INFECTION CONTROL & HOSPITAL EPIDEMIOLOGY

Call for Manuscripts: Antimicrobial Stewardship

Infection Control and Hospital Epidemiology is pleased to announce that it will publish a peer-reviewed special issue devoted to antimicrobial stewardship and its effect on the prevention and control of infection. This special issue will be published in conjunction with the spring meeting of the Society for Healthcare Epidemiology of America (www.shea-online.org) to be held in Jacksonville, Florida, April 13-16, 2012, which will include a major leadership forum on antimicrobial stewardship.

The journal seeks submission of robust scientific investigations of various approaches and the impact of antimicrobial stewardship programs in health care. Of particular interest are papers addressing the following:

- Antimicrobial stewardship for special populations, including pediatrics, oncology, hemodialysis, and critical care
- Health outcome and cost effectiveness impact of antimicrobial stewardship
- Use of diagnostic tools and role of microbiology in antimicrobial stewardship
- Effective implementation of programs in community hospitals, long-term care acute care facilities, outpatient settings and non-acute healthcare settings (e.g., dialysis, ambulatory care and ambulatory surgery centers)

Authors are invited to submit their work electronically via Editorial Manager (www.editorialmanager.com/iche/) no later than **October 1, 2011**. Research papers in the form of original articles (up to 3,000 words), concise communications (up to 1,200 words), and research briefs (up to 900 words) will be considered for review.

For manuscript preparation details, please see the journal's Information for Authors webpage (<http://www.jstor.org/page/journal/infeconthospepid/forAuthor.html>) or contact the editorial office (iche@press.uchicago.edu).

Clinical Governance

An International Journal

Clinical Governance: An International Journal aims to address the doubts, queries, triumphs and practical applications of introducing quality assurance mechanisms into the delivery of care.

The journal takes an international stance and covers key developments worldwide which can inform best practice in health care. Efficiency, effectiveness and economics are the main factors in the assessment of best practice and all are addressed in the research- audit- and evidence-based papers published. All papers are peer reviewed to ensure their validity and value to current debates.

The journal publishes:

- Research articles which illustrate clear implications for practice
- Results-focused case studies which discuss problems and successes in clinical governance techniques
- Special issues on topical themes

“An accessible and gripping narrative on a serious topic that manages to explain, in plain English, how viruses are changing the world.”—NATHAN WOLFE, founder and CEO of Global Viral Forecasting

A Planet of **Viruses**

CARL ZIMMER

“*A Planet of Viruses* is an important primer on the viruses living within and around all of us—sometimes funny, other times shocking, and always accessible. Whether discussing the common cold and flu, little-known viruses that attack bacteria or protect oceans, or the world’s viral future as seen through our encounters with HIV or SARS, Zimmer’s writing is lively, knowledgeable, and graced with poetic touches.”

FORTHCOMING IN MAY

“Disease Maps is an extraordinary visual and narrative treat. I have come to look forward to Tom Koch’s books for the wonderful and unique way that he can synthesize data and present it visually and in the process tell us magnificent stories.”

Dr. Abraham Verghese,
Stanford University School of Medicine

“This is a masterful book in conception and structure. It is also extremely well written. What we find on reading is an exquisite telling of the history of the medical science of disease. The collection of medical maps, diagrams, and other illustrations is impressive in scope—there are many disease maps shown that have not been publicly available before or collected in one place.”
