

combination for success

In medicine, too, effective combination is often the key to success. A case in point is 'Tuinal', which combines the rapid onset of action of 'Seconal Sodium' with the longer duration of 'Sodium Amytal'. When sedation or hypnosis of rapid onset and medium duration of effect is desired, the combination for success is 'Tuinal'.

'Tuinal' consists of equal parts of 'Seconal Sodium' and 'Sodium Amytal'. It is available as 'Pulvules' of $1\frac{1}{2}$ grs. and 3 grs.

'TUINAL'
