

Editorial: Archive collections

It is a pleasure to announce that, as a consequence of initiatives taken by the Royal Commission on Historical Manuscripts, we shall henceforward be publishing an annual list of new accessions to archives that are likely to be of special value to those with research interests in the history of science. I should like to thank Mr K. A. Morgan, Curatorial Officer of the Royal Commission on Historical Manuscripts, for having supplied the information below.

The following list of major archive collections acquired by British repositories during 1990 has been abstracted from *Accessions to Repositories*, an annual publication compiled by the Royal Commission on Historical Manuscripts and published by HMSO. Some collections may not yet be available for research and any enquiries should be directed to the relevant repositories.

British Library Manuscript Collections, Great Russell Street, London WC1B 3DG
Henry Havelock Ellis (1859–1939), psychologist: correspondence, including papers of Olive Schreiner, Stella Browne, Norman Haine and Francois Lafitte
