<b>Editorial</b>	
Assessment of diet and physical activity: new tools; old challenges <i>A Yngve, M Tseng, A Hodge, G McNeill and I Haapala</i>	377
<b>HOT TOPIC – Assessment and methodology</b>	
Rapid assessment tools for ranking pregnant minority women into multi-nutrient exposure groups <i>K Abu-Saad, I Shai, H Vardi, I Belmaker and D Fraser</i>	379
The reliability and validity of a short FFQ among Australian Aboriginal and Torres Strait Islander and non-Indigenous rural children <i>JD Gwynn, VM Flood, CA D'Este, JR Attia, N Turner, J Cochrane and JH Wiggers on behalf of the Many Rivers Diabetes Prevention Project study team</i>	388
CHD risk in relation to alcohol intake from categorical and open-ended dietary instruments <i>H Ward, RN Luben, NJ Wareham and K-T Khaw</i>	402
Validation of an FFQ and options for data processing using the doubly labelled water method in children <i>AE Dutman, A Stafleu, A Kruizinga, HAM Brants, KR Westterterp, C Kistemaker, WJA Meuling and RA Goldbohm</i>	410
Children's accuracy of portion size estimation using digital food images: effects of interface design and size of image on computer screen <i>T Baranowski, JC Baranowski, KB Watson, S Martin, A Beltran, N Islam, H Dadabhoj, S-h Adame, K Cullen, D Thompson, R Buday and A Subar</i>	418
Validation of a quantitative FFQ for the Barbados National Cancer Study <i>M Pakseresht, S Sharma, X Cao, R Harris, C Caberto, LR Wilkens, AJM Hennis, S-Y Wu, B Nemesure and MC Leske, Barbados National Cancer Study Group</i>	426
Reliability and convergent validity of the past-week Modifiable Activity Questionnaire <i>KP Gabriel, JJ McClain, KK Schmid, KL Storti and BE Ainsworth</i>	435
Examining the validity and reliability of the Chinese version of the International Physical Activity Questionnaire, long form (IPAQ-LC) <i>D Macfarlane, A Chan and E Cerin</i>	443
The inclusion of functional foods enriched in fibre, calcium, iodine, fat-soluble vitamins and <i>n</i> -3 fatty acids in a conventional diet improves the nutrient profile according to the Spanish reference intake <i>I Benasategi, M Cuervo, AR de las Heras, S Santiago, JA Martínez, I Astiasarán and D Ansorena</i>	451
Developing a database of vitamin and mineral supplements (ViMiS) for the Norfolk arm of the European Prospective Investigation into Cancer (EPIC-Norfolk) <i>MAH Lentjes, A Bhaniani, AA Mulligan, K-T Khaw and AA Welch</i>	459
Situational characteristics of young adults' eating occasions: a real-time data collection using Personal Digital Assistants <i>MN Laska, D Graham, SG Moe, L Lytle and J Fulkerson</i>	472
<b>Monitoring and surveillance</b>	
Blood concentration of methylmercury in relation to food consumption <i>R Airaksinen, AW Turunen, P Rantakokko, S Männistö, T Vartiainen and PK Verkasalo</i>	480
Toddler foods, children's foods: assessing sodium in packaged supermarket foods targeted at children <i>CD Elliott and MJ Conlon</i>	490
<b>Biological and behavioural determinants</b>	
To what extent have sweetened beverages contributed to the obesity epidemic? <i>G Woodward-Lopez, J Kao and L Ritchie</i>	499

Contents continued on backmatter

*Public Health Nutrition (PHN)* provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

## Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

**Submission:** PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at [phn@nutsoc.org.uk](mailto:phn@nutsoc.org.uk)

**Refereeing:** Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

**Copyright:** At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

**Preparation of manuscripts:** Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

## Disclosure of financial support and any competing

**interests.** The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

## Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

**Proofs:** Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

**Offprints:** The corresponding author will receive a copy of the issue and a PDF of the published paper free of charge. Offprints are available to purchase and can be ordered before publication.

*British Journal of Nutrition* is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.
