Studies in Second Language Acquisition is a refereed journal devoted to the scientific discussion of issues in second and foreign language acquisition of any language. Each volume contains four issues, one of which is generally devoted to a current topic in the field. The other three issues contain articles dealing with theoretical topics, some of which have broad pedagogical implications, and reports of quantitative and qualitative empirical research. Other articles include replication studies, State-of-the-Art articles, responses, book reviews, and book notices.

Associate Editors

Robert D. Borsley, *University of Essex, UK*

Journal of Linguistics has as its goal to publish articles that make a clear contribution to current debate in all branches of theoretical linguistics. The journal also provides an excellent survey of recent linguistics publications, with around thirty book reviews in each volume and regular review articles on major works marking important theoretical advances.

'For the two decades that I've been a faithful reader of the *Journal of Linguistics*, I have been impressed by the consistent quality, breadth, and liveliness of its articles and reviews. *JL* neither specializes in one branch of linguistic theory to the neglect of others nor presents a single theoretical face to the world.' Larry Horn, Yale University
