

**JOURNAL OF APPLIED PROBABILITY**

**VOLUME 6 (1969): INDEX**

	PAGE
ADKE, S. R. A birth, death and migration process .....	687-691
ASAKURA, T. <i>See under</i> MINE, H.	
BARNDORFF-NIELSEN, O. AND YEO, G. F. Negative binomial processes .....	633-647
BHAT, B. R. Used item replacement policy .....	309-318
BINGHAM, M. S. A note on stochastic processes with independent increments taking values in an abelian group .....	449-452
BIRNBAUM, Z. W. AND SAUNDERS, S. C. A new family of life distributions .....	319-327
BIRNBAUM, Z. W. <i>See under</i> Saunders, S. C.	
BITHELL, J. F. A stochastic model for the breaking of molecular segments .....	59-73
BOES, D. C. Note on the output of a queueing system .....	459-461
BOYLAN, E. S. Stability theorems for solutions to the optimal inventory equation ..	211-217
BRESLOW, N. On large sample sequential analysis with applications to survivorship data .....	261-274
BROWN, M. Some results on a traffic model of Rényi .....	293-300
BROWN, M. An invariance property of Poisson processes .....	453-458
BROWN, M. AND ROSS, S. M. Some results for infinite server Poisson queues .....	604-611
CHIA, A. B. AND WATTERSON, G. A. Demographic effects on the rate of genetic evolution. I. Constant size populations with two genotypes .....	231-248
COLEMAN, R. Random paths through convex bodies .....	430-441
COLEMAN, R. AND GASTWIRTH, J. L. Some models for interaction of renewal processes related to neuron firing .....	38-58
CONOLLY, B. W. AND HADIDI, N. A correlated queue .....	122-136
CRAVEN, B. D. Asymptotic correlation in a queue .....	573-583
CRUMP, K. S. AND MODE, C. J. An age-dependent branching process with correlations among sister cells .....	205-210
DALEY, D. J. The total waiting time in a busy period of a stable single-server queue, I	550-564
DALEY, D. J. AND JACOBS, D. R., JR. The total waiting time in a busy period of a stable single-server queue, II .....	565-572
DALEY, D. J. Integral representations of transition probabilities and serial covariances of certain Markov chains .....	648-659
DANIELS, H. E. The minimum of a stationary Markov process superimposed on a U-shaped trend .....	399-408
DISNEY, R. L. <i>See under</i> Vlach, T. L.	
DWASS, M. The total progeny in a branching process and a related random walk ....	682-686
ENNS, E. G. The trivariate distribution of the maximum queue length, the number of customers served and the duration of the busy period for the $M/G/1$ queueing system .....	154-161
FINCH, P. D. A note on the queueing system $GI/E_k/1$ .....	708-710
GASTWIRTH, J. L. <i>See under</i> Coleman, R.	
GAVER, D. P., JR. Highway delays resulting from flow-stopping incidents .....	137-153
GREENBERG, I. Some duality results in the theory of queues .....	99-121
HADIDI, N. On the service time distribution and the waiting time process of a potentially infinite capacity queueing system .....	594-603

