Oxford

Understanding the Gender Gap

An Economic History of American Women

CLAUDIA GOLDIN, *University of Pennsylvania*

"Claudia Goldin's book is by far the best historical study of working women in the U.S. It marries careful analysis of evidence from diverse sources with economic theories of wage determination, employment, and discrimination. This study will greatly influence future research on the economic position of women."—Gary S. Becker, *University of Chicago*

(*National Bureau of Economic Research*)

1989 336 pp.; illus. \$29.95

Theorists of Economic Growth from David Hume to the Present

With a Perspective on the Next Century

WALT W. ROSTOW, *University of Texas*

"This is a definitive study of economic growth by our leading economic historian. It discusses theories of growth by the leading classical economists who took the explanation of growth as the central problem of economic analysis, through the period of 1870 through 1940 when only Marshall and Schumpeter took growth seriously, to the period to date when growth models proliferated."—Edward S. Mason, *Professor of Economics, Emeritus, Harvard University*

January 1990 704 pp.; illus. \$39.95

Morgan Grenfell 1838-1988

The Biography of a Merchant Bank

KATHLEEN BURK, *Imperial College London*

This book tells the arresting story of one of the oldest and most illustrious merchant banks, from its founding in 1838 to the stock market crash of October 1987.

January 1990 400 pp.; illus. \$35.00

The Insecure Alliance

Energy Crises and Western Politics Since 1944

ETHAN B. KAPSTEIN, *Brandeis University*

"Kapstein's book is an excellent study of the crucial role of energy and energy politics in the evolution and stability of the Western political and military alliance."—Robert Gilpin,

Princeton University

1989 272 pp.; illus. \$35.00

ANNOUNCING . . .

the publication of

**A CENTURY OF HUMAN CAPITAL
BY EDUCATION AND TRAINING**

by

August C. Bolino

The Catholic University of America

Table of Contents:

1. The Corporate Role
2. Apprenticeship Training
3. Military Education and Training
4. Vocational Approaches in Public Schools
5. Private Technical and Trade Schools
6. The Education and Training of Immigrants
7. Training Opportunities for Women
8. Training for Other Minorities
9. The Contribution of Education and Training
10. Appendices
11. Bibliography

ISBN 0-939133-02-4

352 pages

Clothbound

Professor Bolino has experienced many of the developments of which he writes. He attended a technical high school; he was a machinist apprentice; he was educated on the GI Bill; he headed a research group in the Office of Manpower, Automation and Training; and he served as an assistant to U.S. Commissioner of Education Francis Keppel. Bolino has replicated the Denison coefficients and, for the past decade, has been measuring the contribution of education and training to the nation's productivity, using time series analysis of enrollment data. This important volume presents much new data and is the culmination of over twenty years of research.

To order a copy, send your check or money order for \$30.00 (postpaid) made payable to Kensington Historical Press. Include your name and full address and send to:

ECONOMIC HISTORY

Economic Growth in Prewar China

THOMAS G. RAWSKI

"Rawski's book offers the first comprehensive synthesis of early twentieth-century Chinese history based on original research from an economist's point of view. It directly and aggressively challenges major propositions espoused by leading historians." —Sherman Cochran, Cornell University

\$48.00

Shylock Reconsidered

Jews, Moneylending, and the Medieval Society

JOSEPH SHATZMILLER

"This is an important, finely researched, and well documented study. . . . It supplements the traditional perception of the medieval Jewish moneylender as spurned and despised with a revised picture of the usurer as valued and respected."

—Jeremy Cohen, Ohio State University and Tel Aviv University

\$30.00

Money in Sixteenth-Century Florence

CARLO M. CIPOLLA

"The clarification of the monetary system will be of absolutely essential use to all historians who work on Florence during the later Renaissance, including historians of art, literature, and music."

—Richard A. Goldthwaite, Johns Hopkins University

The Origins of Backwardness in Eastern Europe

Economics and Politics from the Middle Ages until the Early Twentieth Century

Edited by DANIEL CHIROT

Reaching back centuries, this study makes a convincing case for very deep roots of current Eastern European backwardness. The authors offer no simple explanations but rather a theoretically complex synthesis that demonstrates the interaction of politics and economics.

A HISTORY OF ECONOMIC THEORY

Classic Contributions, 1720-1980

Jürg Niehans

A History of Economic Theory offers a comprehensive account of the builders and building blocks of modern mainstream economics. Jürg Niehans shows how the analytical tools used by economists have evolved from the eighteenth century to the present.

Niehans first surveys the development of classical economics from the scholastic and mercantilist traditions of Marx. He then follows the progress of marginalist economics from Thünen to Fischer. In the book's final section, he describes economic theory in the model-building era from Pigou and Keynes to Rational Expectations.

Building his story around the economists themselves, Niehans presents a Pantheon of economic theory. It includes the famous from Smith and Riccardo to Samuelson and Friedman, but also detailed discussions of lesser-known figures who have nevertheless made classic contributions. For each theorist Niehans offers a biographical sketch followed by a description, interpretation, and critical assessment of his work.

Commercial Policy and the State
in Postindependence Peru

Paul Gootenberg

"This major new interpretation of Peruvian history has powerful implications for understanding Peru's subsequent economic and political history, and for explaining the persistence of underdevelopment. The data base upon which this argument is constructed is particularly impressive. This work will quickly become required reading for any serious student of 19th-century Peruvian history."

—*Shane J. Hunt, Boston University*

Nutrition and Economic Development in the
Eighteenth-Century Habsburg Monarchy
An Anthropometric History

John Komlos

"Komlos offers a view of European population and output growth in which the British industrial revolution is an integral episode in a much broader process, not something *sui generis* and not an unexpected discontinuity. He makes use of a mass of hitherto untapped data to extend our knowledge of trends in standards of living back into the early eighteenth century."

The Path to Mechanized Shoe Production in the United States

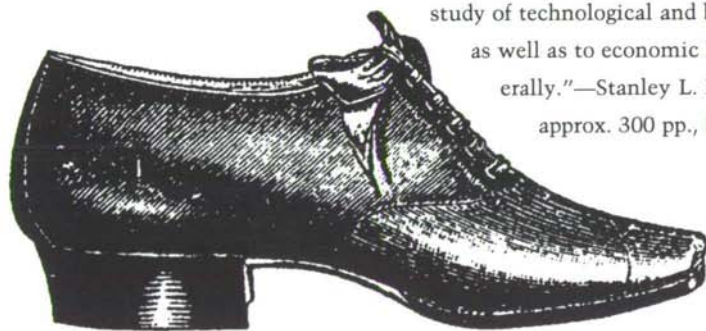

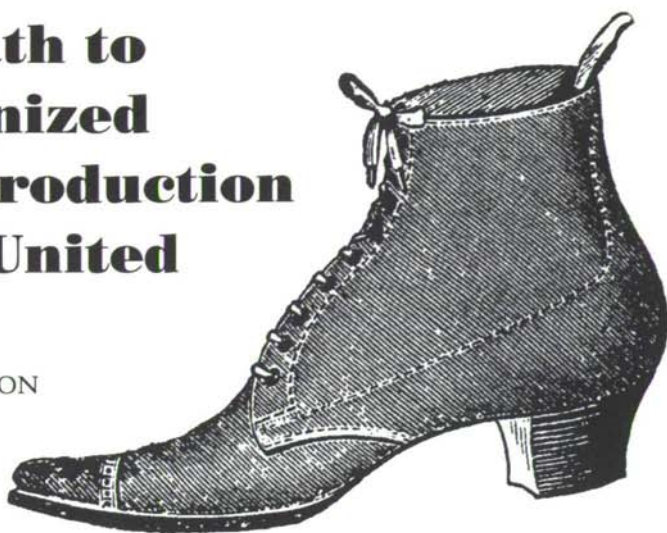

BY ROSS THOMSON

In 1800, shoes in the United States were made by

craftsmen, each trained to

create an entire shoe. A century later, shoes were mass-produced in factories employing dozens of machines and specialized workers. Ross Thomson describes this transition from craft to mechanized production in one of the largest American industries of the nineteenth century. "An interesting and important contribution to the

study of technological and business history, as well as to economic history more generally."—Stanley L. Engerman

Budget Reform Politics

The Design of the Appropriations Process in the House of Representatives, 1865-1921

Charles Stewart III

Focusing on the development of the appropriations process in the House, this book examines the dynamics of budget reform politics. The author first proposes a theory of budget reform politics and reviews the historical role of electoral imperatives, committee and party leadership, Congressional-presidential relations, and economic and societal developments. He then examines the budgetary decision-making process in over two dozen budget reform attempts, and demonstrates the similarity of the dynamics of this period to those of contemporary budget politics.

Political Economy of Institutions and Decisions

Hardcover \$39.50

Work and Wages

Natural Law, Politics and the Eighteenth-Century French Trades

Michael Sonenscher

The author lays the foundations for a fresh approach to comparative studies of the workshop economy in European industrial history. The book utilizes two previously unexploited archival sources—the papers of the eighteenth-century civil courts and the records kept by French corporate labor exchanges—to reveal division of labor, patterns of employment, forms of legal argument, and types of institution and belief that contradict many established images of artisan production.

Hardcover \$65.00

Strikes, Wars, and Revolutions in an International Perspective

Strike Waves in the Late Nineteenth and Early Twentieth Centuries

Leopold Haimson and Charles Tilly, Editors

The contributors to this volume are concerned with the patterns of continuity and change in industrial labor conflicts in major industrialized countries before, during, and in the immediate aftermath of the First World War.

Copublished with The Maison des Sciences de l'Homme

Hardcover \$42.50

Convict Workers

Reinterpreting Australia's Past

Stephen Nicholas, Editor

Based on exhaustive and detailed analysis of records of 20,000 male and female convicts, this book shows that the convicts sent to Australia were not professional criminals, but ordinary men and women who brought with them a range of useful work skills, essential to the forging of a new economy and society. By illuminating convicts' contribution to Australia's development, a fresh understanding of Australia's early history emerges.

Studies in Australian History

Hardcover \$44.50

Recovery from the Depression

Australia and the World Economy in the 1930s

R.G. Gregory and N.G. Butlin, Editor

In Australian economic history the Great Depression is a dominant theme. In this volume, an international group of economists and economic historians examine the ways in which Australia survived and recovered from economic depression. The Australian experience is set in the wider context of the world economy, and comparisons are made with Britain, Canada, New Zealand, and Japan.

ECONOMICS AND PHILOSOPHY

Cambridge
Journals

EDITORS:

Daniel Hausman, *University of Wisconsin*

Michael McPherson, *Williams College*

Economics and Philosophy is designed to foster collaboration between economists and philosophers and to bridge the increasingly artificial disciplinary boundaries that divide them. Frequently, economists acknowledge that their work in both positive and normative economics depends on methodological and ethical commitments that demand philosophical study and justification. Philosophers increasingly insist that philosophy of science must be informed by and tested against studies of current science and of its history, while ethics and political philosophy must depend on what we know about human aims and interests and about the principles, benefits, and drawbacks of different forms of social organization.

THE FALL OF THE BELL SYSTEM

A Study in Prices and Politics

Peter Temin with Louis Galambos

The Fall of the Bell System traces and analyzes the events that resulted in the breakup of AT&T, the largest corporate reorganization in history. This reorganization resulted from a mix of deliberate design and uncontrollable cumulative processes. This study reveals much about the internal decision making of a major business enterprise and explains much about how private and public interests combine to shape corporate and public policy in late twentieth-century America.

"Temin, with Galambos' assistance, has produced a masterful history of the American telecommunications industry."

—Daniel R. Gilbert, Jr., *The Academy of Management Review*

"[Temin's] analysis of the events and of the behavior of the various participants, especially the Bell culture's inability to cope with a changing environment, is thorough, unsparing, and objective. Among the most admirable features of the book is the clarity and precision with which Temin explains complex and changing aspects of technology, pricing, and politics that s
