Volumes 117-122

eISSN: 1096-0287; ISSN: 0033-5894

Editors

Derek B. Booth, University of Washington
Nicholas Lancaster, Desert Research Institute
Lewis A. Owen, North Carolina State University

Guest Editors

Yassine Ait Brahim, University Mohammed VI Polytechnic
Andrea Columbu, Pisa University

Associate Editors

Lesleigh Anderson, U.S. Geological Survey
Pat Bartlein, University of Oregon
Robert Booth, Lehigh University
Louisa Bradtmiller, Macalester College
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Jason Dortch, University of Kentucky
Mary Edwards, University of Southampton and University of Alaska
Tyler Faith, Natural History Museum of Utah and University of Utah
Jaime Urrutia Fucugauchi, National University of Mexico and Instituto de Investigacion y Estudios Avanzados Chicxulub
Radu Iovita, New York University
Kathleen R. Johnson, University of California, Irvine
Terri Lacourse, University of Victoria
Pete Langdon, University of Southampton
Thomas Lowell, University of Cincinnati
Curtis W. Marean, Arizona State University
Barbara Mauz, University of Liverpool and University of Salzburg
Jim O'Connor, U.S. Geological Survey
Wyatt Oswald, Emerson College
Yeong Bae Seong, Korea University
James (Jamie) Shulmeister, University of Canterbury, Christchurch
Ximena Villagran, Museu de Arqueologia e Etnologia, Universidade de São Paulo
Xiaoping Yang, Zhejiang University

Editorial Board

Zhisheng An, Institute of Earth Environment, Chinese Academy of Sciences
Gail Ashley, Rutgers University
Julie Brigham-Grette, University of Massachusetts
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Yehouda Enzel, Hebrew University of Jerusalem
David Fink, Australian Nuclear Science and Technology Organisation
Sheri Fritz, University of Nebraska – Lincoln
Alan R. Gillespie, University of Washington
Lisa Graumlich, University of Washington
Vance T. Holliday, University of Arizona
Richard G. Klein, Stanford University
Melanie Leng, British Geological Survey, University of Nottingham
Danial R. Muhs, U.S. Geological Survey
Colin V. Murray-Wallace, University of Wollongong
Jay Quade, Department of Geosciences, University of Arizona
Ashok Kumar Singhvi, Physical Research Laboratory, Ahmedabad, India
Maria Socorro Lozano-Garcia, Universidad Nacional Autónoma de México
Cathy L. Whitlock, Montana State University
Yurena Yanes, University of Cincinnati
Liping Zhou, Peking University

Information about editors and editorial board members correct as of 1st January 2024. For the latest information please see <https://www.cambridge.org/core/journals/quaternary-research/editors-and-advisory-board>

Aims & Scope

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its 50-year history in advancing the understanding of Earth and human history through interdisciplinary study of the last 2.6 million years.

Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, quaternary geology, volcanology and tephrochronology.

Quaternary Research Center

The QRC is a community of scholars collaborating and fostering interdisciplinary environmental research at the University of Washington through strategic investments in seed grants, expeditions, seminars, workshops, and the publication of *Quaternary Research*.