HADIDI, N. <i>See under</i> Conolly, B. W.	
HALL, W. J. Embedding submartingales in Wiener processes with drift, with applications to sequential analysis .....	612–632
HARDIN, J. C. AND SWEET, A. L. A note on absorption probabilities for a random walk between a reflecting and an absorbing barrier .....	224–226
HEYDE, C.C. On the maximum of sums of random variables and the supremum functional for stable processes .....	419–429
HOLMES, P. T. AND STRAWDERMAN, W. E. A note on the waiting times between record observations .....	711–714
IGLEHART, D. L. Diffusion approximation in collective risk theory .....	285–292
JACOBS, D. R., JR. <i>See under</i> Daley, D. J.	
JAGERS, P. The proportions of individuals of different kinds in two-type populations. A branching process problem arising in biology .....	249–260
JENSEN, L. AND POLLAK, E. Random selective advantages of a gene in a finite population .....	19–37
KEMP, A. W. AND KEMP, C. D. Branching and clustering models associated with the ‘lost-games distribution’ .....	700–703
KEMP, C. D. <i>See under</i> Kemp, A.W.	
KINGMAN, J. F. C. Markov population processes .....	1–18
KINGMAN, J. F. C. Random secants of a convex body .....	660–672
KOTIAH, T. C. T., THOMPSON, J. W. AND WAUGH, W. A. O’N. Use of Erlangian distributions for single-server queueing systems .....	584–593
LESLIE, R. T. Recurrence times of clusters of Poisson points .....	372–388
LESLIE, R. T. <i>See under</i> Tallis, G. M..	
LEWIS, P. A. W. Asymptotic properties and equilibrium conditions for branching Poisson processes .....	355–371
LITWIN, S. The distribution of radioactive recovery in randomly cut and sedimented DNA .....	275–284
LUKACS, E. A characterization of stable processes .....	409–418
MANDL, P. An identity for Markovian replacement processes .....	348–354
MARUYAMA, T. Genetic correlation in the stepping stone model with non-symmetrical migration rates .....	463–477
MINE, H. AND ASAKURA, T. The effect of an age replacement to a standby redundant system .....	516–523
MODE, C. J. <i>See under</i> Crump, K. S.	
MORAN, P. A. P. A theory of dams with continuous input and a general release rule .....	88–98
ORRIS, J. Equilibrium distributions for systems of chemical reactions with applications to the theory of molecular adsorption .....	505–515
PERCUS, O. E. AND PERCUS, J. K. On the distribution of the number of zero partial sums .....	162–176
PERCUS, J. K. <i>See under</i> Percus, O. E.	
PHATARFOD, R. M. A note on the first emptiness problem of a finite dam with Poisson type inputs .....	227–230
POLLAK, E. Bounds for certain branching processes .....	201–204
POLLAK, E. <i>See under</i> Jensen, L.	
PURI, P. S. Some new results in the mathematical theory of phage-reproduction .....	493–504
ROSS, S. M. Optimal dispatching of a Poisson process .....	692–699
ROSS, S. M. <i>See under</i> Brown, M.	
RADCLIFFE, J. AND STAFF, P. J. First-order conservative processes with multiple latent roots .....	186–194
SAUNDERS, S. C. AND BIRNBAUM, Z. W. Estimation for a family of life distributions with applications to fatigue. ....	328–347
SAUNDERS, S. C. <i>See under</i> Birnbaum, Z. W.	
SEVERO, N. C. A recursion theorem on solving differential-difference equations and applications to some stochastic processes .....	673–681

STAFF, P. J. <i>See under</i> Radcliffe, J.	
STRAWDERMAN, W. E. <i>See under</i> Holmes, P. T.	
SWEET, A. L. <i>See under</i> Hardin J. C.	
TALLIS, G. M. The identifiability of mixtures of distributions .....	389-398
TALLIS, G. M. AND LESLIE, R. T. General models for $r$ -molecular reactions .....	74-87
THEDÉEN, T. On road traffic with free overtaking .....	524-549
THOMPSON, J. W. <i>See under</i> Kotiah, T. C. T.	
TORTRAT, A. Sur un théorème de Lewis et la décomposition en facteurs premiers de la loi rectangulaire .....	177-185
VERHAGEN, A. M. W. Random size trees on the one and two dimensional integer lattice .....	301-308
VLACH, T. L. AND DISNEY, R. L. The departure process from the $GI/G/1$ queue .....	704-707
WASAN, M. T. Sufficient conditions for a first passage time process to be that of Brownian motion .....	218-223
WATTERSON, G. A. <i>See under</i> Chia, A. B.	
WAUGH, W. A. O'N. <i>See under</i> Kotiah, T. C. T.	
WEINER, H. J. Sums of lifetimes in age dependent branching processes .....	195-200
WEISS, L. The joint asymptotic distribution of the $k$ smallest sample spacings .....	442-448
WILKINSON, W. E. On calculating extinction probabilities for branching processes in random environments .....	478-492
YEO, G. F. <i>See under</i> Barndorff-Nielsen, O.	

The Editorial Board would like to encourage the submission to the *Advances* of Review Papers summarising and coordinating recent results in any of the fields of Applied Probability. The papers should be approximately 40–50 printed pages in length. On acceptance of a Review Paper for publication in the *Advances*, the author will receive £stg. 100 (U.S. \$240).

In addition to these Review Papers, *Advances* is also designed to be a medium of publication for (1) long research papers in Applied Probability, which may include expository material, (2) expository papers on branches of mathematics of interest to probabilists, (3) papers outlining areas in the biological, physical, social and technological sciences in which probability models can be usefully developed, and finally, (4) papers in Applied Probability presented at conferences which do not publish their proceedings.

In short, the main function of *Advances* is to define areas of recent progress and potential development in Applied Probability. As with the *Journal of Applied Probability*, *Advances* undertakes to publish papers accepted by the Editors within 15 months of their submission.

