Abstracts of Papers Presented at the The Second Annual  
Soviet-American Conference on Emergency Medical Care  
May 2-10, 1990

The Official Journal of the  
National Association of EMS Physicians and the  
World Association for Emergency and Disaster Medicine  
in association with the  
Acute Care Foundation and the  
National Association of State EMS Directors

## The semi-automatic defibrillator with options

At Marquette, we understand that your needs can vary. We designed the Responder™ to allow you to select the features which you need, features not available in other semi-automatic defibrillators.

You may select:

**A chart recorder.** A thermal array recorder allows at-the-scene documentation and playback of stored data.

**A tape recorder.** Allows recording of voice and fully annotated ECG data, as well as the event summary, on a standard audio cassette.

**Manual passcards.** Allows the paramedic or other authorized personnel to access the Responder's manual functions.

Any of these options can be added to the Responder, which already has more standard features

than any other system.

Our standard features include:

**Continuous analysis.** The sophisticated arrhythmia detection system runs continuously without operator action, providing an extra measure of patient care.

**Patient event card.** A solid state, credit card-sized module that stores 40 minutes of ECG data with complete annotation, and a comprehensive event summary.

**ECG waveform display.** A low-current drain, flat, backlit display shows ECG waveform in addition to operator messages and alert information.

**Automatic energy level sequence.** Eliminates the possibility of protocol error.

Call us toll free at 1-800-558-5120, ext. 2740 for more information on the Responder.

# Improve Prehospital Care In Your Community!

*New!*

## NATIONAL ASSOCIATION OF EMS PHYSICIANS: EMS MEDICAL DIRECTORS' HANDBOOK

National Association of EMS Physicians; Edited by Alexander E. Kuehl, M.D., M.P.H., F.A.C.S.; with 25 contributors

"This is an important publication, and is long overdue...at the present time there is no other comparable book on this subject..." (Prepublication review)

Over the years, EMS systems have grown at an unprecedented rate. But many of them have developed without the perspective that EMS is the practice of medicine -- through intermediaries -- in the prehospital setting. This new book will help. In it, you'll find clear objectives for improving prehospital care. From system development and medical control to operational issues and facilities direction, it covers everything you need to supervise an EMS system.

- funding strategies
- labor relations
- direct medical control
- levels of certification of providers
- refusal of medical assistance
- aero-medical services

1989. 448 pages, illustrated. (Book Code: 05854) \$29.95 (U.S.); \$39.00 (Can.)

*1987-1988 Edition!*

## TOXICOLOGIC EMERGENCIES GUIDE

EmergiDose, Inc.

- use this handy "slide-rule" guide to find out what to do in cases of toxicologic emergencies
- available in two sizes -- 5 1/2" x 7" fits into a lab coat pocket, 8 1/2" x 11" can be attached to a crash cart
- dosage recommendations and indications for a wide range of antidotes, antagonists, chelating agents and antivenins
- guidelines for utilizing elimination therapy in the management of acute poisonings, overdoses and toxic exposures

1987-1988. 5 1/2" x 7" (Book Code: 06158) \$19.95 (U.S.); \$26.00 (Can.)

8 1/2" x 11" (Book Code: 06162) \$29.95(U.S.); \$39.00 (Can.)
