In error, the incorrect figure 3 was inadvertently published. The correct version can be found below and online at <http://www.ingentaconnect.com/content/cabi/bjn>

Fig. 3. Reversed-phase HPLC analysis, with diode array and MS-selected ion monitoring detection, of the flavan-3-ol metabolites (+)-catechin glucuronide (*M-1*), (-)-epicatechin glucuronide (*M-2*), methyl-(+)-catechin glucuronide (*M-3*), methyl-(-)-epicatechin glucuronide (*M-4*) in rat plasma collected 4 h after the ingestion of a grape seed extract. Extract analysed using a 60 min 5–40% gradient of acetonitrile in 1% aqueous formic acid with detection at 280 nm (A), *m/z* 465 (B) and *m/z* 479 (C). For MS² data, see Table 2.
