**SYNOPSIS OF THE
MEDUSAE OF THE WORLD**

EDITOR'S NOTE

Dr P. L. Kramp's 'Synopsis of the Medusae of the World' is being published as a special volume of the Journal of the Marine Biological Association. As Volume 40 it will be additional to the normal annual volumes, of which the usual three parts will be published in 1961 to form Volume 41.

The Synopsis is appearing in this Journal by agreement with Dr Kramp, to ensure that it is available to as many marine biologists as possible.

Acknowledgements are due to the Council of the Royal Society for making a generous grant from the Scientific Publications Fund to cover the cost. It will be noted that the Council of the Royal Society also gave Dr Kramp a grant from the Browne Research Fund to enable him to employ an assistant. It is thus fitting that the Synopsis should appear in this Journal, because the late E. T. Browne was not only a great benefactor to the Marine Biological Association but also a leading authority on medusae.
