

CONTENTS

Volume 49 Number 1

- 1 CHRISTOPH HOFER-TEMMELE. Shearer's point process, the hard-sphere model, and a continuum Lovász local lemma
- 24 ALEXANDROS BESKOS, DAN CRISAN, AJAY JASRA, KENGO KAMATANI AND YAN ZHOU. A stable particle filter for a class of high-dimensional state-space models
- 49 ANSHUI LI AND TOBIAS MÜLLER. On the treewidth of random geometric graphs and percolated grids
- 61 A. L. STOLYAR. Large-scale heterogeneous service systems with general packing constraints
- 84 PIERRE HODARA AND EVA LÖCHERBACH. Hawkes processes with variable length memory and an infinite number of components
- 108 HARRY CRANE. Generalized Markov branching trees
- 134 I. PAPASTATHOPOULOS, K. STROKORB, J. A. TAWN AND A. BUTLER. Extreme events of Markov chains
- 162 CHANG-SONG DENG, RENÉ L. SCHILLING AND YAN-HONG SONG. Subgeometric rates of convergence for Markov processes under subordination
- 182 MASAKIYO MIYAZAWA. A unified approach for large queue asymptotics in a heterogeneous multiserver queue
- 221 FLORIN AVRAM AND ANDREEA MINCA. On the central management of risk networks
- 238 SÖREN CHRISTENSEN AND PAAVO SALMINEN. Impulse control and expected suprema
- 258 P. ALONSO-RUIZ AND E. SPODAREV. Estimation of entropy for Poisson marked point processes
- 279 REBEKKA BRINK-SPALINK AND CHARLINE SMADI. Genealogies of two linked neutral loci after a selective sweep in a large population of stochastically varying size

- 327 ARKA GHOSH, STEVEN NOREN AND ALEXANDER ROITERSHTEIN. On the range of the transient frog model on \mathbb{Z}
- 344 ELMA NASSAR AND ETIENNE PARDOUX. On the large-time behaviour of the solution of a stochastic differential equation driven by a Poisson point process
- 368 EROL PEKÖZ, ADRIAN RÖLLIN AND NATHAN ROSS. Joint degree distributions of preferential attachment random graphs
- 388 PHILIP A. ERNST AND ILIE GRIGORESCU. Asymptotics for the time of ruin in the war of attrition
- 411 ROSS A. MALLER AND PETER C. SCHMIDLI. Small-time almost-sure behaviour of extremal processes
- 430 NATALIE ATTARD. Nash equilibrium in nonzero-sum games of optimal stopping for Brownian motion
- 446 DAN PIRJOL AND LINGJIONG ZHU. Asymptotics for the discrete-time average of the geometric Brownian motion and Asian options
- 481 YUNPENG SUN, RAFAEL MENDOZA-ARRIAGA AND VADIM LINETSKY. Marshall–Olkin distributions, subordinators, efficient simulation, and applications to credit risk
- 515 HANSJÖRG ALBRECHER, PABLO AZCUE AND NORA MULER. Optimal dividend strategies for two collaborating insurance companies
- 549 BERTRAND CLOEZ. Limit theorems for some branching measure-valued processes
- 581 SHUI FENG, FUQING GAO AND YOUZHOU ZHOU. Limit theorems associated with the Pitman–Yor process
- 603 RAMTIN PEDARSANI, JEAN WALRAND AND YUAN ZHONG. Robust scheduling for flexible processing networks
- 629 CHRISTINE FRICKER, FABRICE GUILLEMIN, PHILIPPE ROBERT AND GUILHERME THOMPSON. Allocation schemes of resources with downgrading

