

# CLAY MINERALS BULLETIN

Vol. 3 No. 15

OCTOBER, 1956

*Issued by the Clay Minerals Group  
of the Mineralogical Society*

*Page*

## CONTENTS

1. Editorial.
2. ROBERT H. S. ROBERTSON. Preparatory Techniques.
4. R. C. MACKENZIE. Methods for separation of soil clays, in use at the Macaulay Institute for Soil Research.
7. R. C. MACKENZIE and K. R. FARQUHARSON. A method for concentration of dilute clay suspensions without coagulation.
8. JOHN C. HATHAWAY. Procedure for clay mineral analyses used in the sedimentary petrology laboratory of the U.S. Geological Survey.
14. J. A. GARD. Specimen preparation for electron microscopy.
19. G. BROWN, G. C. DIBLEY and R. FARROW. An extrusion method for bonded powder specimens.
22. B. S. NEUMANN. The preparation of sealed powder specimens for X-Ray analysis.
26. W. O. WILLIAMSON. The use of peels in microscopical study of clay aggregates.
31. J. CARTWRIGHT. The preparation and assessment of size-graded mineral samples.
36. W. A. MITCHELL. A double focusing X-Ray powder camera.
40. J. CANO-RUIZ and D. M. C. MAC EWAN. The flat layer method applied to clays.
44. G. BROWN and R. FARROW. Introduction of glycerol into flake aggregates by vapour pressure.
46. G. BROWN and G. C. DIBLEY. Moderately low-angle measurements with a 9.0 cm powder camera.

*Price to non-members 6/-*