QUATERNARY RESEARCH

VOLUME 118, MARCH 2024

THEMATIC SET: SPELEOTHEM PALEOCLIMATE

- 1 Introduction to special issue: new developments in speleothem paleoclimate and paleoenvironmental science
Yassine Ait Brahim and Andrea Columbu
- 2 The incorporation of chlorine and cosmogenic ^{36}Cl into speleothem carbonate
Vanessa E. Johnston, Silvia Frisia, Andrea Borsato, Jon D. Woodhead and Frank McDermott
- 20 High-resolution reconstruction of infiltration in the Southern Cook Islands based on trace elements in speleothems
Mohammadali Faraji, Andrea Borsato, Silvia Frisia, Adam Hartland, John C. Hellstrom and Alan Greig
- 41 Climatic and cave settings influence on drip water fluorescent organic matter with implications for fluorescent laminations in stalagmites
Laura Sibylla Endres, Céline Jacquin, Saúl González-Lemos, Laura Rodríguez-Rodríguez, Jakub Sliwinski, Nikita Kaushal, Oliver Kost and Heather Marie Stoll
- 62 The distribution of fossil pollen and charcoal in stalagmites
Bianca Dickson, J.M. Kale Sniderman, Vera A. Korasidis and Jon Woodhead
- 75 Exploring a Mallorca cave flooding during the Little Ice Age using nondestructive techniques on a stalagmite: micro-CT and XRF core scanning
Mercè Cisneros, Isabel Cacho, Jaime Frigola, Ana Moreno, Heather Stoll, Joan J. Fornós, Javier Sigró and Mariano Barriendos
- 88 Characterization of phreatic overgrowths on speleothems precipitated in the northern Adriatic during a sea-level stillstand at ca. 2.8 ka
Nina Lončar, Sanja Faivre, Blaž Miklavič, Bogdan P. Onac, Victor J. Polyak and Yemane Asmerom
- 100 Temperature fluctuations and ventilation dynamics induced by atmospheric pressure variations in Lamalunga Cave (Apulia, Italy) and their influences on speleothem growth
Andrea Borsato, Marco Samadelli, Vincenzo Martimucci and Giorgio Manzi
- 116 Precisely constrained 134-ka strong monsoon event in the penultimate deglaciation by an annually laminated speleothem from the Asian monsoon domain
Jiahui Cui, Jingyao Zhao, Xiyu Dong, Carlos Pérez-Mejías, Jing Lu, Ye Tian, Jian Wang, Liangkang Pan, Haiwei Zhang and Hai Cheng
- 126 Tropical vegetation productivity and atmospheric methane over the last 40,000 years from model simulations and stalagmites in Sulawesi, Indonesia
Claire E. Krause, Alena K. Kimbrough, Michael K. Gagan, Peter O. Hopcroft, Gavin B. Dunbar, Wahyoe S. Hantoro, John C. Hellstrom, Hai Cheng, R. Lawrence Edwards, Henri Wong, Bambang W. Suwargadi, Paul J. Valdes and Hamdi Rifai
- 142 A new MIS 5 to MIS 2 speleothem record from Sandkraal Cave on the South African Cape south coast
Kerstin Braun, Miryam Bar-Matthews, Avner Ayalon, Alan Matthews, Tami Zilberman, Natalya Zolotova, Richard M. Cowling, Panagiotis Karkanias, Hayley C. Cawthra, Erich C. Fisher, R. Lawrence Edwards, Xianglei Li and Curtis W. Marean
- 162 New paleohydroclimate record of the MIS 5e/5d transition from Yelini Cave, central Anatolian region of Türkiye
Kaan Gürbüz, Halim Mutlu, Ezgi Ünal-İmer, İ. Tonguç Uysal and Jian-Xin Zhao
- 180 Climate variability in the northern Levant from the highly resolved Qadisha record (Lebanon) during the Holocene optimum
Carole Nehme, Sophie Verheyden, Tobias Kluge, Fadi H. Nader, R. Lawrence Edwards, Hai Cheng, Elisabeth Eiche and Philippe Claeys
- 195 A speleothem record of seasonality and moisture transport around the 8.2 ka event in Central Europe (Vacška Cave, Hungary)
Attila Demény, György Czuppon, Zoltán Kern, István Gábor Hatvani, Dániel Topál, Máté Karlik, Gergely Surányi, Mihály Molnár, Gabriella Ilona Kiss, Máté Szabó, Chuan-Chou Shen, Hsun-Ming Hu and Zoltán May
- 211 The SISAL webApp: exploring the speleothem climate and environmental archives of the world
István Gábor Hatvani, Zoltán Kern, Péter Tanos, Micah Wilhelm, Franziska A. Lechleitner and Nikita Kaushal

ADDENDUM

- 218 New paleohydroclimate record of the MIS 5e/5d transition from Yelini Cave, central Anatolian region of Türkiye – ADDENDUM
Kaan Gürbüz, Halim Mutlu, Ezgi Ünal-İmer, İ. Tonguç Uysal and Jian-Xin Zhao

Photo Caption: View southwards from tufa towers on the shore of Mono Lake in east-central California, USA. This hypersaline alkaline lake has a productive ecosystem based on the endemic brine shrimp (*Artemia monica*) and alkali flies (*Ephydra hians*). The name “Mono” derives from “Monachi,” a Yokut term for the tribes that lived on both sides of the Sierra Nevada, and the region has an archaeological record extending back into the Early Holocene. Recent freshwater diversions severely lowered lake levels starting in AD 1941. Litigation in 1994 allowed the water to steadily rise. Levels are still far short of early 20th century heights, however, partially because of many years of drought in the American West. Mono Lake Basin has a geomorphic, volcanic, glacial and lacustrine record extending beyond the early Quaternary. It has been the focus of much research over the years, including many prominent papers published in Quaternary Research on glaciation, lacustrine sedimentology, geochemistry, palynology, archeology, and climate change that exemplify the interdisciplinary emphasis of the journal (see Bursik and Gillespie, 1993, 39, 24–35; Benson et al., 1998, 49, 1–10; Davis, 1999, 52, 243–249; Madsen et al., 2002, 57, 382–390; Zimmerman et al., 2011, 76, 264–271; Bacon et al., 2018, 90, 276–302).
