Nutrition Research Reviews

Volume 30, 2017 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at www.cambridge.org/nrr

Editor-in-Chief

J V Woodside, *Belfast, UK*

Deputy Editor

Jos Houdijk, *Scottish Agricultural College, UK*

Editorial Board

M Ashwell, *Baldock, UK*

E Bandera, *New Brunswick, USA*

J L Black, *Warrimoo, Australia*

D Dardevet, *Theix, France*

C Edwards, *Glasgow, UK*

C Haskell-Ramsey, *Newcastle, UK*

J M Hibbert, *Atlanta, GA, USA*

T Hill, *Newcastle-upon-Tyne, UK*

J K Lodge, *Newcastle-upon-Tyne, UK*

C Lewis, *Norwich, UK*

W Stonehouse, *Adelaide, Australia*

C M Weaver, *West Lafayette, IN, USA*

K M Younger, *Dublin, Ireland*

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Nutrition Research Reviews is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

Subscription information:
Volume 30 2017 (2 issues)
Internet/print package: £306/\$598 American only/€467 EU only
Internet only: £207/\$384 Americas only/€305 EU only

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Information for Authors: The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Professor Jayne Woodside
Centre for Public Health
Queen's University Belfast
Institute of Clinical Science B
Grosvenor Road
Belfast, BT12 6BJ
UK
Tel: 44(0)2890632585
Fax: 44(0)2890235900
Email: j.woodside@qub.ac.uk

Directions to Contributors: are available from the Editor-in-chief.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Traditional low-alcoholic and non-alcoholic fermented beverages consumed in European countries:
a neglected food group

*Aristea Baschali, Effie Tsakalidou, Adamantini Kyriacou, Nena Karavasiloglou
& Antonia-Leda Matalas*

Introduction	1
Diversity of traditional low-alcoholic and non-alcoholic fermented beverages	2
Traditional fermented low-alcoholic and non-alcoholic milk-based beverages	2
<i>Kefir</i>	2
<i>Ayran</i>	5
Buttermilk	5
Traditional fermented non-alcoholic or low-alcoholic cereal-based beverages	6
<i>Boza</i>	6
<i>Kvass</i>	6
Traditional fermented non-alcoholic or low-alcoholic fruit-based beverages	8
<i>Hardaliye</i>	8
<i>Gilaburu</i> juice	8
Traditional fermented non-alcoholic or low-alcoholic vegetable-based beverages	8
<i>Sauerkraut</i> juice	8
<i>Şalgam</i> juice	8
Traditional fermented non-alcoholic or low-alcoholic herb, spice and aromatic plant-based beverages	8
<i>Kombucha</i>	8
Ginger beer	10
Traditional fermented non-alcoholic or low-alcoholic sucrose-based beverages	12
<i>Sima</i>	12
Water <i>kefir</i>	12
Health benefits of traditional low-alcoholic and non-alcoholic fermented beverages	12
Traditional fermented low-alcoholic and non-alcoholic milk-based beverages	13
Traditional fermented non-alcoholic or low-alcoholic cereal-based beverages	14
Traditional fermented non-alcoholic or low-alcoholic fruit-based beverages	14
Traditional fermented non-alcoholic or low-alcoholic vegetable-based beverages	14
Traditional fermented non-alcoholic or low-alcoholic herb, spice and aromatic plant-based beverages	14
Traditional fermented non-alcoholic or low-alcoholic sucrose-based beverages	15
Potential health risks of traditional non-alcoholic or low-alcoholic fermented beverages	15
Commercialisation of indigenous non-alcoholic or low-alcoholic fermented beverages	15
Traditional non-alcoholic or low-alcoholic fermented beverages and their place in the market	15
Innovations and perspectives of traditional non-alcoholic or low-alcoholic fermented beverages	16
Discussion	17
Conclusion	19
Acknowledgements	19

The progression of coeliac disease: its neurological and psychiatric implications

Giovanna Campagna, Mirko Pesce, Raffaella Tatangelo, Alessia Rizzuto, Irene La Fratta & Alfredo Grilli

Introduction	25
Pathogenesis	26
Genetics	26
Environment	26
Immunopathogenesis	26

Contents

Neurological complications and cognitive impairment in coeliac disease	27
Psychiatric disorders and quality of life of celiac disease patients	29
Potential link between the intestine and the brain: the role of a gluten-free diet	31
Conclusions	32
Acknowledgements	32
References	32
Mechanisms responsible for the hypocholesterolaemic effect of regular consumption of probiotics	
<i>S. A. Reis, L. L. Conceição, D. D. Rosa, N. P. Siqueira & M. C. G. Peluzio</i>	
Introduction	36
Mechanisms responsible for the hypocholesterolaemic effect of regular consumption of probiotic bacteria	38
Deconjugation of bile salts	38
Decreased absorption of intestinal lipids	40
Co-precipitation of cholesterol with the deconjugated bile salts	40
Assimilation and incorporation of cholesterol into the cell membrane of the probiotics	41
Conversion of cholesterol to coprostanol	42
Inhibition of the expression of intestinal cholesterol transporter Niemann–Pick C1 like 1 in the enterocytes	43
Modulation of lipid metabolism	43
Inhibition of hepatic synthesis of cholesterol	43
Reduction of body fatness	44
Mechanisms responsible for the hypocholesterolaemic effect of regular consumption of probiotic yeasts	44
Conclusion	46
Acknowledgements	46
References	47
Nutrition, infection and stunting: the roles of deficiencies of individual nutrients and foods, and of inflammation, as determinants of reduced linear growth of children	
<i>D. Joe Millward</i>	
Introduction	50
A stunting syndrome	51
Physiology, cellular biology and endocrinology of linear bone-growth regulation	51
Endochondral ossification	52
Endocrine regulation	52
Paracrine signalling within the growth plate	53
Direct anabolic influences of amino acids and zinc	54
Inflammation and endochondral ossification	54
Nutrition and linear growth	55
Type 1 nutrients	55
Type 2 nutrients	55
Multiple nutrient deficiencies and growth	56
Linear growth regulation as observed in animal models	56
Protein and energy deficiency	56
Zinc deficiency	56
Iodine deficiency	57
Human studies of nutrition and linear growth	57
Energy intake	57
Protein and amino acid intake	58
Zinc intake	59
Iodine intake	59
Multiple micronutrient intakes	60
Animal-source foods and linear growth	60

Contents

Infection and poor linear growth in children	62
Environmental enteric dysfunction	63
Conclusions	64

Milk <i>kefir</i> : nutritional, microbiological and health benefits	
<i>Damiana D. Rosa, Manoela M. S. Dias, Łukasz M. Grześkowiak, Sandra A. Reis, Lisiane L. Conceição & Maria do Carmo G. Peluzio</i>	
Introduction	82
Characteristics of <i>kefir</i> grains	82
Production of <i>kefir</i>	83
Nutritional composition of <i>kefir</i>	83
Microbiological composition of <i>kefir</i>	84
<i>Kefir</i> consumption	86
Health effects of <i>kefir</i>	86
Effect of <i>kefir</i> on lactose intolerance	86
Antimicrobial properties of <i>kefir</i>	86
Hypocholesterolaemic effect of <i>kefir</i>	89
Control of plasma glucose by <i>kefir</i>	90
Anti-hypertensive effect of <i>kefir</i>	90
Anti-inflammatory properties of <i>kefir</i>	91
Antioxidative activity of <i>kefir</i>	91
Anticarcinogenic activity of <i>kefir</i>	91
Healing action of <i>kefir</i>	92
Conclusion	92
Acknowledgements	93
