THE BRITISH JOURNAL OF PSYCHIATRY

January 1986

Vol 148

MEDICAL INFOR. CT. MAR 6 1986

ISSN 0007-1250

Published by authority of
The Royal College of Psychiatrists

NOTICE TO CONTRIBUTORS

1. *The British Journal of Psychiatry* is published monthly under the auspices of the Royal College of Psychiatrists. The *Journal* publishes original work in all fields of psychiatry. Communications on general editorial matters, including manuscripts for publication, printed matter, and books for review, should be sent to *The Editor, The British Journal of Psychiatry, 17 Belgrave Square, London SW1X 8PG*.

2. Contributions are accepted for publication on the condition that their substance has not been published or submitted for publication elsewhere. The *Journal* does not hold itself responsible for statements made by contributors. Unless so stated, material in the *Journal* does not necessarily reflect the views of the Editor or the Royal College of Psychiatrists.

3. Published articles become the property of the *Journal* and can be published elsewhere, in full or in part, only with the Editor's written permission.

4. Manuscripts accepted for publication are subject to copy-editing, and to editorial changes required for conformity with *Journal* style.

5. We regret that papers unsuitable for publication will not be returned.

6. **General advice to authors** In the assessment of manuscripts submitted to the *Journal*, great importance is attached to clarity and brevity of expression. Authors should read *General Notes on the Preparation of Scientific Papers* (3rd ed. 1974, £0.45, from The Royal Society) and/or Judith Butcher's *Typescripts, Proofs and Indexes* (1980, Cambridge University Press, £2.95). Spelling should follow the *Concise Oxford Dictionary*.

The standard of statistical work in papers submitted for publication has proved to be very variable. Authors using any statistical methods at all are strongly advised to study the paper 'Statistical guidelines for contributors to medical journals' (D. G. Altman *et al.*, *British Medical Journal*, 7 May 1983, 286, 1489–1493) at the earliest possible stage in preparing their work for publication.

7. **Manuscripts** Two high-quality copies should be submitted and the author should retain a copy. Articles must be typed on one side of the paper only, **double spaced with wide margins**, and all the pages must be numbered sequentially, starting with the title page.

a. The **title** should be brief and to the point. If necessary, a sub-title may be used to amplify the main title. The names of the authors should appear on the title-page, and **their names, degrees, affiliations and full addresses at the end of the paper**.

b. A **summary** should be given at the *beginning* of the article. It should be brief and factual and not normally more than 150 words.

c. **References** should be listed **alphabetically** at the end of the paper, **the titles of journals being given in full**. Authors should follow *Journal* style for the reference list and study the examples given below. Titles of books and journals are printed in italic and should therefore be underlined on the typescript. Reference lists not in *Journal* style will be returned to the author for correction.

Authors should check that the text references and the reference list are in complete agreement as regards dates and spelling of names. The text reference should be in the form '(Smith, 1971)' or 'Smith (1971) showed that ...'

DURKHEIM, E. (1897) *Le Suicide*. Paris. Translated (1952) as *Suicide: A Study in Sociology*, by J. A. Spaulding & C. Simpson. London: Routledge & Kegan Paul.

KENDELL, R. E. (1974) The stability of psychiatric diagnoses. *British Journal of Psychiatry*, 124, 352–358.

RUTTER, M. TIZARD, J. & WHITMORE, K. (1970) *Education, Health and Behaviour*. London: Longman.

SCOTT, P. D. (1974) Definition, classification, prognosis and treatment. In *Pathology and Treatment of Sexual Deviation* (ed. I. Rosen) Oxford: Oxford University Press.

'Personal Communications' need written authorisation.

d. **Symbols and abbreviations** Follow *Units, Symbols and Abbreviations: A Guide for Biological and Medical Editors and Authors* (3rd ed. 1977), £2.00, available from the Publications Office of the Royal Society of Medicine. Terms or abbreviations which might not be understood by the average reader should be explained at first occurrence.

e. **Tables and Figures** Each table should be on a separate sheet, with an adequate heading; table and heading should be self-explanatory without reference to the text. The desired position of the table relative to the text should be indicated in the left margin.

