The Classics of Linguistics comprises editions of works that have proved important in the history of linguistics for their intrinsic merit and significance. The texts are often reprinted in full, some being reproduced in facsimile, and each title in the series is accompanied by an introduction and commentary setting the text in its historical context and making evident its relevance to present-day linguistic thought. Although intended for readers with a sound first-year knowledge of linguistics, each volume is sufficiently comprehensive and detailed to serve the needs and arouse the interest of all specialists.
