

Metabolic stress in dairy cows

British Society of Animal Science
Occasional Publication No. 24

British Society of Animal Science

(formerly British Society of Animal Production)

The British Society of Animal Science aims to provide the opportunity for those with an interest in animals and animal production to exchange views, ideas and information. It is an energetic and active society with about 1300 members from over 30 countries throughout the world. Today, as ever, the Society is the natural meeting point for all those with an interest in animal science. Its membership is drawn from research, education, advisory work, commerce and the practical livestock industry.

The Society organizes a major scientific meeting once a year and occasional specialist meetings on key issues facing animal production. If you would like to join or receive further information about the Society contact: The Secretary, BSAS, PO Box 3, Penicuik, Midlothian EH26 0RZ.

Animal Science

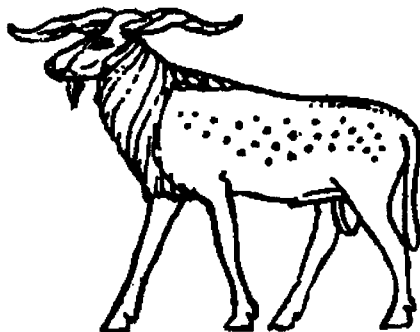

The Society's Journal is *Animal Science* (formerly *Animal Production*) which publishes fundamental and applied research and is a major scientific title of international repute. Papers reporting findings from basic and applied research relevant to all aspects of animal science can be found in it.

Animal Science is published six times a year in two volumes. Annual subscription is £190.00 (or \$340.00 in the USA and Canada) and the price for a single part is £30.00 (or \$57.00) net.

Information regarding subscriptions and sales (current and back numbers of the Journal and the Proceedings) can be obtained from: BSAS Publications Dept, PO Box 3, Penicuik, Midlothian EH26 0RZ, UK.

Occasional Publications

The British Society of Animal Science's *Occasional Publication Series* contains the full papers presented at certain symposia organized by the Society. A full list of titles is given on the back cover of this Publication. Copies may be obtained from the British Society of Animal Science, PO Box No. 3, Penicuik, Midlothian EH26 0RZ.

Contents

Foreword	i
List of delegates	ii
Nielsen, B. L. Perceived welfare issues in dairy cattle, with special emphasis on metabolic stress	1
Pond, C. M. and Newsholme, E. A. Coping with metabolic stress in wild and domesticated animals	9
Ward, W. R. and Parker, C. S. Field evidence of metabolic stress in dairy cows?	21
Knight, C. H., Beever, D. E. and Sorensen, A. Metabolic loads to be expected from different genotypes under different systems	27
Ingvartsen, K. L., Friggens, N. and Faverdin, P. Food intake regulation in late pregnancy and early lactation	37
Hill, W. G. and Brotherstone, S. Advances in methodology for utilizing sequential records	55
Veerkamp, R. F. and Koenen, E. P. C. Genetics of food intake, live weight, condition score and energy balance	63
Swalve, H. H. and Gengler, N. Genetics of lactation persistency	75
Logue, D. N., Berry, R. J., Offer, J. E., Chaplin, S. J., Crawshaw, W. M., Leach, K. A., Ball, P. J. H. and Bax, J. Consequences of metabolic load for lameness and disease	83
Webb, R., Garnsworthy, P. C., Gong, J. G., Robinson, R. S. and Wathes, D. C. Consequences for reproductive function of metabolic adaptation to load	99
Sinclair, M. C., Nielsen, B. L., Oldham, J. D. and Reid, H. W. Consequences for immune function of metabolic adaptations to load	113
Pryce, J. E. and Løvendahl, P. Options to reduce vulnerability to metabolic stress by genetic selection	119
Thomas, C., Leach, K. A., Logue, D. N., Ferris, C. and Phipps, R. H. Management options to reduce load	129
Dillon, P., Buckley, F., Snijders, S. and Crosse, S. The effect of cow genetic index and grass-based feeding system on the performance of spring-calving Holstein-Friesian cows in second lactation	141
Veerkamp, R. F. and Thompson, R. Multi-trait covariance functions to estimate genetic correlations between milk yield, dry-matter intake and live weight during lactation	147
Wassmuth, R., Boelling, D. and Jensen, J. Correlations between food intake in young bulls and production, fertility and health disorders in lactating dairy cattle	153
Gallo, L., Carnier, P., Cassandro, M., Dal Zotto, R. and Bittante, G. Genetic aspects of condition score, heart girth and milk-yield traits in Italian Friesian cows	159
Koenen, E. P. C. and Linde, C. van der Relationship between body weight, body measurements and milk yield in Holstein heifers	165

Collard, B. L., Boettcher, P. J., Dekkers, J. C. M., Schaeffer, L. R. and Petitclerc, D. Relationship between energy balance and health traits of dairy cattle in early lactation	171
Roth, A., Strandberg, E., Berglund, B., Emanuelson, U. and Philipsson, J. Genetic correlations among female fertility traits and milk production in different parities in Swedish dairy cattle	177
Sorensen, A. and Knight, C. H. Localization of metabolic restriction point in cows of differing genetic merit	183
Whay, H. R., Whitaker, D. A., Mottram, T. T. and Dowell, A. M. A veterinary model for the induction of primary nutritional ketosis in dairy cattle	189
Detilleux, J., Arendt, J., Dewaele, A., Lomba, F., Doyen, C., Brumagne, L., Simon, D., Condis, F. and Triffoy, P. A centre for the control of animal health and its management: veterinary field studies of dairy cows in Belgium	193
Fuerst-Waltl, B., Sölkner, J. and Appleby, M. C. Grazing behaviour of dairy cows selected for high and average milk yield	197
Poelarends, J. J., Kruijt, L., Gaast, H. van der and Veerkamp, R. F. Effect of milk yield and energy balance on neutrophil function in dairy cows	203
Crespo, R., Galbraith, H. and Finn, D. Expression of extracellular matrix proteins in solear tissues of Holstein-Friesian dairy cattle	209
