

Index of Subjects

- Age–sex distribution of various diseases with particular reference to toxoplasmic lymphadenopathy, 215
- Agglutinin production in mice in the determination of the definitive serotype of *Bordetella pertussis*, 257
- Antibacterial activity of chloroxylenol in combination with EDTA, 11
- Antibiotics and the Aberdeen typhoid outbreak in 1964, 191
- Antiseptics used for hand disinfection in wards, 75
- Bacillus cereus* food-poisoning in Finland associated with boiled rice, 319
- Bacterial dispersion in relation to operating room clothing, 367
- Bacteriological evaluation of a mobile laminar cross-flow unit for surgery, under laboratory circumstances, 1
- Bacteriological quality control, preparation of simulated water samples for, 49
- Bacteriological survey of washrooms and toilets, 183
- Bedpans, the cleaning and disinfection of by heat, 341
- Bioassay results, point and interval estimation in the combination of, 147
- Bordetella pertussis*, the importance of agglutinin production in mice in the determination of the definitive serotype, 257
- Bordetella pertussis*, serotypes of, isolated in Great Britain between 1941 and 1968 and a comparison with the serotypes observed in other countries during this period, 265
- Bordetella pertussis*, the stability of the serotypes of, with particular reference to serotype 1,2,3,4, 277
- Bovine brucellosis, serological tests for: sensitivity of to different antibody classes, 287
- Brucella abortus* agglutinins in whey, the effect of chloroform on, 425
- Brucella abortus*, the immunogenic activity of ribosomal fractions derived from, 65
- Characteristics of a virus causing pox disease in sheep and goats in Kenya, with observations on the epidemiology and control, 163
- Chlamydia A (TRIC agents), the sensitivity of replicating McCoy cells in the isolation and growth of, 441
- Chloroform, the effect of on *Brucella abortus* agglutinins in whey, 425
- Chloroxylenol, antibacterial activity in combination with EDTA, 11
- Chocolate, survival of *Salmonella* in, 41
- Cleaning and disinfection by heat of bedpans in automatic and semi-automatic machines, 341
- Clothing in the operating room, its relation to bacterial dispersion, 367
- Congenital malformations in India, role of rubella in, 33
- Cow-pats, the serotypes of *Escherichia coli* from, compared with serotypes from human sources, 403
- Cross-infection in isolation wards of different design, 23
- Cytomegalovirus, porcine, in commercial pig herds, 125
- Dairy creamery effluent sludge, isolation of mycobacteria from, 407
- Disinfection of hands in wards, evaluation of antiseptics used for, 75
- Echovirus 19, epidemic of, in the north-east of England, 307
- Enteric fever in Scotland, 1967–1974, 83
- Environmental contamination in a microbiological laboratory, 91
- Epidemic of echovirus 19 in the north-east of England, 307
- Epidemiology and control of a virus causing pox-disease in sheep and goats in Kenya, 163
- Escherichia coli* serotypes from cow-pats, compared with those from human sources, 403
- Ethylenediaminetetra-acetic acid, anti-bacterial activity of chloroxylenol in combination with, 11

