Laser and Particle Beams

Editor-in-Chief

Dieter H. H. Hoffmann, *Technical University Darmstadt, Germany*

Laser and Particle Beams is an international journal which deals with basic physics issues of intense laser and particle beams, and the interaction of these beams with matter. The journal is designed to aid scientists in the task of understanding and modeling basic phenomena in these fields. Subjects covered include the physics of high energy densities; non-LTE phenomena; hot dense matter and related atomic, plasma and hydrodynamic physics and astrophysics; intense sources of coherent radiation; high current particle accelerators; beam-wave interaction; and pulsed power technology.

Journal of Fluid Mechanics

Editor

M. G. Worster, University of Cambridge, UK

Journal of Fluid Mechanics is the leading international journal in the field and is essential reading for all those concerned with developments in fluid mechanics. It publishes authoritative articles covering theoretical, computational and experimental investigations of all aspects of the mechanics of fluids. Each issue contains papers on both the fundamental aspects of fluid mechanics, and their applications to other fields such as aeronautics, astrophysics, physiology, chemical and mechanical engineering, hydraulics, meteorology, oceanography, geology, acoustics and combustion.

International Journal of Astrobiology

Managing Editor

Simon Mitton, University of Cambridge, UK

International Journal of Astrobiology is the peer-reviewed forum for practitioners in this exciting interdisciplinary field. Coverage includes cosmic prebiotic chemistry, planetary evolution, the search for planetary systems and habitable zones, extremophile biology and experimental simulation of extraterrestrial environments, Mars as an abode of life, life detection in our solar system and beyond, the search for extraterrestrial intelligence, the history of the science of astrobiology, as well as societal and educational aspects of astrobiology. Occasionally an issue of the journal is devoted to the keynote plenary research papers from an international meeting. A notable feature of the journal is the global distribution of its authors.

Turbulence evolution in MHD plasmas <i>Martina Wisniewski, Ralf Kissmann and Felix Spanier</i>	597
Nonlinear wave propagation of large amplitude ion-acoustic solitary waves in negative ion plasmas with superthermal electrons <i>S. K. El-Labany, R. Sabry, E. F. El-Shamy and D. M. Khedr</i>	613
An alternative neuronal method for non-analytic pseudo-potentials in a charge-varying dusty plasma with trapped dust grains <i>L. Ait Gougam, M. Tribeche, F. Mekideche and P. K. Shukla</i>	623
Dispersion relations of dust lattice waves in two-dimensional honeycomb configuration <i>B. Farokhi</i>	629
Electrostatic solitary waves and double layers in a non-extensive dusty plasma with arbitrarily charged dust <i>H. Alinejad and M. Tribeche</i>	635
Processes in afterglow responsible for initiation of electrical breakdown in xenon at low pressure <i>Momčilo M. Pejović, Ivana V. Spasić, Milić M. Pejović, Nikola T. Nešić and Dragan V. Brajović</i>	641
Analysis of the radial and poloidal turbulent transport in the edge tokamak plasma <i>S. Meshkani, M. Ghoranneviss, M. Lafouti and A. Salar Elahi</i>	647
THz generation by the beating of two high intense laser beams <i>Rabea Q. Nafil, Monika Singh, A. H. Al-Janabi and R. P. Sharma</i>	657
Ion-acoustic double layers in electron–positron–ion plasmas with finite ion temperature <i>S. K. Jain and M. K. Mishra</i>	661
Interaction of a biased cylinder with a flowing dusty plasma <i>J. K. Meyer, J. R. Heinrich, S.-H. Kim and R. L. Merlino</i>	677
An experimental study of photoresist material etching by an atmospheric-pressure plasma jet with Ar/air mixed gas <i>Lijun Wang, Wenjun Ning, Mingzheng Fu, Chen Wu and Shenli Jia</i>	683
Non-planar dust-acoustic solitary waves and double layers in a four-component dusty plasma with super thermal electrons <i>Prasanta Chatterjee, Deb Kumar Ghosh, Uday Narayan Ghosh and Biswajit Sahu</i>	691
Modeling of electric arcs: A study of the non-convective case with strong coupling <i>D. Wright, P. Delmont and M. Torrillon</i>	699
Multiscale structures in a two-temperature relativistic electron–positron–ion plasma <i>M. Iqbal and P. K. Shukla</i>	715
On the excitation of higher harmonic electrostatic dust cyclotron waves <i>M. Rosenberg</i>	721
Evaluation of the distribution functions of spatial derivatives of an ionic electric microfield in plasmas by using only the central interactions approach <i>S. Chihi and S. Guerricha</i>	727
Geometric algebra in plasma electrodynamics <i>D. P. Resendes</i>	735
Three-dimensional and nonlinear analysis of efficiency enhancement in the $E \times B$ drifting electron laser with a prebunched electron beam and a planar wiggler <i>B. Maraghechi, M. Jokar, F. Jafari Bahman and A. Naeimabadi</i>	739
Set of wires to simulate tokamaks with poloidal divertor <i>T. Kroetz, Caroline G. L. Martins, M. Roberto and I. L. Caldas</i>	751
Numerical simulation of pulsed plasma sheath dynamics around a micro-sized tip <i>H. Ghomi, A. Mahmoodpoor, H. Goudarzi and A. R. Niknam</i>	759
Low MHD activity using resonant helical field and limiter biasing in IR-T1 tokamak <i>M. Lafouti, M. Ghoranneviss, S. Meshkani and A. Salar Elahi</i>	765
Modulational instability of an ultra-intense laser pulse in electron–positron plasmas <i>Qiang-Lin Hu, Gui-Lan Xiao and Xiao-Guang Yu</i>	771
Post-pinch generation of electron beam in a low energy Mather-type plasma focus device <i>R. A. Behbahani and F. M. Aghamir</i>	777
Non-thermal renormalization shielding on the electron–atom collision in partially ionized generalized Lorentzian non-thermal plasmas <i>Young-Dae Jung and Woo-Pyo Hong</i>	783