The Editorial Board consists of E. Sparre Andersen, D. Blackwell, B. Gnedenko, J. Hájek, E. J. Hannan, D. G. Kendall, J. F. C. Kingman, K. Krickeberg, P. A. P. Moran, J. Neveu, K. R. Parthasarathy, R. Pyke, C. A. B. Smith and L. Takács. The Editor-in-Chief is J. Gani, and the Editorial Office of the *Advances* is in the Department of Probability and Statistics, The University, Sheffield, S3 7RH, England.

The second number of *Advances* contains the following papers:

Erhan Çinlar	Markov renewal theory
Jeffrey J. Hunter	On the moments of Markov renewal processes
R. E. Miles	Poisson flats in Euclidean space. Part I. A finite number of random uniform flats
J. C. Gittins	Optimal resource allocation in chemical research
P. Whittle	Sequential decision process with essential unobservables

Subscription rates (post free) per volume are:

For libraries and institutions: U.S.\$13.00 £stg.5.5.0. \$A.11.00

For individuals belonging to a recognised scientific society: U.S.\$8.00 £stg.3.6.0. \$A.7.20

Cheques made out on U.S., U.K. and Australian banks will be acceptable; they should be made payable to *Applied Probability*, and sent to:

Editorial Assistant, *Advances in Applied Probability*,  
Department of Probability and Statistics,  
The University, Sheffield, S3 7RH, England.

# Methuen's Supplementary Review Series in Applied Probability

*General Editor:* M. S. BARTLETT, M.A., D.SC., F.R.S.

*Editor:* J. GANI, D.I.C., PH.D.

This supplementary series consists of the Review Papers from the first four volumes of the *Journal of Applied Probability* in book form. The volumes are written in a simple expository style, and provide research workers and students of Applied Probability with concise accounts of work done in their fields. The eight volumes deal with the applications of Probability Theory to the biological, chemical and technological sciences.

Volume 1. TIME-DEPENDENT RESULTS IN STORAGE THEORY

by N. U. Prabhu

Volume 2. DIFFUSION MODELS IN POPULATION GENETICS

by M. Kimura

Volume 3. GROUP REPRESENTATIONS AND APPLIED PROBABILITY

by E. J. Hannan

Volume 4. STOCHASTIC MODELS FOR BACTERIOPHAGE by J. Gani

Volume 5. RECENT RESULTS IN INFORMATION THEORY by S. Kotz

Volume 6. ON THE ALGEBRA OF QUEUES by J. F. C. Kingman

Volume 7. COMPLETE EXPONENTIAL CONVERGENCE AND SOME  
RELATED TOPICS by C. R. Heathcote

Volume 8. STOCHASTIC APPROACH TO CHEMICAL KINETICS by D. A.  
McQuarrie

Orders for these should be made through your bookseller or direct from:

Methuen & Co. Ltd.

11 NEW FETTER LANE, LONDON EC4

---

## Mathematical Spectrum

### A Magazine of Contemporary Mathematics

This magazine addresses itself primarily to young mathematicians in schools, colleges of education, and universities. Its object is to discuss the entire range of modern mathematical disciplines (pure mathematics, applied mathematics, statistics, operational research, computing science, biomathematics) in an informative but informal manner and to relate discoveries in mathematics to progress in the natural sciences, technology, social studies, and business management.

The Editors believe that the process of learning is a dialogue, and consequently they wish to promote active participation by readers. Correspondence on any subject relating to mathematics and mathematical education is welcomed. There is also a problem section, and readers are encouraged to submit their solutions, the best of which are published.

For a descriptive leaflet, rates of subscription, and order form, application should be made to

The Oxford University Press, Walton Street, Oxford.

*Mathematical Spectrum* is published by Oxford University Press on behalf of the Applied Probability Trust.

## Subscription rates

Subscriptions (post free) for the 1969 volume of the *Journal* are:

U.S. \$17, £stg. 7.0.0. \$A.15.00, for libraries and institutions;

U.S.\$8, £stg. 3.6.0, \$A.7.20, for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

All enquiries about the *Journal*, as well as other subscriptions and orders for back numbers should be sent to the Editorial Assistant, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield, S3 7RH, England. The price of back numbers is \$19.50, £stg. 8.0.0. \$A.17.00 per volume. Cheques, money orders, etc. should be made out to *Applied Probability*; cheques on U.S., U.K. and Australian banks will be acceptable.

## Notes for Contributors

It is a condition of publication in the *Journal of Applied Probability* that papers shall not previously have appeared elsewhere, and will not be reprinted without the written permission of the Trust. The copyright of all published papers shall be vested in the Trust. It is the general policy of the *Journal* not to accept for publication papers which cannot appear in print within 15 months of their date of submission. Authors will receive 100 reprints of their papers free, and joint authors a proportional share of this number. Additional reprints will be provided at cost.

