CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

Session 1957–1958

President: F. P. BOWDEN

Vice-Presidents: E. C. BATE-SMITH, E. J. H. CORNER, F. J. W. ROUGHTON

Treasurer: M. V. WILKES

Secretaries: (Mathematical) H. P. F. SWINNERTON-DYER

(Physical) T. E. FABER

(Biological) S. SMITH

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York 22, U.S.A.

For the purchase of early parts of the *Transactions*, *Proceedings* and *Biological Reviews* application should be made to the Secretaries. All parts of the *Proceedings* and *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address, and to send their subscriptions to the Treasurer, CAMBRIDGE PHILOSOPHICAL SOCIETY, FREE SCHOOL LANE, CAMBRIDGE.

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Secretaries at the Society's office.

PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

edited by

H. P. F. SWINNERTON-DYER

in consultation with

P. C. CLEMMOW, H. G. EGGLESTON, T. E. FABER
D. R. HARTREE, E. R. LAPWOOD, F. SMITHIES
F. URSELL, E. C. ZEEMAN

1. Four parts of the *Proceedings* are issued each year.

2. Communications for the *Proceedings* should be sent to *The Librarian, Cambridge Philosophical Society, Free School Lane, Cambridge.* Papers by Fellows and Associates of the Society should be communicated directly by the author. Other papers must be communicated by a Fellow, who in doing so should give his opinion on the suitability of the paper for publication.

3. Papers occupying more than twenty pages of print can only very rarely be accepted.

4. It is recommended that each paper be prefaced by a short abstract. Copies of a *Guide for the Preparation of Synopses*, prepared by the Abstracting Services Consultative Committee and issued by the Royal Society, may be obtained from the Librarian.

5. Drawings for illustrations and diagrams should be on a large scale and on smooth white Bristol board in Indian ink.

6. References should be listed at the end of each paper. World List abbreviations for titles of journals should be used and first and last page numbers given where relevant.

7. **Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. A pamphlet on the preparation of papers may be obtained from the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.**

8. Authors may receive, on request, fifty offprints of a paper in the *Proceedings* without charge.

Introduction to Fourier Analysis & Generalised Functions

M. J. LIGHTHILL

A simple but mathematically vigorous account of Fourier analysis and generalised functions. The results needed for their applications are obtained without the restrictions of the classical theory. Suitable for advanced students. CAMBRIDGE MONOGRAPHS ON MECHANICS AND APPLIED MATHEMATICS. 17*s.* 6*d. net*

Convexity

H. G. EGGLESTON

An introduction to convexity, written primarily for those starting research or whose main interest lies in one of the applications of the theory. CAMBRIDGE MATHEMATICAL TRACTS. 21*s. net*

CAMBRIDGE UNIVERSITY PRESS
BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W. 1

"A major contribution to the subject"—*Journal of the Royal Statistical Society*

NUMERICAL ANALYSIS

With Emphasis on the Application of Numerical Techniques to Problems of Infinitesimal Calculus in Single Variable

by

Zdeněk Kopal

Professor of Astronomy, University of Manchester
580 pages—63s. net

"A stimulating and timely book... very readable... well worth consulting—and possessing."—*Nature*

"There can be no doubt that this book will be standard for its purpose for some years."—*Science Progress*

"No mathematician with a special interest in the subject is likely to regret buying the book. However much he knows about numerical analysis in general, he can be fairly certain of finding some topic on which Professor Kopal knows more."—*The Mathematical Gazette*

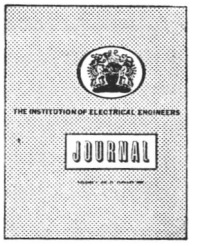
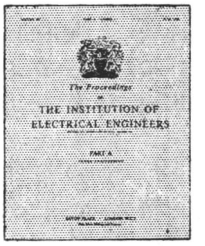
THE JOURNAL

MONTHLY. Subjects of general interest, as apart from the specialised papers and discussions appearing in Parts "A" and "B" of the Proceedings, are treated in the monthly JOURNAL which is distributed free to members of the Institution but is also on sale to non-members.



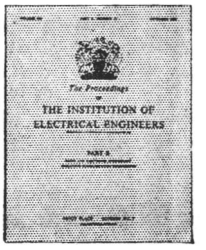
THE PROCEEDINGS

Part "A". Contains papers and discussions concerning the specialised spheres of power generation, transmission, meters and instruments...and applications of electricity. Published in February, April, June, August, October, and December.



THE PROCEEDINGS

Part "B". Contains papers and discussions concerning the progress and developments in the fields of telecommunication, radio, electronics and the many allied interests. Published in January, March, May, July, September, and November.



JOURNAL OF THE SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS

1957

VOLUME 5, NUMBER 3 (SEPTEMBER)

A Saddle Point Characterization of the Schwinger Stationary Points in Exterior Scattering Problems. C. L. DOLPH

Optimum Sequential Search and Approximation Methods Under Minimum Regularity Assumptions. J. KIEFER

On Smoothing a Finite Table: A Matrix Approach. T. N. E. GREVILLE

A Survey of Some Closed Methods for Inverting Matrices. A. S. HOUSEHOLDER

VOLUME 5, NUMBER 4 (DECEMBER)

Lower Bounds for Elastically Supported Membranes and Plates. L. E. PAYNE and H. F. WEINBERGER

Certain Aspects of the Inverse Scattering Problem. A. R. SIMS

Analysis of Discrete Linear Systems. WM. M. BROWN

The Combinatorial Significance of a Theorem of Polya. JOHN RIORDAN

Ordering Properties of Linear Successive Iteration Schemes Applied to Multi-Diagonal Type Linear Systems. J. HELLER

Note on Multivariate Interpolation for Unequally Spaced Arguments, With an Application to Double Summation. HERBERT E. SALZER

On the Use of Hermite Expansions in Noise Problems. L. LORNE CAMPBELL

A Method for the Computation of the Greatest Root of a Positive Matrix. ALFRED BRAUER

The Journal is published quarterly. Subscriptions are $8.00 per volume ($8.50 overseas). Single numbers $2.00 per copy from 1954, $3.00 per copy for 1953. Orders should be placed with the
