Review Papers for the

Advances in Applied Probability

The Editorial Board would like to encourage the submission to the *Advances* of Review Papers summarising and coordinating recent results in any of the fields of Applied Probability. The papers should be approximately 40–50 printed pages in length. On acceptance of a Review Paper for publication in the *Advances*, the author will receive £stg. 100 (U.S. $240).

In addition to these Review Papers, *Advances* is also designed to be a medium of publication for (1) long research papers in Applied Probabability, which may include expository material, (2) expository papers on branches of mathematics of interest to probabilists, (3) papers outlining areas in the biological, physical, social and technological sciences in which probability models can be usefully developed, and finally, (4) papers in Applied Probability presented at conferences which do not publish their proceedings.

In short, the main function of *Advances* is to define areas of recent progress and potential development in Applied Probability. As with the *Journal of Applied Probability*, *Advances* undertakes to publish papers accepted by the Editors within 15 months of their submission.

The Editorial Board consists of E. Sparre Andersen, D. Blackwell, B. Gnedenko, J. Hájek, E. J. Hannan, D. G. Kendall, J. F. C. Kingman, K. Krickeberg, P. A. P. Moran, J. Neveu, K. R. Parthasarathy, R. Pyke, C. A. B. Smith and L. Takács. The Editor-in-Chief is J. Gani, and the Editorial Office of the *Advances* is in the Department of Probability and Statistics, The University, Sheffield, S3 7RH, England.

The third number of *Advances* contains the following papers:

Harry Kesten	Quadratic transformations: a model for population growth. I.
A. W. Davis	Some generalizations of Bailey's birth death and migration process
Donald L. Iglehart and Ward Whitt	Multiple channel queues in heavy traffic
Marcel F. Neuts	Two servers in series, studied in terms of a Markov renewal branching process

Subscription rates (post free) per volume are:

For libraries and institutions:	U.S.$13.00	£stg.5.5.0.	$A.11.00
For individuals belonging to a recognised scientific society:	U.S.$8.00	£stg.3.6.0.	$A.7.20

Cheques made out on U.S., U.K. and Australian banks will be acceptable; they should be made payable to *Applied Probability*, and sent to:

Editorial Assistant, *Advances in Applied Probability*,
Department of Probability and Statistics,
The University, Sheffield, S3 7RH, England.

Mathematical Spectrum

A Magazine of Contemporary Mathematics

This magazine addresses itself primarily to young mathematicians in schools, colleges of education, and universities. Its object is to discuss the entire range of modern mathematical disciplines (pure mathematics, applied mathematics, statistics, operational research, computing science, biomathematics) in an informative but informal manner and to relate discoveries in mathematics to progress in the natural sciences, technology, social studies, and business management.

The Editors believe that the process of learning is a dialogue, and consequently they wish to promote active participation by readers. Correspondence on any subject relating to mathematics and mathematical education is welcomed. There is also a problem section, and readers are encouraged to submit their solutions, the best of which are published.

For a descriptive leaflet, rates of subscription, and order form, application should be made to
The Oxford University Press, Walton Street, Oxford.

Mathematical Spectrum is published by Oxford University Press on behalf of the Applied Probability Trust.

Subscription rates

Subscriptions (post free) for the 1970 volume of the *Journal* are:

U.S. $17, £stg. 7.0.0, $A.15.00, for libraries and institutions;

U.S.$8, £stg. 3.6.0 $A.7.20, for individuals belonging to a recognised scientific society.
Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

All enquiries about the *Journal*, as well as other subscriptions and orders for back numbers should be sent to the Editorial Assistant, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield, S3 7RH, England. The price of back numbers is $19.50, £stg. 8.0.0. $A. 17.00 per volume. Cheques, money orders, etc. should be made out to *Applied Probability;* cheques on U.S., U.K. and Australian banks will be acceptable.

Notes for Contributors

It is a condition of publication in the *Journal of Applied Probability* that papers shall not previously have appeared elsewhere, and will not be reprinted without the written permission of the Trust. The copyright of all published papers shall be vested in the Trust. It is the general policy of the *Journal* not to accept for publication papers which cannot appear in print within 15 months of their date of submission. Authors will receive 100 reprints of their papers free, and joint authors a proportional share of this number. Additional reprints will be provided at cost.

Manuscripts should be written in English or French; manuscripts in other languages may be accepted by the Editors, but will appear (subject to the author's agreement) in English or French translation in the *Journal*.

It will be of help to the Editors if the following conventions are adopted:

a) The manuscript should be typewritten, using double spacing. on one side of the paper only. The original and a copy may be submitted to any Editor; a duplicate of the covering letter should, however, be sent to the Editor-in-Chief.

b) References should be indicated in the text by the name of the author(s) and the date, thus: Feller (1961), and the full references listed at the end of the article in alphabetical order. Journal references should include the title of the article cited, the title of the journal (abbreviated in the style of the *International Journal of Abstracts: Statistical Theory and Method*) the volume, and inclusive page numbers. Book references should give the full title, the publisher. and the place of publication. For example:

Feller, W. (1961) A simple proof of renewal theorems. *Comm. Pure Appl. Math.* **14**, 285–293,

Robinson, E. A. (1959) *An Introduction to Infinitely Many Variates*. Griffin, London.

c) Type faces should be carefully distinguished on the manuscript using the following standard methods of marking:

Italic capitals (T, I, R) and lower case letters (t, i, r) should be underlined once, e.g., T, I, R, t, i, r.

Bold-face capitals (**T**, **I**, **R**) and lower case letters (**t**, **i**, **r**) should have a curly underline, e.g., T, I, R, t, i, r.

Greek characters (α, β, θ) and script letters ($\mathcal{J}$, $\mathcal{I}$, $\mathcal{R}$) should be carefully drawn and identified when first used by a marginal note of the form 'α—lower case Greek alpha' or '$\mathcal{R}$—script R'.

d) Indices and subscripts should be clearly distinguished, using the marking $\vee^4$, $\wedge_4$ where necessary.

Authors will receive only first proofs for correction; charges will be made for excessive alteration to these.
