

## **In Memoriam**

**Ronald S. Wilson**  
1933 – 1986

Dr. Ronald S. Wilson, Director of the Louisville Twin Study, a Founding Fellow, past Vice President and current Chairman of the Membership Committee of the International Society for Twin Studies, suddenly died from a heart attack on 16 November 1986.

Dr. Wilson had greatly contributed to ISTS since the very beginning and his outstanding scientific production in twin research, behavior genetics and developmental biology, was very well known worldwide.

An in Memoriam will appear in the proceedings of the Amsterdam congress, preceding the section on developmental studies. Letters are invited (few lines to one page) from anyone wishing to express individual feelings or comments over Ronald Wilson's life and activity, for publication with the In Memoriam.

Responsibility for the office of Chairman of the ISTS Membership Committee has been undertaken by Dr. Adam P. Matheny, Dr. Wilson's closest associate for many years and also a Founding Fellow of the Society.
