Fetal and Maternal Medicine Review

Editor-in-chief

Stephen Robson, Fetal Medicine Unit, Royal Victoria Infirmary, Newcastle upon Tyne, UK

Fetal and Maternal Medicine Review publishes high-quality reviews drawn from all relevant disciplines in this rapidly expanding field. Each issue includes a selection of clinical and research reviews from experts in the field. Rapid publication and a deliberate preference for authors currently active in research ensures this journal has immediate relevance to contemporary clinical practice. Subject areas covered include fetal medicine, maternal medicine, neonatology, obstetric anaesthesia, epidemiology and basic science. It is essential reading for all engaged in the care of pregnant women and neonates, including obstetricians and neonatologists, postgraduates training for specialist careers, specialist nursing and midwifery staff.

CAMBRIDGE
UNIVERSITY PRESS

Instructions for Contributors

Zygote is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.
Email: brian.dale@virgilio.it or to
- Jacques Cohen, North American Editor, *Zygote*, Tycho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA
Email: jc@embryos.net or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.
Email: medaka-s@kdp.biglobe.ne.jp

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract

of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 800 – 1200 dpi. When relevant, photographs should be submitted with proposed reduction or magnification indicated, when relevant, by a scale line on or beside, the illustration. The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour photograph reproduction and printing.

Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.

The Biology of Gametes and Early Embryos

CONTENTS

ORIGINAL ARTICLES

Short-term treatment with 6-DMAP and demecolcine improves developmental competence of electrically or Thi/DTT-activated porcine parthenogenetic embryos

Park, S. J., Koo, O. J., Kwon, D. K., Gomez, M. N. L., Kang, J. T., Atikuzzaman, M., Kim, S. J., Jang, G. & Lee, B. C. 1

Effect of maturation on the expression of aquaporin 3 in mouse oocyte

Jo, J. W., Jee, B. C., Suh, C. S., Kim, S. H., Choi, Y. M., Kim, J. G. & Moon, S. Y. 9

Nek2 and its substrate, centrobilin/Nip2, are required for proper meiotic spindle formation of the mouse oocytes

Sonn, S., Oh, G. T. & Rhee, K. 15

Capacitation status of activated bovine sperm cultured in media containing methyl- β -cyclodextrin affects the acrosome reaction and fertility

Kato, Y., Shoen, S. & Nagao, Y. 21

Multiple histone site epigenetic modifications in nuclear transfer and *in vitro* fertilized bovine embryos

Wu, X., Li, Y., Xue, L., Wang, L., Yue, Y., Li, K., Bou, S., Li, G.-P. & Yu, H. 31

Review: Role of tubal environment in preimplantation embryogenesis: application to co-culture assays

Guérin, P. & Ménéz, Y. 47

Time course of meiotic spindle development in MII oocytes

Kilani, S., Cooke, S. & Chapman, M. 55

Optimization of artificial fertilization in the stinging catfish *Heteropneustes fossilis* (Bloch)

Christopher, J. G., Murugesan, A. G. & Sukumaran, N. 63

Ultraviolet radiation and handling medium osmolarity affect chimaerism success in zebrafish

Francisco-Simão, M., Cardona-Costa, J., Pérez-Camps, M. & García-Ximénez, F. 67

Stability of housekeeping genes and expression of locally produced growth factors and hormone receptors in goat preantral follicles

Frota, I. M. A., Leitão, C. C. F., Costa, J. J. N., Brito, I. R., Hurk, van den Hurk, R. & Silva, J. R. V. 71

Quality of transgenic rabbit embryos with different *EGFP* gene constructs

Chrenek, P., Bauer, M. & Makarevich, A. V. 85

Association of distributions of three types of germinal vesicle stage oocytes with the canine follicle location in the ovary

Wang, L. X., Wang, S., Hou, J., Hu, R. L. & An, X. R. 91
