The Clinical Delineation of Birth Defects

Volume VI NERVOUS SYSTEM

Volume VII MUSCLE

Volume VIII EYE

Volume IX EAR

The Second Conference on the Clinical Delineation of Birth Defects, sponsored by the Johns Hopkins Medical Institutions and the National Foundation—March of Dimes, was held at The Johns Hopkins Hospital, Baltimore, Maryland, in May 1969. The findings of the conference are presented in four new volumes.

This volume contains 28 papers on defects in the nervous system, starting with the clinical approach to disorders and followed by genetic and viral aspects. Also included are 25 case reports.

1971/255 pp./259 figs./\$17.00

Papers include: Some Rare Congenital and Metabolic Myopathies, Classification of Neuromuscular Disorders, Hereditary Ptosis. 18 case reports complete the volume.

1971/131 pp./180 figs./\$12.50

Some of the papers in this volume are: An Introduction to Corneal Dystrophies, Congenital Anomalies of the Retina, Norrie's Disease and Genetic Approach to the Nosology of Retinal Disorders. 24 case reports are included.

1971/213 pp./325 figs./\$17.00

Featuring 12 papers covering subjects such as: Notes on Hearing Tests, Genetic Approaches to the Nosology of Deafness, Genetic Heterogeneity in the Waardenburg Syndrome. This volume is complete with 13 case reports.

1971/142 pp./illustrated/\$15.00

THE NATIONAL FOUNDATION

March of Dimes

The Clinical Delineation of Birth Defects

Volume X THE ENDOCRINE SYSTEM

Volume XI OROFACIAL STRUCTURES

Volume XII SKIN, HAIR AND NAILS

The Third Conference on the Clinical Delineation of Birth Defects, sponsored by the Johns Hopkins Medical Institutions and the National Foundation—March of Dimes, was held at The Johns Hopkins Hospital, Baltimore, Maryland in June 1970. The three volumes currently ready for release continue the excellent work of the series.

Dedicated "to the memory of two giants of endocrinology" by Victor A. McKusick and Frederic C. Bartter, this volume includes papers on pituitary dwarfism, thyroxine-binding globulin, familial tumor endocrinopathies, pseudohermaphroditism, and many other studies of endocrine disorders.

1971/approx. 330 pp./160 figs./\$20.75

Complete with 33 case reports, this volume covers in great detail the fields of facial clefting, frontonasal dysplasia, dental defects, Alossia-Adactylia and the other syndromes of orofacial birth defects.

1971/approx. 450 pp./536 figs./ \$23.75

36 papers and 65 case reports on skin, hair and nails complete the Third Conference. Subjects discussed include Albinism, Congenital Hair Defects, Lipoid Proteinosis and Dermatologic Disorders in Institutionalized Mental Defectives.

1971/approx. 500 pp./536 figs./in press

Genetical Research

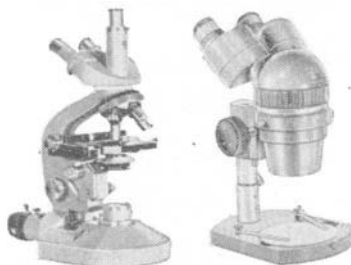

is one of 49 learned journals published by Cambridge University Press.

A descriptive catalogue of Cambridge journals, including details of back volumes, is available from the London and New York offices of the Press.

Cambridge journals may be ordered from a bookseller or direct from the publishers.

OLYMPUS MICROSCOPES

A comprehensive range of high performance microscopes.

- Research, Stereoscopic and Inverted types with accessories for photomicrography and photomacrography, phase contrast, fluorescence etc.
- High grade optics: Achromats, planachromats, fluorite, apochromats and both wide field and super-wide field systems.
- Widely used in research establishments, Universities, Colleges etc., throughout the United Kingdom.

Research microscope outfits from £266 complete,
Stereoscopic zoom £159.50

Please ask for details, stating type of instrument in which you are interested.