Figures should be individual glossy photographs, or other camera-ready prints, *not* photocopies, clearly numbered and captioned below. Avoid cluttering figures with explanatory text which is better incorporated succinctly in the caption. A figure intended to occupy a single column should be drawn (or photographed) 80–110 mm wide to allow for a 2/3 reduction; a figure requiring the whole width of the page should be 180–210 mm wide. Lettering (film-set or stencil) should be 12pt sans (initial capital for the first word only) to give 8pt on the printed page. Labels on graphs should read parallel to the axes. Units must be clearly indicated and should be in brackets (*note*—'litre' should be spelled out in full unless modified to ml, dl, etc.).

f. **Photographs** Prints must be taken directly from the original b/w negative (not, for example, from a colour slide or a printed page) and should be glossy and sharply focussed. Labels, arrows, etc. should be shown on a duplicate print or overlay. Do not write anything on photographic prints, and do not use staples or paper-clips on them. These procedures apart, all the comments on figures and tables apply equally to photographs.

8. **Proofs** A proof will be sent to the senior author of an article. Reprints, which are prepared at the same time as the *Journal*, should be ordered when the proof is returned to the Editor.

9. **Letters to the Editor** Letters should not exceed two double-spaced typed pages. They will be edited for clarity and conformity with *Journal* style and may be shortened. There should be no more than five references; tables and figures cannot be used.

Staff Psychiatrist Opportunity in Edmonton, Alberta, Canada

Alberta Hospital Edmonton offers a challenging career opportunity for a qualified psychiatrist to join a team of ten psychiatrists in our 140 bed Admission Service.

Reporting to the Director of Admission Service you will be responsible for the care and supervision of inpatients in a service delivery based on a biological, multi-disciplinary approach. You will also be involved in instructing psychiatry to medical students, committee work, participation in clinical research and quality assurance.

Detailed applications should be sent to:

Alberta Hospital Edmonton is a 620 bed, fully accredited teaching hospital. The Hospital is comprised of general admissions, forensic, rehabilitation and psychogeriatrics with a strong commitment to education and research.

Applicants must be eligible for licensing by the Alberta College of Physicians and Surgeons, have a Canadian Fellowship in Psychiatry. Primary consideration will be given to applicants with a biological approach and a desire to be involved in research.

Dr. David R. Cornish
Associate Executive Director - Clinical
Alberta Hospital Edmonton, Box 307, Edmonton, Alberta, Canada T5J 2J7
Telephone: (403) 973-2439

**POST DOCTORAL
FELLOW/RESEARCH
ASSOCIATE POSITIONS**

The Maryland Psychiatric Research Center, University of Maryland School of Medicine, Department of Psychiatry has two-year positions available in its Epidemiology/Genetics Program. Studies in progress or planned include (1) the description of a large representative sample of hospitalized psychotic adults and children; (2) family pedigree studies; (3) long term follow-up studies of psychotic patients; (4) study of the association between perinatal factors, childhood events and the risk for schizophrenia.

Individuals must have completed clinical training in psychiatry (adult or child) or psychology. Course work in epidemiology and statistics and an opportunity to participate in research will be provided. Those interested should submit a curriculum vitae and a statement of research interest to:

Ann E. Pulver, ScD
Maryland Psychiatric Research Center
P.O. Box 21247
Catonsville, Maryland 21228.

Equal Opportunity Employer

**VISITING PSYCHIATRIST
HM PRISON MAIDSTONE**

The Prison Medical Service is responsible for the mental and physical health of all inmates of prison service establishments. The full-time medical staff works in collaboration with visiting specialists.

