Point at infinity Niel Shell	321
Binomial permutations of finite fields Wun-Seng Chou	325
A topological characterisation of finite dimensionality of C^* -algebras Wai-Shing Tang	329
Characterisation of functional properties by nets Carlos C. Borges	335
Stability of linear neutral delay-differential systems Li-Ming Li	339
Complex vector bundles on real algebraic varieties of small dimension Wojciech Kucharz	345
A class of functional equations which have entire solutions Peter L. Walker	351
Fractional integration and the hyperbolic derivative E.G. Kwon	357
A discrete calculus of variations algorithm H.H. Tan and R.B. Potts	365
Contracted primes of the complete ring of quotients Frederick W. Call	373
Reflections and symmetries in compact symmetric spaces Bang-Yen Chen and Lieven Vanhecke	377
Characterisation of a multivariate stochastic ordering Colm Art O'Conneide	387
A note on compact sets in spaces of subsets Phil Diamond and Peter Kloeden	393
On two theorems concerning sets with convex sections E. Tarafdar	397
On the monotone simultaneous approximation on $[0,1]$ Salem M.A. Sahab	401
On the p -norm of the truncated Hilbert transform W. McLean and D. Elliott	413
A topological approach to a conjecture of Rhodes J.E. Pip	421
Farthest points in w^* -compact sets R. Deville and V.E. Zizler	433
Upper middle annihilators Patrick N. Stewart	441
Meromorphic Lipschitz functions Shinji Yamashita	451
Strongly right FBN rings Heakyung Lee	457
Une caractérisation du fibré cotangent Tong Van Duc	465
The Dirichlet problem for degenerate elliptic 2-dimensional monge-ampère equation: Corrigendum Kazuo Amano	479
ABSTRACTS OF AUSTRALASIAN Ph.D. THESES On t -spreads of $PG((s+1)(t+1)-1, q)$ Christine M. O'Keefe	473
Optimal solutions of restricted subadditive inequalities Roger James Wallace	475

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,

St. Lucia, Queensland, 4067, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned. Note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification. (1985 Revision).

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