Effect of non-extensivity during the collision between inward and outward ion acoustic solitary waves in cylindrical and spherical geometry <i>Uday Narayan Ghosh and Prasanta Chatterjee</i>	789
Alfvén waves in shear flows: Driven wave formalism <i>Edisher Kh. Kaghashvili</i>	797
Gravitational instability on propagation of MHD waves in astrophysical plasma <i>Alemayehu Mengesha Cherkos and S. B. Tessema</i>	805
Nonlinear ion acoustic excitations in relativistic degenerate, astrophysical electron–positron–ion plasmas <i>Ata-Ur- Rahman, S. Ali, A. Mushtaq and A. Qamar</i>	817
Nonlinear magnetoacoustic waves in pair-ion plasma with dust impurity <i>Shi-Sen Ruan, Jiang-Hong Man, Shan Wu and Ze Cheng</i>	825
Nonlinear interaction of slow Alfvén wave with ion acoustic wave and applications to space plasma <i>B. K. Das, R. P. Sharma and N. Yadav</i>	833
Turbulent impurity transport modeling for Alcator C-Mod <i>X. R. Fu, W. Horton, I. O. Bespamyatnov, W. L. Rowan, S. Benkadda, C. L. Fiore, S. Futatani and K. T. Liao</i>	837
Electrostatic rogue waves in a plasma with a relativistic electron beam <i>F. Benchriet, S. A. El-Tantawy, W. M. Moslem and M. Djebli</i>	847
Kinetic description of a wiggler-pumped ion-channel free-electron laser by applying the Einstein coefficient technique <i>A. Hasanbeigi, S. Abasirostami and H. Mehdian</i>	853
Dust-acoustic solitary waves in a dusty plasma with dust of opposite polarity and vortex-like ion distribution <i>M. A. Zahran, E. K. El-Shewy and H. G. Abdelwahed</i>	859
The effect of helium impurity addition on current sheath speed in argon-operated plasma focus using a tridimensional magnetic probe <i>N. Panahi, M. A. Mohammadi, S. Hedyeh and R. S. Rawat</i>	867
Linear and nonlinear stability criteria for compressible MHD flows in a gravitational field <i>S. M. Moawad</i>	873
Continuous wavelet transform analysis for self-similarity properties of turbulence in magnetized DC glow discharge plasma <i>Bornali Sarma, Sourabh S. Chauhan, A. M. Wharton and A. N. Sekar Iyengar</i>	885
Linear and nonlinear obliquely propagating ion-acoustic waves in magnetized negative ion plasma with non-thermal electrons <i>M. K. Mishra and S. K. Jain</i>	893
Alfvén wave interactions within the Hall-MHD description <i>G. Brodin and L. Stenflo</i>	909
Effect of discharge voltage on bi-Maxwellian electrons in the diffusion plasma region of a double plasma device <i>M. K. Mishra, A. Phukan and M. Chakraborty</i>	913
Filamentation instability of a laser beam in an inhomogeneous plasma in an arbitrarily oriented external magnetic field <i>A. Hasanbeigi, A. Mousavi and H. Mehdian</i>	921
Nonlinear interaction of obliquely propagating Alfvén waves and kinetic Alfvén waves in solar wind plasmas <i>Nitin Yadav and R. P. Sharma</i>	927
Harmonic generation by the propagation of two-colour laser beams in an underdense plasma <i>Pallavi Jha, Nirmal Kumar Verma and Akanksha Saroch</i>	933
Theoretical investigations on the effect of different plasmas on growth and field emission properties of a spherical carbon nanotube (CNT) tip placed over cylindrical surfaces <i>Aarti Tewari and Suresh C. Sharma</i>	939
Drift instability in a positive ion–negative ion plasma <i>M. Rosenberg and R. L. Merlino</i>	949
Relativistic cross-focusing of extraordinary and ordinary modes in a magnetoactive plasma <i>Meenu Asthana Varshney, Shalini Shukla, Sonu Sen and Dinesh Varshney</i>	953
Anisotropic model for resonant heating of ions by Alfvén waves <i>T. X. Zhang</i>	963
Plasmons carrying orbital angular momentum in quantum plasmas <i>Shabbir A. Khan, S. Ali and J. T. Mendonca</i>	973

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2013 \$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.
