AMERICAN ECONOMIC HISTORY, 2/E

Robert C. Puth, *University of New Hampshire*

Describing the development of the American economy from the 17th century to the present, this text chronicles the impressive growth of the economy and analyzes why it developed the way it did. *American Economic History, 2/E* explains how the superior allocation of human resources in the United States has been key to American economic success. Additional photos, maps, tables, and more extensive treatment of "Big Business" and trends in competition between the Civil War and 1920 make this revised edition more compelling than ever.

The Great Depression

Delayed Recovery and Economic Change in America, 1929-1939

Michael A. Bernstein

Presents a powerful new interpretation of the Depression era by examining the uneven fate of manufacturing industries during the 1930s. The author argues that the conjunction of a crisis in financial markets with a long-run transformation in the kinds of goods and services required was responsible for the length and duration of the slump.

The Corporate Reconstruction of American Capitalism, 1890-1916

The Market, the Law, and Politics

Martin I Sklar

Through an examination of the judicial, legislative and political aspects of the antitrust debates of 1890-1916, this study shows that the argument in the debates arose because of the question of the proper relations between government and the market and between state and society.

The African Poor

A History

John Iliffe

From the monasteries of thirteenth-century Ethiopia to the South African resettlement sites of the 1980s, this book provides a historical context for poverty in Africa. The author explores what it is like to be poor, how the poor seek to help themselves, how their families help, and how charitable and governmental institutions provide for them.
