

CLAY MINERALS BULLETIN

Vol. 1 No. 7

JUNE, 1952

*Issued by the Clay Minerals Group
of the Mineralogical Society*

CONTENTS

Page

201. Editorial.
202. O. TALIBUDEEN. The technique of differential thermal analysis.
203. ROBERT C. MACKENZIE. A micro method for determination of cation-exchange capacity of clay.
205. H. DEUEL. Organic derivatives of clay minerals.
214. G. BROWN, R. GREENE-KELLY and K. NORRISH. Organic derivatives of montmorillonite.
221. R. GREENE-KELLY. Irreversible dehydration in montmorillonite.
228. M. J. BROWN and S. J. GREGG. A study of the effect of heat on kaolinite by adsorption methods.
235. GEORGES MILLOT. The principal sedimentary facies and their characteristic clays.
238. J. H. TAYLOR. Clay minerals and the evolution of sedimentary rocks.
243. Proceedings of the Clay Minerals Group.

Price to Non-Members 6/-
