

BELL

PRACTICAL MATHEMATICS

by CLEMENT V. DURELL, M.A.

200 pp. *Limp cloth. With answers. 3s. 3d.*

This inexpensive volume presents in concise form those processes and principles of elementary mathematics which are an essential part of the equipment of all technical students. It is distinguished by all the characteristics which have given Mr. Durell's mathematical text-books so high a reputation.

"A single volume containing the essential arithmetic, algebra, geometry, trigonometry and mechanics, dealt with as tersely as possible and with a practical bias the treatment is lucid and the subject-matter well presented. The ten chapters amply provide the basic mathematical equipment needed by the students for whose use the book is especially intended."

NATURE

AIR NAVIGATION PLOTTING

by MANSEL WILLIAMS, M.A., B.Sc. *2s. 6d. net.*

A thoroughly practical handbook, written by an officer who has been instructing pilots and observers at training units since 1939. Text, diagrams, model solutions, exercises and hints are carefully designed to enable the cadet to master the fundamental principles of air navigation. The air-pilot and other more practical techniques are developed from the triangle of velocities. The book contains over 100 questions for solution on plain paper or plotting charts. The book is very suitable for A.T.C. cadets in secondary schools.

Fuller details of either of the above on request.

BELL

SCHOOL CERTIFICATE ALGEBRA

by CLEMENT V. DURELL, M.A.

Eighth Edition. Complete 5s. 6d. Also in two parts.

“Any pupil of ordinary intelligence will find here all the help that he needs. and the frequent beautifully worked-out examples will make it very easy for him to avoid the usual pitfalls. One cannot too strongly commend this book as eminently suitable in every way for the purpose intended.”—

MATHEMATICAL GAZETTE

GEOMETRY FOR SCHOOLS

by A. H. G. PALMER, M.A., and H. E. PARR, M.A.

Fourth Edition. Price 5s. Also in two parts, 3s. each.

“There are several good points about this book. A great feature is made of easy riders, success in solving them will greatly encourage pupils. The bookwork is clearly set out, and is reduced to a minimum without neglect of essentials. The examples are classified so that rapid selection can be made. An excellent course for the School Certificate.”—THE A.M.A.

ELEMENTARY ANALYSIS

by A. DAKIN, M.A., B.Sc., and R. I. PORTER, M.A.

Third Edition. 366 pages. 7s.

“Teachers on the look-out for a good book covering the syllabuses of the Additional Maths. for the School Certificate and of the Subsidiary Pure Maths. for the Higher School Certificate will do well to inspect this volume. Very lucid and well arranged, and the numerous examples provide excellent practice for both average and more advanced pupils.”—THE A.M.A.
