide rewards to aggressor nations and suggests that the international system is more war-prone than many optimists claim.

Cultural Realism

Strategic Culture and Grand Strategy in Chinese History

Alastair Iain Johnston

Cultural Realism is an in-depth study of premodern Chinese strategic thought that has important implications for contemporary international relations theory. Its findings challenge dominant interpretations of traditional Chinese strategic thought.

"Johnston is correct that many actual Chinese uses of force look far more like 'realism' than many Sinologists have realized. His stress on the 'realist' thread in the classics is likewise very illuminating."

Constitutional Rights and Powers of the People

Wayne D. Moore

In a book that will radically reorient thinking about the Constitution, Wayne Moore moves away from an exclusive focus on courts and judges and examines a number of questions: Who is included among the "people"? How are the people politically configured? How may the people act? And how do the people relate to government? In answering these questions, Moore offers new insights into central problems of constitutional history, theory, and law.

"The entire package within which these familiar positions take shape is often refreshingly original. . . . There is much in Moore's work that merits attention from constitutional theorists."—Gary Jeffrey Jacobsohn, *The Law and Politics Book Review*

THE SHAPE OF THE RIVER

Long-Term Consequences of Considering Race in College and University Admissions

**William G. Bowen
and Derek Bok**

Californians have voted to abolish it. Almost all leading colleges and professional schools strongly support it. Across the United States, in courts, classrooms, and the media, Americans are divided over the use of race in admitting students to universities. Yet until now the debate has been mainly one of clashing opinions, uninformed by hard evidence.

This book is intended to change that. It brings a wealth of factual evidence to bear on how race-sensitive admissions policies actually work and what effects they have had on students of different races. Its conclusions will mark a watershed in national discussions of affirmative action and race relations in general.

ANALYTIC NARRATIVES

**Robert H. Bates, Avner Greif,
Margaret Levi,
Jean-Laurent Rosenthal,
and Barry R. Weingast**

Students of comparative politics have long faced a vexing dilemma: how can social scientists draw broad, applicable principles of political order from specific historical examples? In *Analytic Narratives*, five senior scholars offer a new and ambitious methodological response to this important question.

By employing rational-choice and game theory, the authors propose a way of extracting empirically testable, general hypotheses from particular cases. The result is both a methodological manifesto and an applied handbook that political scientists will find essential.

POISONING THE MINDS OF THE LOWER ORDERS

Don Herzog

Conservatism was born as an anguished attack on democracy. So argues Don Herzog in this arrestingly detailed exploration of England's responses to the French Revolution. He addresses questions that resonate with meaning today. How were England's humble subjects transformed into proud citizens? And just how successful was the transformation?

At once absorbing and disquieting, *Poisoning the Minds of the Lower Orders* challenges our own commitments to and anxieties about democracy.

Beyond the Welfare State?

The New Political Economy of Welfare

CHRISTOPHER PIERSON

SECOND EDITION

First published in 1991, *Beyond the Welfare State?* has been thoroughly revised and updated for this new edition, which draws on the latest theoretical developments and empirical evidence. It remains the most comprehensive and sophisticated guide to the condition of the welfare state in a time of rapid and sometimes bewildering change.

"When it was first published, *Beyond the Welfare State?* was much the best introductory analysis of the theory and practice of the modern caring state. This meticulously revised and updated version is even better."—Francis G. Castles, Research School of Social Sciences, Australian National University

Security Communities

Emanuel Adler and Michael Barnett, Editors

This book argues that community can exist at the international level, and that states dwelling within an international community have the capacity to develop a pacific disposition. The contributors provide an exhaustive regional and historical survey of places where states have come to expect peace, where they are working to foster such expectations, and where peace is hoped for rather than expected.

Constitutionalism

Philosophical Foundations

Larry Alexander, Editor

A distinguished international team of legal theorists examines the issue of constitutionalism and poses such foundational questions as: Why have a constitution? How do we know what the constitution of a country really is? How should a constitution be interpreted? Why should one generation feel bound by the constitution of an earlier one?

Adam Smith and the Virtues of Enlightenment

Charles L. Griswold, Jr.

This book is the first comprehensive philosophical study of Adam Smith's moral and political thought. Griswold sets Smith's work in the context of the continuing debate about the nature and survival of the Enlightenment, and relates it to current discussions in moral and political philosophy. Smith's appropriation as well as criticism of ancient philosophy, and his carefully balanced defense of a liberal and humane moral and political outlook, are also explored.

Hobbes: On the Citizen

Thomas Hobbes

Richard Tuck and Michael Silverthorne, Editors

De Cive (On the Citizen) is the first full exposition of the political thought of Thomas Hobbes, the greatest English political philosopher of all time. Tuck and Silverthorne have undertaken the first complete translation since 1651, a rendition long thought (in error) to be at least sanctioned by Hobbes himself. This new translation is itself a very significant scholarly event.

Democracy and Decentralisation in South Asia and West Africa

Participation, Accountability and Performance

Richard C. Crook and James Manor

This study examines whether setting up democratic local councils in four developing countries (Ghana, Cote d'Ivoire, Bangladesh and India) actually makes any difference to the popularity, responsiveness and effectiveness of local government and administration. The authors make an important contribution to current debates about "good governance" and whether decentralization can provide better services for the mass of the population—the poor and the disadvantaged in rural areas.

Votes without Leverage

Women in American Electoral Politics, 1920-1970

Anna L. Harvey

Using recent theoretical developments in the political economy of institutions and electoral behavior, this book attempts to solve an enduring puzzle in women's electoral politics, namely why the increasing importance of women's votes in the 1920s did not imply increasing success for the lobbying efforts of women's organizations. The book argues that women's exclusion from the suffrage created terms that led to distinctive patterns of post-suffrage female electoral politics. These electoral dynamics in turn are responsible for the decline in the political influence of women's organizations by the mid-1920s.