- Food-poisoning in Finland by *Bacillus cereus*, associated with boiled rice, 319
- Foot-and-mouth disease virus, growth of in respiratory tract of cattle, 467
- Foot-and-mouth disease in Kenya, the role of sheep and goats in the epizootiology of, 395
- Frozen broiler chickens, estimation of the hygienic condition of, 57
- Goats and sheep, the role of in the epizootiology of foot-and-mouth disease in Kenya, 395
- Hamster as a secondary reservoir host of lymphocytic choriomeningitis virus, 299
- Hand disinfection in wards, evaluation of antiseptics used for, 75
- HBV infections in Athens, Greece, sero-epidemiological study of, 229
- Infected patients, a source isolator for, 355
- Influenza vaccine, WRL 105 strain live attenuated, used for comparing four methods of intranasal vaccination, 459
- Iodophor disinfectants, the laboratory evaluation of with yeast suspensions, 349
- Isolation wards of different design, cross-infection in, 23
- Laboratory bench, isolation of salmonellas and *Shigella sonnei* from, 337
- Laminar cross-flow unit for surgery, bacteriological evaluation of, 1
- Low temperature denaturation injury in T4Bo phage, prevention of by low concentrations of traditional cryoprotective additives, 453
- Lymphocytic choriomeningitis virus, the hamster as a secondary reservoir host of, 299
- Major gene controlling warfarin-resistance in the house mouse, 173
- Marmosets and tamarins in the laboratory, an outbreak of shigellosis in, 415
- McCoy cells, factors affecting the sensitivity of in the isolation and growth of chlamydia (TRIC agents), 441
- Meat products, methods for detection of vegetable proteins in, 329
- Mouse or man? Which are pertussis vaccines to protect? 249
- Mycobacteria, the effect of contact with on the pattern of sensitivity to a range of new Tuberculins amongst Ugandan adults, 205
- Mycobacteria, isolation of from dairy creamery effluent sludge, 407
- Oral poliovaccine, response to in persons aged 16–18 years, 235
- Pertussis vaccines, to protect mouse or man? 249
- Phage T4Bo, prevention of low temperature denaturation injury in by low concentrations of traditional cryoprotective additives, 453
- Point and interval estimation in the combination of bioassay results, 147
- Polar isolation, studies of experimental rhinovirus type 2 infections in, compared with in England, 379
- Porcine cytomegalovirus in commercial pig herds, 125
- Pseudomonas*, a new vaccine against: preliminary trial on human volunteers, 429
- Response to oral poliovaccine in persons aged 16–18 years, 235
- Rhinoviruses in Britain 1963–1973, 137
- Rhinovirus type 2 infections studied experimentally in polar isolation and in England, 379
- Ribosomal fractions derived from *Brucella abortus*, the immunogenic activity of, 65
- Rice, boiled, associated with an outbreak of *Bacillus cereus* food-poisoning in Finland, 319
- Rubella, role of in congenital malformations in India, 33
- Rubella syndrome (congenital), specific immunoglobins in infants with, 109
- Salmonella eastbourne* and *S. typhimurium* in chocolate, 41
- Salmonella*, the virulence of trimethoprim-resistant thymine-requiring strains of, 97
- Salmonellas and *Shigella sonnei* isolated from a laboratory bench, 337
- Seroepidemiological study of HBV infections in Athens, Greece, 229
- Serological tests for bovine brucellosis, a quantitative comparison of the sensitivity of to different antibody classes, 287

- Serotypes of *Bordetella pertussis* isolated in Great Britain between 1941 and 1968 and a comparison with serotypes observed in other countries during the period, 265
- Sheep and goats, the role of in the epizootiology of foot-and-mouth disease in Kenya, 395
- Shigella sonnei* and salmonellas isolated from a laboratory bench, 337
- Shigellosis in laboratory marmosets and tamarins, 415
- Stability of the serotypes of *Bordetella pertussis* with particular reference to serotype 1,2,3,4, 277
- Toxoplasmic lymphadenopathy, age-sex distribution of various diseases with particular reference to, 215
- Tuberculins, new, sensitivity of Uganda adults, to 205
- Typhoid outbreak in Aberdeen, 1964, the use of antibiotics in, 191
- Vaccination, intranasal, a comparison of four methods in a clinical trial of WRL 105 strain live attenuated influenza vaccine, 459
- Vaccine against *Pseudomonas*. Preliminary trial on human volunteers, 429
- Vegetable proteins in meat products, extraction methods and test techniques for their detection, 329
- Virulence of trimethoprim-resistant thymine-requiring strains of *Salmonella*, 97
- Viruses: echo, 307; foot-and-mouth, 395, 467; hepatitis B, 229; lymphocytic choriomeningitis, 299; porcine cytomegalo, 125; pox, 163; rhino, 137, 379; rubella, 33, 109.
- Warfarin-resistance in the house mouse, a major gene controlling, 173
- Washrooms and toilets, a bacteriological survey of, 183
- Water samples, simulated, for bacteriological quality control, 49
- Yeast suspensions used in the laboratory evaluation of iodophor disinfectants, 349
