Engraving in England in the Sixteenth and Seventeenth Centuries

Part I. THE TUDOR PERIOD

by Arthur M. Hind

The first of four volumes, this one covers the period beginning 1540. The catalogue lists all the works of known engravers; anonymous prints are listed if their quality and importance demand it, or if they can be attributed with fair certainty to known engravers. Portraits and maps provide the chief subjects, though anatomy, history, satire, heraldry, genealogy, views and plans, bookplates, playing cards, and engravings for books are all listed and illustrated.