An Essay on the Modern State

Christopher W. Morris

This important book is the first serious philosophical examination of the modern state. It inquires into the justification of this particular form of political society. It asks whether all states are "nation-states," what are the alternative ways of organizing society, and which conditions make a state legitimate. The author concludes that, while states can be legitimate, they typically fail to have the powers (e.g. sovereignty) that they claim.

Tokugawa Political Writings

Tetsuo Najita, Editor

The modern political consciousness of Japan cannot be understood without reference to the history of the Tokugawa period, the era between 1600 and 1868 that preceded Japan's modern transformation. In this volume Najita introduces the ideas of the leading political thinker of the period, Ogyu Sorai (1666-1728), providing an important insight into the history and politics of contemporary Japan. Sorai's texts are accompanied by a chronology of his life, a glossary, a guide to persons mentioned in the text, and a guide to further reading.

Recreating Europe

The European Union's Policy towards Central and Eastern Europe

Alan Mayhew

The enlargement of the European Union to include central and eastern Europe is the greatest challenge Europe will face in the next decade. In this book a former leading European Commission official considers both the current relationship between EU and central Europe, and the main problems to be faced on the road to enlargement, including reform of agricultural policy, regional policy, the budget and migration. The book analyzes the costs and benefits of enlargement and concludes that it is not only necessary, but will bring major gains to the whole continent.

Problem Representation in Foreign Policy Decision Making

Donald A. Sylvan and James F. Voss, Editors

Previous studies of foreign policy decision making have largely focused on the choice among specified options rather than the prior question of how the options were specified in the first place. Such "problem representation" is the focus of this volume. How do the game theorists' options and utilities come about? The editors contend the representation of the problem to which the options are a response, the determinants of that representation, and its ramifications must all be analyzed.

Social Welfare and Individual Responsibility

David Schmidt and Robert E. Goodin

The issue of social welfare and individual responsibility has become a topic of international public debate in recent years as politicians around the world now question the legitimacy of state-funded welfare programs. Schmidt and Goodin debate the ethical merits of individual versus collective responsibility for welfare. Schmidt argues that social welfare policy should prepare people for responsible adulthood rather than try to make that unnecessary. Goodin argues against the individualization of welfare policy and expounds the virtues of collective responsibility.

Competitive Governments

An Economic Theory of Politics and Public Finance

Albert Breton

Competitive Governments systematically explores the hypothesis that governments are internally competitive, that they are competitive in their relations with each other and in their relations with other institutions in society that, like them, supply consuming households with goods and services. Breton contends that competition not only serves to bring the political system to an equilibrium, but it also leads to a revelation of the households' true demand functions for publicly provided goods and services and to the molding of a link between the quantities and the qualities demanded and supplied and the tax prices paid for these goods and services.

Urban-Rural Struggles in India

Ashutosh Varshney

What happens to the rural folk—to their power and economic well-being—when development takes place in a democratic framework? Focusing on India where, unlike most of the developing world, a democratic system has flourished for four decades, this book investigates how the rural sector uses its numbers in a democracy to further its economic and political interests. The book also argues that identities constitute a powerful constraint on the pursuit of economic interests.

The Latest Comprehensive Reference to Political Science Graduate Programs and Faculty

The new edition of **Graduate Faculty and Programs in Political Science 1998-2000**, the APSA's valuable resource for students, faculty and college counselors, is available in Spring 1998.

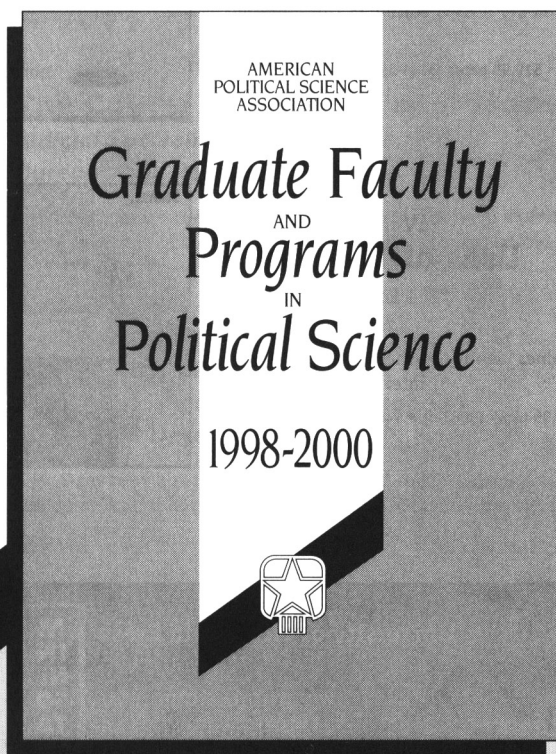

Over 400 programs are described in the directory. Graduate Programs in Britain are included for the first time along with the comprehensive listing of programs in the United States and Canada.

The entries for Ph.D. and Masters programs in political science and the associated fields of public administration, public policy and international affairs include information about the type of degree(s) awarded, tuition charges, financial aid and admission and degree requirements. Faculty for the program are listed with their major fields of specialization, degrees, telephone numbers and e-mail addresses.

The directory also has an appendix with data on the number of students in each program, the ratio of student applications to admissions and the numbers of degrees awarded along with affirmative action information. Use of the directory is facilitated by an alphabetical index of faculty and a geographical index of institutions.