An opportunity exists for a Visiting Psychiatrist to make an important contribution to the medical service at HM Prison Maidstone, which is a 'closed' training prison at present accommodating about 500 adult male inmates. Applications are invited from fully registered medical practitioners of consultant status. At present the requirement is for two sessions a week. In the main the Visiting Psychiatrist will be expected to be involved in psychotherapy with individual patients.

The fee payable per session (of between 2½ and 3½ hours) is £61.50; certain travelling expenses are payable.

Further information is obtainable from the Senior Medical Officer at HM Prison Maidstone. Please telephone Maidstone (STD Code 0622) 55611.

For a form of application, which should be returned completed within 21 days of this announcement appearing, please write to **The Home Office, (Room 402-IR), FREEPOST London, SW1P 4YW.**

The Home Office is an equal opportunities employer.

HM Prison Service — A Service for Society.

**NEW OXFORD BOOKS
for PSYCHIATRISTS**

NEW EDITION

**An Introduction to the
Psychotherapies**
Second Edition

Edited by **Sidney Bloch**

The second edition of this introductory textbook has been thoroughly revised, with two new chapters added, one on brief, focal psychotherapy, and one on child psychotherapy.

'a superb little paperback that gives the beginner a good entry into the field'—**Psychosomatics** (on the first edition)

0 19 261470 3, January 1986, 296 pp., £15 (cloth)
0 19 261469 X, £8.95 (paper)

NEW TITLES

**Making Sense of
Psychiatric Cases**

**Maurice Greenberg, George Szumukler,
& Digby Tantam**

Psychiatric problems are brought to life by the presentation of twelve real case histories, followed by sections in which the psychiatrist goes through the factors that will influence the diagnosis and treatment of the case.

0 19 261437 1, January 1986, 288 pp., £9.95 (paper)

Anxiety

Donald W. Goodwin

A fast-paced, balanced examination of the nature of anxiety, the anxiety disorders, and their treatment, with many interesting experiments and clinical cases highlighting the discussion.

0 19 503665 4, January 1986, 300 pp., £12.50 (OUP USA)

**Therapeutic Factors in
Group Psychotherapy**

Sydney Bloch & Eric Crouch

This is the first book to offer a clear and coherent account of the knowledge that has accumulated on how group therapy works and which particular elements of the process are responsible for its success.

0 19 261365 0, 1985, 250 pp., £10

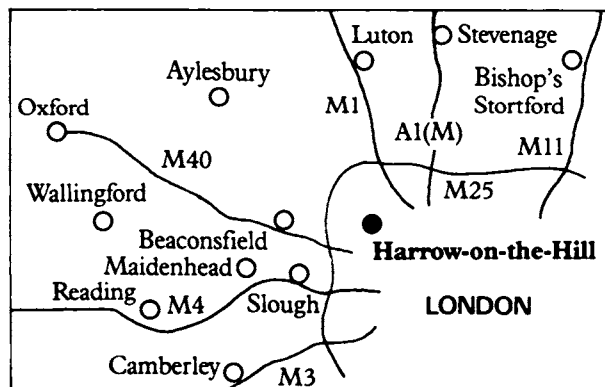

Oxford University Press

Bowden House Clinic – back on the map.

Bowden House Clinic, now part of the St Andrew's Hospital Group of private psychiatric hospitals, has specialist in-patient and out-patient treatment programmes for:

- **Acute psychiatric disorders**
- **Alcohol problems**
- **Anorexia nervosa and other eating disorders**
- **Agoraphobia**

As well as the newly established
North-West Home Counties Psychotherapy Centre

Bowden House Clinic, set in attractive, secluded grounds at Harrow-on-the-Hill, is only 30 minutes by road or rail from central London.

Subscribers to private medical insurance schemes may be able to claim within the terms of their insurance for treatment at the clinic.

BOWDEN HOUSE CLINIC

For further information, write to

The Medical Director, Bowden House Clinic, London Road, Harrow-on-the-Hill, Middlesex HA1 3JL. Tel: 01-864 0221
