Special Meetings on Latin America

Regional Conferences concerning International Education Act

Regional conferences were sponsored by at least nine universities or associations to consider pro-

grams to be carried out when appropriations for implementation of the International Education Act, passed by Congress in 1966, become available (see LARR II:2, p. 199). The House Subcommittee on Appropriations put aside a request for \$350,000, failing to provide funds to set up a National Advisory Committee which would begin full-scale planning for implementation of the Act and endangering appropriation of the requested \$20 million for fiscal 1968. The Senate Committee on Supplemental Appropriations approved \$150,000 to be used in establishing 10 staff positions in the Department of Health, Education, and Welfare and to complete a basic organizational study, but hearings were yet to be conducted on the \$20 million appropriation. As of August 1, \$300,000 had been appropriated by the Senate for use in establishing the National Advisory Committee, for study in determining the status of international education in U.S. institutions, and the planning of a Center for Educational Cooperation in the Department of Health, Education, and Welfare. Conferences were conducted in Chicago, May 2, sponsored by the Committee on Institutional Cooperation, and May 3, sponsored by the Associated Colleges of the Midwest and the Great Lakes Colleges Association; in St. Louis, May 20, sponsored by Washington University; in Tucson, May 22, sponsored by the University of Arizona; in Boulder, June 12, sponsored by the University of Colorado; at Wentworth-by-the-Sea, June 16, sponsored by the New England Center for Continuing Education; in Palo Alto, July 7, sponsored by Stanford University; in Ithaca, August 7, sponsored by Cornell University; and in Los Angeles, fall 1967, sponsored by the University of California. This is the first set of extensive amendments since the founding of the OAS in 1948. President of the Conference was Argentine Foreign Minister Nicanor Costa Méndez. Representatives of all delegations comprised the two working committees which

produced the word-by-word reviews of the Charter amendments. Two documents were issued as a result of the deliberations at the meeting: *Protocol of Amendment to the Charter of the Organization of American States* (known as the *Protocol of Buenos Aires*) and the *Final Act*. INSTITUTIONAL NEWS

Agency for International Development Research Programs Reorganized

Plans for the reorganization of the Agency for International Development have been considered in earnest since February 1967. Of interest to universities were plans to implement a carefully designed program in agriculture and the related priority given to the grants program which enables universities to carry out AID-contracted research.

For administrative convenience and because of their close relationship with other activities in the Office of the War on Hunger, responsibility for the administration of the entire central research and institutional grants programs of the Agency were separated from the Office of Technical Cooperation and Research and assigned to Erven Long, under the general supervision of Herbert Waters, assistant administrator, Office of the War on Hunger. In addition to direct responsibility for these two programs, the Research and Institutional Grants Staff under Long's direction will serve as a central point of contact for all university activities related to agriculture and other programs of the Office of the War on Hunger. Beyond the scope of the latter group are responsibilities for developing AID policy regarding research, including standards and criteria for sponsorship, design, review, approval, monitoring, financing, and performance of the research.

Central responsibility for education programs as such has been transferred from Technical Cooperation and Research to the Office of Program Coordination. The special assistant for university relations resides in this office, and, in addition to education programs, is concerned with contract and publications policy and other matters involving the AID-University Advisory Committee.
