

# Agricultural History Review

(The journal of the British Agricultural History Society)

*Published since 1953*

The BAHS has a worldwide membership of around 1,000 consisting of people from all walks of life. It holds two conferences a year in April and December, and exists to further the study of rural history from the earliest times to the present day. Each issue of the Review contains five or six major articles and extensive book reviews.

The Society aims to encourage innovation within the subject and this is reflected in the contents of its journal, which appears in March and September. Recent issues have included:

**Pre-Conquest Woodland: Its Distribution and Usage**

*by Della Hooke*

**Agricultural Science in Eighteenth-century Scotland**

*by Charles Withers*

**Harvest fluctuations in Pre-Famine Ireland**

*by Peter Solar*

**The Agrarian History of Spain 1900-1960**

*by Joseph Harrison*

**The Agrarian History of England and Wales**

*by Bruce Campbell*

Future issues will include:

**The Woodland Economy of Kent**

*by K. Witney*

**The Manorial Agriculture of Medieval Britain**

*by J. Pretty*

**Production and Trade in Garden Seeds**

*by Malcolm Thick*

**The Foldcourse System in West Sussex**

*by Mark Bailey*

**The Diary of James Warne 1758**

*by Gordon Mingay*

The Society also publishes occasional supplements of around 15,000 words on topics of special interest.

Membership of the Society is open to all for an annual subscription of £10. Full details can be obtained from the Treasurer:

# AgTechnology '90

"Agriculture...The Decade Ahead"

An international conference and seminar on new technology and new issues that will impact agriculture in the next decade of revolutionary change.

**Sept. 17-20, 1990**  
**St. Louis**

**It's the Annual Convention of the Agbiotechnology Industry!**

The past few months have seen near-revolutionary change in agbiotechnology: corn transformation, enhanced protein corn hybrids, crops genetic male sterility, new "transwitch" breakthroughs, enhanced biopesticides, new seed treatment technology, plus a fast-changing financial and commercial environment. *The AgBiotech Revolution May Be Beginning!*

**AgTechnology '90 explores all these exciting new issues...plus much more.**

Just a few of our speakers and program topics include: Dr. Jerry Caulder, CEO of Mycogen; Dr. Reudi Sandmeier, Research Director of Sandoz; Dr. Alvin Young, Director of the USDA's Office of Biotechnology; Dr. Alex Kahler on RFLP's and genetic fingerprinting; Dr. Robert Beachy, Professor of Biology at Washington University; Dr. Wally Beversdorf, Chairman, Crop Sciences Department, University of Guelph; plus many more (nearly 25 in all!)

Plus, the following special sessions: An actual demonstration of the amazing Du Pont Biolistic Gene Gun, panel of government experts on new FDA and EPA regulations, panel of attorneys on "what's new" in ag patent law, plus tours of Monsanto's biotech lab and field trials!

**New Product and Services Trade Show and Poster Session!** The latest innovations and services for agbiotechnology will be on display from the world's top companies!

**Don't miss it!**

**For more information write: AgBiotechnology News, P.O. Box 7, Cedar Falls IA 50613. Ph 319-277-3599. FAX 319-277-3783.**

# GRASS AND FORAGE SCIENCE

*The Journal of the British Grassland Society*

Edited by Dr A. Younger Department of Agriculture, The University,  
Newcastle upon Tyne NE1 7RU, UK

*Grass and Forage Science* publishes the results of research and development in all aspects of grass forage production, management and utilization, occasional reviews of the state of knowledge on relevant topics, and book reviews. Although the main emphasis is on temperate regions, papers relating to other regions are published if they report results which have a wider application than to the region in which the experiments

were carried out. *Grass and Forage Science* is now the foremost organ for the publication of scientific results relating to cultivated temperate grasslands.

## Subscription Information

*Grass and Forage Science* is published quarterly.

Subscription rates for 1990 are £69.50 (UK), £81.50 (overseas) and US\$135.50 (USA & Canada) post free.

NEW PRODUCT

# Porometer type AP4

# AT

The AP4 Porometer is a breakthrough in terms of performance, user convenience and cost.

- **Direct readout of resistance or conductance**
- **Simple field calibration**
- **Stores up to 2000 readings, with notes facility**

Readings can be made with a single key press. The results are displayed in the chosen units, and may be stored along with the time, temperature, RH and solar irradiance. Up to 30 characters of text can be entered with each reading.

Like earlier versions of Delta-T porometers, the AP4 is economical and simple to use, but makes use of microprocessor control to provide sophisticated new features and much more convenient operation.
