# Mental Health Services in the Global Village

Edited by Louis Appleby & Ricardo Araya

Throughout the world, cultural and economic circumstances are a powerful influence on mental illness - its frequency, recognition and treatment. *Mental Health Services in the Global Village* is a review of the care of the mentally ill around the world, its ideals, inequalities, progress and mistakes. The contributors' opinions on how mental health services will develop as the end of the century approaches reflect the prospects for the World Health Organization's goal of "Health for All".
