"Synergism.."

Synergism is the working relationship between two ingredients which results in performance superior to that achieved by each ingredient working separately.

Synergism is Sporicidin. Glutaraldehyde combined with an alkaline phenate system produces superior disinfecting properties.* Patented Sporicidin disinfects with substantially less glutaraldehyde than other products.

Synergism makes Sporicidin tuberculocidal in only ten minutes at room temperature, 68° F and above, when diluted 1:16. Other alkaline glutaraldehyde products cannot be diluted and/or require longer contact times with heating to 77° F.

Sporicidin fulfills the CDC definition of high level disinfection using the lowest concentration of glutaraldehyde... because of Synergism.

* *Journal of Clinical Microbiology*,
November 1985, p. 735 - 739

Sporicidin