Manuscripts should be written in English or French; manuscripts in other languages may be accepted by the Editors, but will appear (subject to the author's agreement) in English or French translation in the *Journal*.

It will be of help to the Editors if the following conventions are adopted:

a) The manuscript should be typewritten, using double spacing, on one side of the paper only. The original and a copy, may be submitted to any Editor; a duplicate of the covering letter should, however, be sent to the Editor-in-Chief.

b) References should be indicated in the text by the name of the author(s) and the date, thus: Feller (1961), and the full references listed at the end of the article in alphabetical order. Journal references should include the title of the article cited, the title of the journal (abbreviated in the style of the *International Journal of Abstracts: Statistical Theory and Method*) the volume, and inclusive page numbers. Book references should give the full title, the publisher, and the place of publication. For example:

Feller, W. (1961) A simple proof of renewal theorems. *Comm. Pure Appl. Math.* **14**, 285–293.

Robinson, E. A. (1959) *An Introduction to Infinitely Many Variates*, Griffin, London.

c) Type faces should be carefully distinguished on the manuscript using the following standard methods of marking:

Italic capitals (*T, I, R*) and lower case letters (*t, i, r*) should be underlined once, e.g., T, I, R, t, i, r.

Bold-face capitals (**T, I, R**) and lower case letters (**t, i, r**) should have a curly underline, e.g., T, I, R, t, i, r.

Greek characters ( $\alpha, \beta, \theta$ ) and script letters ( *$\mathcal{J}, \mathcal{I}, \mathcal{R}$* ) should be carefully drawn and identified when first used by a marginal note of the form ' $\alpha$ —lower case Greek alpha' or ' $\mathcal{R}$ —script R'.

d) Indices and subscripts should be clearly distinguished, using the marking  $\overset{4}{\underset{4}{\wedge}}$  where necessary.

Authors will receive only first proofs for correction; charges will be made for excessive alteration to these.

Printed in Israel at the Jerusalem Academic Press, P.O.B. 2390, Jerusalem.

# CONTENTS

Volume 6

Number 3

December 1969

*Research Papers*

TAKEO MARUYAMA	463	Genetic correlation in the stepping stone model with non-symmetrical migration rates
WILLIAM E. WILKINSON	478	On calculating extinction probabilities for branching processes in random environments
PREM S. PURI	493	Some new results in the mathematical theory of phage-reproduction
J. ORRISS	505	Equilibrium distributions for systems of chemical reactions with applications to the theory of molecular adsorption
HISASHI MINE AND TATSUYUKI ASAKURA	516	The effect of an age replacement to a standby redundant system
TORBJÖRN THEDÉN	524	On road traffic with free overtaking
D. J. DALEY	550	The total waiting time in a busy period of a stable single-server queue, I
D. J. DALEY AND D. R. JACOBS, JR.	565	The total waiting time in a busy period of a stable single-server queue, II
B. D. CRAVEN	573	Asymptotic correlation in a queue
T. C. T. KOTIAH, J. W. THOMPSON AND W. A. O'N. WAUGH	584	Use of Erlangian distributions for single-server queueing systems
NASSER HADIDI	594	On the service time distribution and the waiting time process of a potentially infinite capacity queueing system
MARK BROWN AND SHELDON M. ROSS	604	Some results for infinite server Poisson queues
W. J. HALL	612	Embedding submartingales in Wiener processes with drift, with applications to sequential analysis
OLE BARNDORFF-NIELSEN AND G. F. YEO	633	Negative binomial processes
D. J. DALEY	648	Integral representations of transition probabilities and serial covariances of certain Markov chains
J. F. C. KINGMAN	660	Random secants of a convex body
NORMAN C. SEVERO	673	A recursion theorem on solving differential difference equations and applications to some stochastic processes

*Short Communications*

MEYER DWASS	682	The total progeny in a branching process and a related random walk
S. R. ADKE	687	A birth, death and migration process
SHELDON M. ROSS	692	Optimal dispatching of a Poisson process
ADRIENNE W. KEMP AND C. D. KEMP	700	Branching and clustering models associated with the 'lost-games distribution'
THOMAS L. VLACH AND RALPH L. DISNEY	704	The departure process from the $GI/G/1$ queue
P. D. FINCH	708	A note on the queueing system $GI/E_k/1$
PAUL T. HOLMES AND WILLIAM E. STRAWDERMAN	711	A note on the waiting times between record observations
