

# Insect Science and its Application

The International Journal of Tropical Insect Science

## Aims and Scope

*Insect Science and its Application* deals comprehensively with all aspects of scientific research targeted on tropical insects (and related arthropods), and the application of new discoveries to such diverse fields as pest and vector management and the use of insects for human welfare.

A distinctive feature of the journal is its multi- and interdisciplinary nature, which transcends the traditional boundaries of entomology.

Its second feature is its concentration on the recording and reviewing of the progress of insect science in the tropical and subtropical regions of the world. Thus, without excluding any area of the wide field encompassed by insect science, the journal will accept manuscripts in environmental physiology, the regulation of development and reproduction, population modelling, chemical ecology, natural products chemistry, plant resistance, host/insect relations, behaviour of tropical pest species, epidemiology of tropical diseases, vector biology, pest and vector management research, entomo-meteorology, insects in relation to farming systems, forest entomology, insect pathology, social insects and arthropods, and the use of insects. It is the intention of the Editors to have manuscripts published rapidly, consistent with the needs of quality control.

In addition to articles of original research, the journal also publishes book reviews, announcements and reports of meetings and mini-reviews. Each regular issue of the journal usually contains a short review article on a critical or rapidly developing area of tropical insect science; normally the Editors will have invited an author to contribute such a mini-review.

## Information for Contributors

1. All papers for publication in *Insect Science and Its Application* should be submitted directly to the Editor-in-Chief, Professor Thomas R. Odhiambo, ICIPE Science Press, P.O. Box 72913, Nairobi, Kenya. Papers should be mailed in a strong, preferably linen, envelope, as they may otherwise arrive in a damaged condition.
2. Papers should be in English or French and be original contributions in the field of tropical insect science. Each paper should have a summary in the form of an abstract in both English and French.
3. Submission of a paper implies that it has **not** been published previously, that it is not under consideration for publication elsewhere, and that if accepted for *Insect Science and Its Application* the authors will transfer copyright to ICIPE Science Press as is customary. Articles and illustrations become the property of the journal. There is no page charge for papers accepted for publication.
4. Manuscripts and illustrations must be submitted in triplicate to ensure efficient refereeing, and the author should retain a copy. In the case of multiple authorship the authors should indicate who is to receive correspondence.
5. Manuscripts must be typewritten with double spacing (including the reference list), and with wide margins on one side of the paper only. Authors are requested to keep their communications as concise as possible. Footnotes should be avoided, and italics should not be used for emphasis. A running head of not more than 30 letters should be supplied.
6. Twenty-five free reprints will be supplied to the first-named author of each paper published in the journal. Detailed Instructions to Authors for the preparation of manuscripts are available from the Editor-in-Chief or the Publishing Office.

VOLUME 10 NUMBER 1

1989

## CONTENTS

THOMAS R. ODHIAMBO	1	Preface
B.U. SINGH and B.S. RANA	3	<i>Mini Review Article</i> Varietal resistance in sorghum to spotted stem borer, <i>Chilo partellus</i> (Swinhoe)
Z.H. MOHSEN and N.S. MEHDI	29	<i>Research Articles</i> Effects of insect growth inhibitor Alsystin on <i>Culex quinquefasciatus</i> Say (Culicidae: Diptera)
KAMELIA ALY ABDEL-SALAM	35	Gamma irradiation effects on mating competitiveness of <i>Tribolium castaneum</i> (Herbst)
T.R. AHMAD	43	Pheromone concentration and plant cover types on movement of <i>Anarsia lineatella</i> (Zeller) (Lepidoptera : Gelechiidae)
D. NAMMOUR, J. AUGER et J. HUIGNARD	49	Mise en evidence de l'effet insecticide de composes soufres (disulfures et trisulfures) sur <i>Bruchidius atrolineatus</i> (Pic) (Coleoptere, Bruchidae)
TITUS K. MUKIAMA and RICHARD W. MWANGI	55	Field studies of larval <i>Anopheles arabiensis</i> Patton of Mwea Irrigation Scheme, Kenya
TAHIRA Z. MAHMOOD and M.H. QAZI	63	Density and parasitization of grasshopper egg-pods in Pakistan
AIDA M. EL-HAKIM and KAMELIA A. ABDEL-SALAM	69	Radiosensitivity of different larval stage duration pupae of the Mediterranean fruit-fly, <i>Ceratitis capitata</i> Wied.
L. CHUKA MADUBUNYI	75	Survival and productivity of the tsetse, <i>Glossina morsitans morsitans</i> Westwood (Diptera: Glossinidae) maintained under different feeding regimens, through four successive reproductive cycles in Zambia
B.S. BHUMANAVAR, S.P. SINGH, and V. V. SULLADMATH	81	Field evaluation of citrus germplasm for resistance to the black aphid, <i>Toxoptera aurantii</i> (Boy.) under tropical humid south Indian conditions
J.R. COBBINAH and J. APPIAH-KWARTENG	89	Effects of some neem products on stored maize weevil, <i>Sitophilus zeamais</i> Motsch
ALLEN M. YOUNG, BARBARA J. ERICKSON and ERIC H. ERICKSON JR	93	Pollination biology of <i>Theobroma</i> and <i>Herrania</i> (Sterculiaceae)-III. Steam distilled floral oils of <i>Theobroma</i> species as attractants to flying insects in a Costa Rican cocoa plantation
R.T. GAHUKAR, Y. O. DOUMBIA, A. B. BAL et V. S. BHATNAGAR	99	Distribution géographique, plantes-hotes et fluctuation saisonniere des meloides au Mali et au Senegal