- 653 CHRISTOPHETTE BLANCHET-SCALLIET, CAROLINE HILLAIRET AND YING JIAO. Successive enlargement of filtrations and application to insider information
- 686 LENNART GULIKERS, MARC LELARGE AND LAURENT MASSOULIÉ. A spectral method for community detection in moderately sparse degree-corrected stochastic block models
- 722 TIMO HIRSCHER. Overly determined agents prevent consensus in a generalized Deffuant model on \mathbb{Z} with dispersed opinions
- 745 HERBERT EDELSBRUNNER, ANTON NIKITENKO AND MATTHIAS REITZNER. Expected sizes of Poisson–Delaunay mosaics and their discrete Morse functions
- 768 NICOLAS GAST AND BRUNO GAUJAL. Computing absorbing times via fluid approximations
- 791 JORIS BIERKENS AND ANDREW DUNCAN. Limit theorems for the zig-zag process
- 826 PRASENJIT MONDAL. On zero-sum two-person undiscounted semi-Markov games with a multichain structure
- 850 MIKLÓS BÓNA AND BORIS PITTEL. On a random search tree: asymptotic enumeration of vertices by distance from leaves
- 877 ERICH BAUR AND JEAN BERTOIN. Weak limits for the largest subpopulations in Yule processes with high mutation probabilities
- 903 RAPHAËL CERF. The quasispecies regime for the simple genetic algorithm with roulette wheel selection
- 927 HAN L. GAN, ADRIAN RÖLLIN AND NATHAN ROSS. Dirichlet approximation of equilibrium distributions in Cannings models with mutation
- 960 A. GRIFFIN, P. A. JENKINS, G. O. ROBERTS AND S. E. F. SPENCER. Simulation from quasi-stationary distributions on reducible state spaces

- 981 PAUL DUPUIS AND DANE JOHNSON. Moderate deviations-based importance sampling for stochastic recursive equations
- 1011 ZIMENG WANG, DAVID J. HODGE AND HUILING LE. Conjugate duality in stochastic controls with delay
- 1037 KRZYSZTOF DEBICKI, ENKELEJD HASHORVA AND PENG LIU. Uniform tail approximation of homogenous functionals of Gaussian fields
- 1067 NICOLÁS GARCÍA TRILLOS, DEJAN SLEPČEV AND JAMES VON BRECHT. Estimating perimeter using graph cuts
- 1091 CHRISTIAN HIRSCH, BENEDIKT JAHNEL, PAUL KEELER AND ROBERT I. A. PATTERSON. Traffic flow densities in large transport networks
- 1116 SÖREN CHRISTENSEN, ALBRECHT IRLE AND ANDREAS LUDWIG. Optimal portfolio selection under vanishing fixed transaction costs
- 1144 PENG JIN, JONAS KREMER AND BARBARA RÜDIGER. Exponential ergodicity of an affine two-factor model based on the α -root process
- 1170 DAN CRISAN AND JOAQUÍN MÍGUEZ. Uniform convergence over time of a nested particle filtering scheme for recursive parameter estimation in state-space Markov models
- 1201 ONUR GÜN AND ATILLA YILMAZ. Fluid limit for the Poisson encounter-mating model
- 1230 RAMESH C. GUPTA AND DAVID M. BRADLEY. Asymptotic failure rates for a general class of frailty models
- 1260 GÜNTER LAST AND SEBASTIAN ZIESCHE. On the Ornstein–Zernike equation for stationary cluster processes and the random connection model
- 1288 EVITA NESTORIDI. A non-local random walk on the hypercube

Subscription rates

Subscription rates for volume **49** (2017) of *Advances in Applied Probability* (AAP) are as follows (post free and online access at <http://cambridge.org/apr>). For libraries and institutions: US\$361.00, £233.00 (online only); US\$397.00, £256.00 (online & print). For individuals, US\$137.00, £88.00 (online & print). The subscription rates for volume **54** (2017) of *Journal of Applied Probability*, the companion publication, are the same; for individual subscribers that order both journals at the same time, the combined price is discounted by 10%. Please send all subscription renewals and enquiries to: subscriptions_newyork@cambridge.org in the Americas and journals@cambridge.org for the Rest of the World.

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as portable document format (PDF) files, not exceeding 1 Mb, to the email address submissions_japaap@sheffield.ac.uk. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/17
