## THE INVOS™ CEREBRAL/SOMATIC OXIMETER: REVEALING BRIGHTER FUTURES

Someday I want to be a doctor, not a patient.

**His heart surgery seemed to go smoothly.  
But will kindergarten?**

Brain dysoxygenation. Shock. Renal failure. Congenital heart patients face numerous ischemic threats, but the INVOS™ System can help keep them safe. Oxygenation data from up to four specific sites helps you assess perfusion distribution and oxygen saturation in real time, allowing for early detection and rapid response. It also shows immediate patient responses to interventions so you can better judge their impact and efficacy. So let the INVOS System help these kids navigate through the OR and PICU...and perhaps even kindergarten too.<sup>1-3</sup>

Visit <http://www.somanetics.com/invos-system> for more information.
