

# CONTENTS.

	PAGE
<i>A note on Ramanujan's arithmetical function <math>\tau(n)</math>.</i> By Mr J. R. WILTON, Trinity College . . . . .	121
<i>A note on some integrals involving Bessel functions.</i> By Mr C. FOX, Sidney Sussex College . . . . .	130
<i>Double row of vortices with arbitrary stagger.</i> By L. ROSENHEAD, St John's College. (Communicated by Mr H. JEFFREYS.) (With One Text-figure) . . . . .	132
<i>Some further results concerning the integrals of moduli of regular functions along curves of certain types.</i> By Mr R. M. GABRIEL, Queens' College. (Communicated by Mr A. E. INGHAM) . . . . .	139
<i>On certain loci of three dimensions representable on ordinary space by means of cubic surfaces, and the Cremona transformations for ordinary space obtained by projection of such loci.</i> By J. G. SEMPLE, B.A., St John's College . . . . .	145
<i>A geometrical study of the alternating and symmetric groups.</i> By G. DE B. ROBINSON, St John's College. (Communicated by Mr F. P. WHITE) . . . . .	168
<i>Thermionic emission through double layers.</i> By W. GEORGESON, Trinity College. (Communicated by Mr R. H. FOWLER.) (With Seven Text-figures) . . . . .	175
<i>Energy relations in artificial disintegration.</i> By Sir E. RUTHERFORD and J. CHADWICK, Ph.D., Gonville and Caius College. (With Four Text-figures) . . . . .	186
<i>An analogy for beams of particles of a reciprocal optical theorem due to Helmholtz.</i> By Mr R. H. FOWLER, Trinity College. (With One Text-figure) . . . . .	193
<i>The distribution of range of the <math>\alpha</math> particles from radium C' and thorium C'.</i> By N. FEATHER, B.A., Coutts-Trotter Student, Trinity College, and R. R. NIMMO, Clare College, 1851 Exhibition Scholar, University of New Zealand. (With Two Text-figures) . . . . .	198
<i>The mobility distribution and rate of formation of negative ions in air.</i> By J. L. HAMSHERE, Trinity College. (Communicated by Professor Sir J. J. THOMSON.) (With Nine Text-figures) . . . . .	205
<i>Configuration of quadrivalent atoms.</i> By Professor T. M. LOWRY . . . . .	219
<i>Note on the number of high velocity <math>\beta</math>-rays.</i> By H. M. CAVE, Trinity College, Exhibition of 1851 Scholar, Queen's University, Kingston. (Communicated by Sir ERNEST RUTHERFORD.) (With Two Text-figures) . . . . .	222
<i>The distribution of charge and current in an atom consisting of many electrons obeying Dirac's equations.</i> By D. R. HARTREE, Ph.D., Christ's College . . . . .	225
<i>Second electron emission from solid metal surfaces.</i> By C. F. SHARMAN, Ph.D., King's College. (With Twelve Text-figures) . . . . .	237
