# POLISH POSTWAR ECONOMY

By **THAD PAUL ALTON**

A comprehensive analysis of the objectives, procedures, and performance of Poland's Soviet-type socialization and planning. A "people's democracy" on the Soviet model since the dissolution of all "underground" opposition in 1947, Poland is an excellent key to the current political and economic problems in Eastern Europe. This study covers developments through 1953 and economic plans through 1955. It is an excellent source of data. \$5.75

## JOHN ŽIŽKA AND THE HUSSITE REVOLUTION

by Frederick Heymann

This is at once a moving account of the Hussite revolution from its very beginnings and a biography of one of its most brilliant military leaders who was largely responsible for the success of this first heresy in history which the Church of Rome could not defeat. The author records Žizka's organization of Bohemia's peasants and townsmen into field armies, the development of the movable wagon fortress, the siege of Prague and the battle of Vitkov, the rout of King Sigismund, and many other events, and shows the far-reaching effects of the revolution. *544 pages. Maps & illustrations. \$9*
