

# NEW TITLES FROM **plenum** the language of science

## **THE PRACTITIONER'S GUIDE TO PSYCHOACTIVE DRUGS**

by **Ellen L. Bassuk, M.D.** and **Stephen C. Schoonover, M.D.**

Beth Israel Hospital and Harvard Medical School

This handy and authoritative spiral-bound publication is the best manual available on the use of psychotropic medications. Organized by symptom presentation, so that evaluation skills are all that is required from the reader, the text prepared in outline format to facilitate easy information retrieval for a complete clinical overview of psychiatric pharmacotherapy. A volume in *Topics in General Psychiatry*, **John C. Nemiah**, editor. 333pp., 1977, \$23.94/£12.57

## **SOCIOCULTURAL ROOTS OF MENTAL ILLNESS**

**An Epidemiologic Survey**

by **John J. Schwab, M.D.**

University of Louisville School of Medicine

and **Mary E. Schwab**

Massachusetts Mental Health Center and Harvard University

The new work reviews the important epidemiological investigations of the last two hundred years. The authors present an overview of social psychiatry, its development, scope, status, and the reasons for renewed interest in the field, along with a discussion of the fundamentals of psychiatric epidemiology. A volume in *Topics in General Psychiatry*, **John C. Nemiah**, editor. approx. 405pp., illus., 1978, \$33.00/£17.33

## **ALTERNATIVES TO MENTAL HOSPITAL TREATMENT**

edited by **Leonard I. Stein**

University of Wisconsin Medical School

and **Mary Ann Test**

Mendota Mental Health Institute, Wisconsin

This important new book examines several alternatives to mental hospital treatment designed to promote the community at the primary locus of care for the patient. The contributors explore the rationale behind these innovations, describe operating programs, and offer perspectives on planning and implementing community-based treatment models. approx. 320pp., 1978, \$33.00/£17.33

## **DEPRESSION**

**Biology, Psychodynamics, and Treatment**

edited by **Jonathan O. Cole, Alan F. Schatzberg** and **Shervert H. Frazier**

McLean Hospital, Belmont, Massachusetts

Comprehensive in its coverage, this volume provides clinicians with an overview of depressive disorders from a variety of viewpoints — biochemical, genetic, and psychodynamic. Special emphasis is given to their treatment — drug therapy, prophylaxis, brief psychotherapy, hospital management, cognitive therapy, and the interactions of drug therapy and psychotherapy. approx. 240 pp., illus., 1978, \$30.00/£15.75

## **AUTISM**

**A Reappraisal of Concepts and Treatment**

edited by **Michael Rutter**

University of London

and **Eric Schopler**

University of North Carolina

This volume presents an up-to-date analysis of current theory, research, and clinical practice. The authors provide a brief introduction to the diagnosis and definition of autism, and examine the social and familial characteristics of autistic children; psychological, genetic, and biological research findings; behavioral treatment approaches; education; and long-term follow-up studies. approx 455 pp., illus., 1978, \$29.40/£15.44

*Forthcoming*

## **THE WOMAN AS A PATIENT**

**Volume 1**

edited by **Carol Nadelson** and **Malkah Notman**

Harvard Medical School and Beth Israel Hospital

A volume in *Women in Context: Development and Stresses*

**PLENUM PUBLISHING CORPORATION**, 227 West 17th Street, New York, N.Y. 10011. In United Kingdom: Black Arrow House, 2 Chandos Road, London, NW10 6NR, England. Prices subject to change without notice. Prices slightly higher outside the U.S.

# THE DRUGS HANDBOOK

Paul Turner  
and Glyn Volans

To order a copy of this book, please send the correct amount plus 50p per volume carriage to Globe Book Services, Dept. P23 (D), 4 Little Essex Street, London WC2R 3LF.

To obtain information on a particular drug, it is usually necessary to consult a detailed reference work, or to have access to a number of more specialised books. Even then, precise information may be difficult to trace. The lack of a handy dictionary creates a potentially dangerous confusion which can benefit nobody, least of all the patient.

**The Drugs Handbook** fills this obvious gap in medical and paramedical reference. It is a dictionary of drugs, arranged alphabetically in order of their approved names, with a trade names index, and lists under the approved names a brief description of the actions, uses and adverse effects of each drug. All this vital information is at your fingertips in this remarkably compact volume. It is inexpensive, easy to use and fits neatly into a briefcase or a capacious pocket. It is what everybody who deals with patients and the medical use of drugs has been waiting for. Order your copy now.

'This project strikes me as a very useful one. In particular the idea of an alphabetical list of medical names is a first-class one . . .' – *a G.P.*

'This concise, accurate and up-to-date book is being published at a price nurses can afford' – *Mrs W. E. Hector, Queen Elizabeth College, London.*

# **Anafranil<sup>®</sup>** **Geigy**

**In addition to its use in depression, where it has proved to be effective both by the oral route and by intravenous infusion (in the more seriously depressed patient), Anafranil is becoming established as a leading drug treatment for obsessional and phobic disorders.**

**We will be pleased to forward further information relating to the use of Anafranil in the treatment of depression and phobic and obsessional disorders on request.**

Anafranil is 3-chloro-5-(3-dimethylaminopropyl)-10,11-dihydro 5H dibenz [b, f] azepine (clomipramine) hydrochloride

**Full prescribing information is available.**

Geigy Pharmaceuticals,  
Macclesfield, Cheshire SK10 2LY

## An important new edition **Companion to Psychiatric Studies**

Edited by **A. D. Forrest, J. W. Affleck and A. K. Zealley**

1978 Second edition 624 pages approx illustrated £22.50 approx

New edition has been extensively revised throughout.

Three new chapters cover Personality Development in Childhood, Dyadic Psychotherapy and Liaison Psychiatry and Psychiatric Aspects of Physical Illness.

Seven chapters have been completely rewritten by seven new contributors, while 23 original authors continue to participate.

Drug Abuse and Alcoholism are now in two separate chapters.

Now in a more convenient, larger page, single volume format.

The original editor, Professor Forrest, has now been joined by Drs Affleck and Zealley, as co-editors.

## NOTES FOR CONTRIBUTORS

**PAPERS** Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE58AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short summary of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary communications of up to about 1,500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

**REFERENCES** (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* 1, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

**ILLUSTRATIONS** Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 2¾ in.). *Diagrams* These will usually be reduced to 2¾ in. wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
