

THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for “the promotion and extension of Mathematical Science, Pure and Applied”.

Members may subscribe to the *Proceedings* at a reduced rate. Further information about membership can be obtained from the Secretary.

The Society’s address is

The Edinburgh Mathematical Society
James Clerk Maxwell Building
The King’s Buildings
Edinburgh EH9 3JZ

Submission of papers

Papers to be considered for publication should be sent to the Secretary or to an Editor. Manuscripts (2 copies) should be typewritten on A4 paper with double spacing and generous margins. The style and arrangement should conform to current practice in the *Proceedings*. Each manuscript should contain a short abstract of not more than 200 words and also a primary classification number from the American Mathematical Society’s 1990 Mathematics Subject Classification Scheme. References, including titles of papers, should be given in the form adopted by *Mathematical Reviews*, footnotes being avoided if possible. Figures should be separated from the text and lettered, ready for photographic reduction; their intended location should be clearly indicated. Manuscripts which are not suitable for submission to the printer will not be accepted. Authors are advised to retain a copy of any material submitted as the Society cannot accept responsibility for any loss.

A proof is supplied once. Authors are particularly requested to correct and return the proof promptly. Excessive corrections may be charged to authors. Fifty free offprints, and additional copies at cost, will be supplied if ordered on a form returned with the proof.

Addresses of editors

C. M. Campbell
Mathematical Institute
University of St Andrews
North Haugh
St Andrews KY16 9SS

S. D. Cohen
Department of Mathematics

Proceedings of the Edinburgh Mathematical Society

VOLUME 39 (SERIES II), PART 2

JUNE 1996

A mathematician among the molasses barrels: Maclaurin's unpublished memoir on volumes.	193
Introduction: Maclaurin's memoir and its place in eighteenth-century Scotland <i>Judith V. Grabiner</i>	
Multipliers for semigroups <i>G. Blower</i>	241
A characterization of noetherian rings by cyclic modules <i>Dinh Van Huynh</i>	253
On semi-artinian modules and injectivity conditions <i>J. Clark and P. F. Smith</i>	263
The solution via monotonicity methods of some nonscalar reaction-diffusion problems <i>Manuel Delgado</i>	271
Minimal permutation representations of the two double covers of S_n <i>John Brinkman</i>	285
Compact subsemigroups of $(\beta\mathbb{N}, +)$ containing the idempotents <i>Neil Hindman and Dona Strauss</i>	291
The maximal operator space of a normed space <i>Vern I. Paulsen</i>	309
Biorthogonality in the Banach spaces $\ell^p(n)$ <i>Anthony J. Felton and H. P. Rogosinski</i>	325
Normalizers of finite multiplicity nests <i>Kenneth R. Davidson</i>	337
On primeness and nilpotence in structural matrix near-rings <i>Enoch K. S. Lee</i>	345
Upper bounds for the separation of real zeros of polynomials <i>Peter Walker</i>	357
Direct finiteness of certain monoid algebras <i>W. D. Munn</i>	365
Direct finiteness of certain monoid algebras II <i>W. D. Munn</i>	371
Distance between Hermitian operators in Schatten classes <i>Rajendra Bhatia and Peter Šemrl</i>	377
Homogeneous structures on Kähler submanifolds of complex projective spaces <i>Sergio Console and Anna Fino</i>	381
Extrema of principal curvature and symmetry <i>J. W. Bruce and F. Tari</i>	397
Book Reviews	403
