AIDS FOR THE DEAF

EVERY PATTERN OF
ELECTRIC PHONES, NON-ELECTRIC TRUMPETS,
AURICLES, AND CONVERSATION TUBES
IN STOCK

IMPORTANT NOTICE

to the Medical Profession and their Patients

We are the originators of a 10 DAYS' HOME TRIAL, without obligation to purchase, of any of our Acoustic Aids, and, in our opinion, this is the only satisfactory method of selling such instruments to the public.

**This has been our policy for
60 years**

We daily hear most distressing tales from deaf people who have been persuaded to purchase expensive aids without a proper home trial.

T. HAWKSLEY, LTD.

(ESTABLISHED 1869)

A FEW REMARKS ABOUT “MOUTH WASHES”

BY

A Famous University Professor

1. Alkaline Mouthwashes act caustically upon the mucous membrane of the mouth, and acids which affect the lime contained in teeth are injurious. “ODOL,” however, is a neutral absolutely non-caustic preparation, which, whilst sufficiently antiseptic to destroy dental bacteria in various forms of dilution, nevertheless does not attack the teeth nor injure them in any way.
2. Owing to the addition of volatile oils, “ODOL” has a refreshing and agreeable aroma and flavour, so that long and continued use does not render it distasteful.
3. The antiseptic properties of “ODOL” are so remarkable that they can compete with the best acid preparations—in fact they are superior to these caustic fluids by virtue of their neutral re-action.
4. “ODOL” alone, above all other preparations that I have tested, shows in complete combination :—
 - (a) *Perfect uninjuriousness to the mucous membrane and the teeth.*
 - (b) *Powerful antiseptic qualities with neutral reaction.*
 - (c) *Agreeable taste and scent with prolonged effectiveness of both.*

My experiments prove the following facts :—

1. The prolonged antiseptic effects of “ODOL” in the mouth are based substantially upon the physical properties which enable it to be used as an emulsion AND UPON ITS CAPACITY FOR BEING ABSORBED BY THE MUCOUS MEMBRANE.
2. The “ODOL” antiseptic, in consequence of its capacity of being applied as an emulsion, always enters into action very finely divided, it is true, but in concentrated form.
3. The innocuousness of “ODOL” antiseptic rests upon the fact that its physiological products, when it is broken up, are presented in a statue nascens, but their effects are presented in PERFECTLY NEUTRAL, INDIFFERENT COMBINATIONS.

*SAMPLES and LITERATURE will gladly be sent
to any member of the Profession on application to:*

CRANBUX LIMITED OF NORWICH

SOLE MANUFACTURERS AND DISTRIBUTORS OF BRITISH ODOL

Aldwych

CHEVALIER JACKSON'S INSTRUMENTS FOR ŒSOPHAGOSCOPY, LARYNGOSCOPY, AND BRONCHOSCOPY

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson's most recent models, and each is supplied with *a spare light carrier*, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners for the dirt have been taken away.

To ensure better visibility the tips of the forceps are *black*.

The Howarth-Jackson's Instruments are **less expensive than other American or English models**, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2.5 volt and more durable than the usual models.

Manufactured only by

DOWN BROS., L^{TD}.

The Choice of Medical Men

for their own deafness or to recommend to patients is the "Ardente" method because it is so entirely different, uncopyable, and carries a written lifelong guarantee and service of its originator—Mr R. H. Dent—not any mere selling agent or company.

It is the most complete method—the commonsense way and the only individual method. Made in a wide range of types—one is suited to the individual needs of the patient and only when tested and found suitable is the right type completed and supplied. Interest is taken and adjustments made in accordance with any changed condition of hearing of the user.

"Ardente" is also the Choice of

Prof. SIR AMBROSE FLEMING, Kt., M.A., B.Sc., F.R.S.
Col. SIR HENRY KNOLLYS, K.C.V.O.
The late Gen. BRAMWELL BOOTH, C.H., and
Major F. E. VERNEY, M.C.

and many leading medical men—professional etiquette makes it necessary for us to withhold their names. "ARDENTE" is shown and appreciated at every B.M.A. meeting and every improvement is made in direct collaboration after test and consultation with eminent medical men and scientists. No distinguished name used is that of a staff-member—all are of deaf people themselves lending their names and experience for the benefit of fellow-sufferers without personal gain or profit.

All are men of knowledge and world-wide experience, able to judge and have the BEST.

"Ardente" is the choice of every important medical journal and TRUTH and for use at Hospitals and supplied through charities, Government Departments (also used by government officials). Behind "ARDENTE" is a personality—his interest is yours, his success built by his users who chose "Ardente" on its merits—

"Ardente" can be tested Free at any of our SERVICE BUREAUX—the most complete in the whole deaf world—or at Doctors' surgeries or patients' homes any day any time—week-ends and evenings if preferred. Please send for particulars—we will be happy to arrange a free demonstration to you at your or any of our addresses if Deaf yourself or interested on behalf of patients.

Mr Dent is the inventor of "Ardente."
 Mr Dent is the pioneer of individual ear-fitting.
 Mr Dent is the originator of the "Free Home Test."

THE MISSES KINZIE'S SUMMER SCHOOL OF LIP READING FOR THE DEAFENED ADULT

12 PARK CRESCENT, PORTLAND PLACE, LONDON, W.1

The MISSES KINZIE, of Philadelphia, Pa., U.S.A., authors of the latest and most scientific Method of Instruction in Speech Reading, by which art thousands are now surmounting the handicap of deafness, are conducting a Summer Session at the above address. The School is in session daily from 9.30 to 12.30 a.m., when the work may be observed by all who are interested.

LITERATURE SENT UPON REQUEST

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY
WALTER HOWARTH

ASSISTED BY
V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.
4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications should be addressed to "EDITOR, *Journal of Laryngology*, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."
7. The Annual Subscription is Forty Shillings, post free, and is payable in advance.
8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings each.
9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings each.

UNITED STATES OF AMERICA

Orders for this Journal, for single parts or yearly subscriptions, can be sent either through a local bookseller, or to Messrs G. E. STECHERT & Co., 31-33 East 10th Street, New York.

Mr WILSON

The Hospital has recently undergone very extensive reconstruction and extension, and now has 73 beds for In-patients and an annual Out-patient attendance of about 40,000.

CLINICAL INSTRUCTION

Clinical Instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is daily given in the Out-patient Department from 2 to 5 p.m. On Tuesdays and Fridays from 6.30 to 8 p.m. also. Major operations are performed daily, except Mondays, in the In-patient Operating Theatres. Minor operations are performed in the Out-patient Department by the Assistant Surgeons on four mornings a week.

Practitioners and Medical Students are admitted to the practice of the Hospital, and Clinical Assistants, whose duty it is to assist the staff, are appointed from time to time among them. For further information apply to the Dean, Mr BEDFORD RUSSELL.

‘Adrephine’

*An Aqueous Solution of Adrenalin and
Ephedrine Sulphate.*

BOTH Adrenalin and ephedrine exert a similar action when applied to the mucous membrane of the nose, throat or larynx. In ‘Adrephine’ the prompt, vigorous action of Adrenalin is supplemented by the slower but more sustained effect of ephedrine.

‘Adrephine’ may be used for shrinking the accessible mucous membranes of the respiratory tract prior to examination or operation. It will also be found of service in inflammatory conditions or congestion of the nasal mucous membrane and in the treatment of rhinitis. It is of proved value for the palliative treatment of hay fever.

Supplied in bottles of 1 oz. Further particulars will be sent on request.
