Risk factors for mild behavioral impairment in non-demented geriatrics: a population-based survey in Taiwan – RETRACTION

Yee-Lam E. Chan, Chih-Ming Cheng, Mao-Hsuan Huang, Huey-Jane Lee, Li-Yu Tang, and Chia-Fen Tsai

DOI: <https://doi.org/10.1017/S1041610221000491>, Published by Cambridge University Press, 10 May 2021

International Psychogeriatrics wishes to inform its readers that it has retracted the following article: Chan, Y.-L., Cheng, C.-M., Huang, M.-H., Lee, H.-J., Tang, L.-Y., and Tsai, C.-F. (2021). Risk factors for mild behavioral impairment in non-demented geriatrics: a population-based survey in Taiwan. *International Psychogeriatrics*, doi: [10.1017/S1041610221000491](https://doi.org/10.1017/S1041610221000491)

The journal was informed by the authors of the article that errors were made during their own (i.e. the authors') data compilation that skewed the duration of symptoms and the number of subjects with mild behavioral impairment, and therefore significantly altered the results. This decision is also based on the guidelines issued by the Academic Committee of Taiwan Alzheimer's Disease Association (TADA), which provided the initial data to the authors, and the Committee on Publication Ethics (COPE). The authors would like to apologize for any inconvenience caused.

The article PDF has been watermarked and the abstract and HTML version have been amended to state that the article has been retracted.
