

# Paleobiology

VOLUME 48 | ISSUE 3 | 2022

## Featured Article

Machine learning identifies ecological selectivity patterns across the end-Permian mass extinction  
*William J. Foster, Georgy Ayzel, Jannes Münchmeyer, Tabea Rettelbach, Niklas H. Kitzmann, Terry T. Isson, Maria Mutti and Martin Aberhan* 357

## Articles

The structure of the nonmarine fossil record: predictions from a coupled stratigraphic–paleoecological model of a coastal basin  
*Steven M. Holland* 372

The Phanerozoic aftermath of the Cambrian information revolution: sensory and cognitive complexity in marine faunas  
*Shannon Hsieh, Roy E. Plotnick and Andrew M. Bush* 397

Bivalve body-size distribution through the Late Triassic mass extinction event  
*L. Felipe Opazo and Richard J. Twitchett* 420

The sponge pump as a morphological character in the fossil record  
*Pablo Aragonés Suarez and Sally P. Leys* 446

Scale dependence of drilling predation in the Holocene of the northern Adriatic Sea across benthic habitats and nutrient regimes  
*Martin Zuschin, Rafał Nawrot, Markus Dengg, Ivo Gallmetzer, Alexandra Haselmair, Sandra Wurzer and Adam Tomašových* 462

A biased fossil record can preserve reliable phylogenetic signal  
*C. Henrik Woolley, Jeffrey R. Thompson, Yun-Hsin Wu, David J. Bottjer and Nathan D. Smith* 480

Understanding the appearance of heterospory and derived plant reproductive strategies in the Devonian  
*Andrew B. Leslie and Nikole K. Bonacorsi* 496

Paleodiet of Lamini camelids (Mammalia: Artiodactyla) from the Pleistocene of southern Brazil: insights from stable isotope analysis ( $\delta^{13}\text{C}$ ,  $\delta^{18}\text{O}$ )  
*Thayara S. Carrasco, Carolina S. Scherer, Ana Maria Ribeiro and Francisco S. Buchmann* 513

Volume 48, Issues 1-4  
eISSN: 1938-5331; ISSN: 0094-8373

### Editor-in-Chief

Mark Patzkowsky, The Pennsylvania State University, USA

### Editors

Kevin Boyce, Stanford University, USA  
James Crampton, GNS Science, New Zealand  
Nadia Fröbisch, Museum für Naturkunde, Germany  
Wolfgang Kiessling, Friedrich-Alexander University of Erlangen-Nürnberg, Germany

### Managing Editor

Jessica Kastigar, Cincinnati, OH, USA

### Associate Editors

Nicolás Campione, University of New England, Australia  
Laurel Collins, Florida International University, USA  
Matt Friedman, University of Michigan, USA  
Melanie Hopkins, American Museum of Natural History, USA  
John Huntley, University of Missouri, USA  
Lee Hsiang Liow, University of Oslo, Norway  
Cynthia Looy, University of California Berkeley, USA  
Erin Saupe, University of Oxford, UK  
Caroline Strömberg, University of Washington, USA  
Adam Tomasovych, Slovak Academy of Sciences, Slovak Republic

Information about editors and editorial board members correct as of 1st January 2022. For the latest information please see <https://www.cambridge.org/core/journals/paleobiology/information/editorial-board>

### The Patrons Fund

The Patrons Fund was established to broaden the basis of financial support for Paleobiology and thus to encourage paleontological publication.

To become a Patron, send a check payable to Paleobiology to:  
Paleobiology Patrons Fund  
The Paleontological Society  
P.O. Box 9044  
Boulder, CO 80301-9044.

The Paleontological Society gratefully acknowledges the following Patrons of Paleobiology:

DAVID BOTTJER  
RUSSELL ENGELMAN  
MICHAEL FOOTE  
JOHN HANDLEY  
SUE HIRSCHFELD  
JOHN HUNTLEY  
SUSAN KIDWELL

HARUYOSHI MAEDA  
GEORGE R. MCGHEE JR.  
ARNOLD MILLER  
WILLIAM MILLER III  
MARK PATZKOWSKY  
P. DAVID POLLY  
DAVID RODLAND

IN MEMORY OF TOM SCHOPF  
ANDREJ SPIRIDONOV  
JAMES SPRINKLE  
JACEK SULANOWSKI  
SHERMAN SUTER  
ROGER THOMAS

### Aims & Scope

Paleobiology publishes original contributions of any length (but normally 10-50 manuscript pages) dealing with any aspect of biological paleontology. Emphasis is placed on biological or paleobiological processes and patterns, including macroevolution, extinction, diversification, speciation, functional morphology, bio-geography, phylogeny, paleoecology, molecular paleontology, taphonomy, natural selection and patterns of variation, abundance, and distribution in space and time, among others. Taxonomic papers are welcome if they have significant and broad applications. Papers concerning research on recent organisms and systems are appropriate if they are of particular interest to paleontologists. Papers should typically interest readers from more than one specialty. Proposals for symposium volumes should be discussed in advance with the editors.

### The Paleontological Society

The Paleontological Society is an international nonprofit organization devoted exclusively to the advancement of the science of paleontology: invertebrate and vertebrate paleontology, micropaleontology, and paleobotany. The Society was founded in 1908 in Baltimore, Maryland, and was incorporated in April 1968 in the District of Columbia. The Society has several membership categories, including regular, student, and retired. Members, representing 40 countries, consist of professional paleontologists, academicians, science editors, earth-science teachers, museum specialists, and undergraduate and graduate students and post doctoral scholars, as well as avocational paleontologists.
