

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge
Silver Street, Cambridge, CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92093, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the Cambridge or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 110, Cambridge CB2 3RL and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 21 and 22 (1979) are £39.50 net per volume (US\$95.00 in the U.S.A. and Canada) for institutions; £19.75 (US \$47.50) per volume for individuals. Single parts cost £15.00 net (US \$37.50 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS OF VOLUME 21

PART 1 FEBRUARY 1979

Production of high energy ions in a tokamak during neutral injection heating. N. PEYRAUD	<i>page 1</i>
Ion beam expansion due to ion cyclotron wave interactions. J. P. HAUCK and G. BENFORD	19
On the stability of self-consistent large-amplitude waves in a cold plasma. Part 2. Longitudinal waves in the absence of a large-scale magnetic field. M. A. LEE and I. LERCHE	27
On the stability of self-consistent large-amplitude waves in a cold plasma. Part 3. Transverse circularly polarized waves in the presence of a large-scale magnetic field. M. A. LEE and I. LERCHE	43
On the nonlinear development of the Langmuir modulational instability. R. BINGHAM and C. N. LASHMORE-DAVIES	51
Two-dimensional magnetohydrodynamic turbulence: cylindrical, non-dissipative model. D. MONTGOMERY and G. VAHALA	71
Plane MHD flows in a hyperbolic magnetic field: implications for the problem of magnetic field line reconnection. S. R. HABBAL and T.-F. TUAN	85
Stimulated backscattering of electromagnetic ordinary waves from extraordinary waves below the upper hybrid frequency. B. MARAGECHI and J. WILLETT	97
Temporal evolution of magnetic reconnection in the vicinity of a magnetic neutral line. T. G. FORBES and T. W. SPEISER	107
Current driven electromagnetic ion cyclotron instability. D. W. FORSLUND, J. M. KINDEL and M. A. STROSCIO	127
On self-consistent waves and their stability in warm plasma. Part 1. Construction of the self-consistent waves. M. A. LEE and I. LERCHE	141
The effects of ionization on the jump conditions for MHD and transverse ionizing shock waves. R. C. CROSS and C. D. MATHERS	151
A technique for calculating finite Larmor radius corrections. C. ROBERTSON	169
Some uniqueness theorems for the ideal MHD equilibrium of a cylindrical tokamak. G. LL. THOMAS	177
Modulational instability of two transverse waves in a cold plasma. K. P. DAS and S. SHI	183

PART 2 APRIL 1979

Acoustic instabilities and plasma heating resulting from energetic ion beam injection. E. H. DA JORNADA, J. D. GAFFEY, JR and M. Z. CAPONI	<i>page</i> 193
Cold plasma dispersion surfaces. M. E. OAKES, R. B. MICHIE, K. H. TSUI and J. E. COPELAND	205
Nonlinear propagation of the extraordinary mode in a hot magnetoplasma. TU KHIET, Y. FURUTANI and Y. H. ICHIKAWA	225
Most probable states in magnetohydrodynamics. D. MONTGOMERY, L. TURNER and G. VAHALA	239
Merging tokamaks. N. OHYABU, C. L. HSIEH and T. H. JENSEN	253
Transverse instability of soliton solutions to nonlinear Schrödinger equations. D. ANDERSON, A. BONDESON and M. LISAK	259
Excitation of an upper hybrid wave by a Gaussian electromagnetic beam in ordinary mode. M. S. SODHA, D. P. TEWARI, B. L. PATHEJA and R. P. SHARMA	267
Low frequency waves in inhomogeneous magnetic fields. A. HRUŠKA	279
Nonlinear theory of the Weibel instability. D. S. LEMONS, D. WINSKE and S. P. GARY	287
Generation of ultra-intense heavy ion beams for inertial confinement fusion. F. WINTERBERG	301
Equation of state for a partially degenerate plasma. J. W. JOHNSTON, J. CUMMING and E. W. LAING	317
Wave-wave interactions in rotating gases. L. STENFLO	333
On Dupree's resonance function. P. ROLLAND	341
Two-dimensional plasma equilibria. J. A. SHERCLIFF	347
A second-order theory for the ion-acoustic heat flux instability. S. P. GARY	361
Comments on the paper 'On energy of non-resonantly growing plasma waves' by A. Hirose. G. SCHMIDT	381
Reply to the comments by G. Schmidt. A. HIROSE	383

PART 3 JUNE 1979

Elements of magnetohydrodynamics with the Hall current. Part 1. Nonlinear phenomena. P. ROSENAU, J. A. TATARONIS and G. CONN	385
Kinetic equation for an electron gas (non-neutral plasma) in strong fields and inhomogeneities. A. H. ØIEN	401

Minimum non-spherical implosion velocity for inertial confinement fusion. F. WINTERBERG	<i>page</i> 421
A phenomenological theory of drift wave type turbulence. A. K. SEN	423
Finite ion Larmor radius modifications to the firehose and mirror instabilities. A. N. HALL	431
Turbulent heating of tokamak plasmas by runaway electron beam-plasma instability. R. JONES	445
Magnetic field-line reconnection by localized enhancement of resistivity. Part 3. Controlling factors. M. UGAI and T. TSUDA	459
Anomalous resistivity of a turbulent plasma in a strong electric field. Y. KIWAMOTO, H. KUWAHARA and H. TANACA	475
The resistive evolution of force-free magnetic fields. Part 1. Slab geometry. J. REID and E. W. LAING	501
A variational principle in relativistic magnetofluid dynamics. I. MERCHES	511
Conductivity tensors of all orders in a collisionless plasma. J. LARSSON	519
Effects of perturbation theory on the spectrum of ideal magnetohydrodynamic and guiding centre plasmas. J. AMBROSIANO and G. VAHALA	537
Padé approximants and nonlinear waves. F. J. ROMEIRAS and J. P. DOUGHERTY	549
INDEX TO VOLUME 21	573

Continued from back cover
