BD Protect™ Infection Prevention

provides critical HAI-related information when time matters most.

24/7 surveillance provides alerts and reports to help you

- make treatment and isolation decisions faster
- respond more quickly to unfolding infection-related events
- identify new MDROs to reduce risk of transmission

On demand reports support your quality improvement goals

- analyze trends, create reports and graphs
- investigate outbreaks
- track process compliance

NHSN-compliant tools electronically

- collect and validate denominator and HAI data
- benchmark and report to NHSN

Helping all people
live healthy lives

Designed by CDC-trained epidemiologists and grounded in over 25 years of infection surveillance software experience, **BD Protect Infection Prevention** has the flexibility to support your unique infection prevention goals.
