

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

REVIEW ARTICLE

Do subthreshold psychotic experiences predict clinical outcomes in unselected non-help-seeking population-based samples? A systematic review and meta-analysis, enriched with new results

Kaymaz N, Drukker M, Lieb R, Wittchen H-U, Werbeloff N, Weiser M, Lataster T & van Os J 2239

ORIGINAL ARTICLES

First-episode psychosis at the West Bologna Community Mental Health Centre: results of an 8-year prospective study

Tarricone I, Mimmi S, Paparelli A, Rossi E, Mori E, Panigada S, Carchia G, Bandieri V, Michetti R, Minenna G, Boydell J, Morgan C & Berardi D 2255

Physical restraints versus seclusion room for management of people with acute aggression or agitation due to psychotic illness (TREC-SAVE): a randomized trial

Huf G, Coutinho ESF, Adams CE & TREC-SAVE Collaborative Group 2265

Cardiovascular morbidity, mortality, and pharmacotherapy in patients with schizophrenia

Lahti M, Tiihonen J, Wildgust H, Beary M, Hodgson R, Kajantie E, Osmond C, Rääkkönen K & Eriksson J 2275

The causal relationships between neurocognition, social cognition and functional outcome over time in schizophrenia: a latent difference score approach

Hoe M, Nakagami E, Green MF & Brekke JS 2287

The influence of prior expectations on facial expression discrimination in schizophrenia

Barbalat G, Rouault M, Bazargani N, Shergill S & Blakemore S-J 2301

Intrusions in trauma and psychosis: information processing and phenomenology

Marks EM, Steel C & Peters ER 2313

Brain activation during fear conditioning in humans depends on genetic variations related to functioning of the hypothalamic-pituitary-adrenal axis: first evidence from two independent subsamples

Ridder S, Treutlein J, Nees F, Lang S, Diener S, Wessa M, Kroll A, Pohlack S, Cacciaglia R, Gass P, Schütz G, Schumann G & Flor H 2325

Treatment effects on insular and anterior cingulate cortex activation during classic and emotional Stroop interference in child abuse-related complex post-traumatic stress disorder

Thomaes K, Dorrepaal E, Draijer N, de Ruiter MB, Elzinga BM, van Balkom AJ, Smit JH & Veltman DJ 2337

Depressive symptoms are associated with weight gain among women

Sutin AR & Zonderman AB 2351

Depressed fathers' speech to their 3-month-old infants: a study of cognitive and mentalizing features in paternal speech

Sethna V, Murray L & Ramchandani PG 2361

Childhood trajectories of anxiousness and disruptiveness explain the association between early-life adversity and attempted suicide

Wanner B, Vitaro F, Tremblay RE & Turecki G 2373

The development of a population-level clinical screening tool for self-harm repetition and suicide: the ReACT Self-Harm Rule

Steed S, Kapur N, Webb R, Applegate E, Stewart SLK, Hawton K, Bergen H, Waters K & Cooper J 2383

Predictors of suicide attempts in patients with borderline personality disorder over 16 years of prospective follow-up

Wedig MM, Silverman MH, Frankenburg FR, Bradford Reich D, Fitzmaurice G & Zanarini MC 2395

Prospective study of family adversity and maladaptive parenting in childhood and borderline personality disorder symptoms in a non-clinical population at 11 years

Winsper C, Zanarini M & Wolke D 2405

Environmental influences predominate in remission from alcohol use disorder in young adult twins

McCutcheon VV, Grant JD, Heath AC, Bucholz KK, Sartor CE, Nelson EC, Madden PAF & Martin NG 2421

Disordered gambling among higher frequency gamblers: who is at risk?

Hodgins DC, Schopflocher DP, Martin CR, el-Guebaly N, Casey DM, Currie SR, Smith GJ & Williams RJ 2433

The relationship between executive functions and fluid intelligence in Parkinson's disease

Roca M, Manes F, Chade A, Gleichgerrcht E, Gershanik O, Arévalo GG, Torralva T & Duncan J 2445

Measuring the effects of alexithymia on perception of emotional vocalizations in autistic spectrum disorder and typical development

Heaton P, Reichenbacher L, Sauter D, Allen R, Scott S & Hill E 2453
