VOLUME 22, PART 1 JANUARY 1981

Glasgow Mathematical Journal

CONTENTS

Jeffrey Cohen, On non-Hurwitz groups and non-congruence subgroups of the modular group 1

Louis H. Blake, Tempered processes and a Riesz decomposition for some martingales in the limit 9

N. J. Kalton, Curves with zero derivative in *F*-spaces 19

Frank Harary, Heiko Harborth and Ingrid Mengersen, Generalized Ramsey theory for graphs XII: Bipartite Ramsey sets 31

J. P. Sproston, Derivations on some (possibly non-separable) C*-algebras 43

Ki Hang Kim and Fred William Roush, The algebraic structure of the semigroup of binary relations on a finite set 57

G. de Barra, The boundary of the numerical range 69

T. A. Gillespie, Strongly closed bounded Boolean algebras of projections 73

Ridgley Lange, On generalization of decomposability 77

D. Bertrand, Kummer theory on the product of an elliptic curve by the multiplicative group 83

J. F. Humphreys, Projective modular representations of finite groups II 89

W. W. Stothers, Subgroups of infinite index in the modular group II 101

GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 200 pages.

The prepaid subscription for each Volume is £17·50 in U.K., $45.00 in U.S.A., post free. Single parts may be supplied at a cost of £8·75 in U.K., $22.50 in U.S.A., net.

Copies may be ordered direct from the publisher or from any bookseller.

Information for Contributors

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no.* (if any), *volume no., year, pagination.*

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of fifty; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:
