Cloth Edition: ISBN 0-917586-34-4

ISSN: 0270-8647

Manufactured in the United States of America

CONTENTS

Preface		ix
Synopsis		xi
Part I. Presidential Address		
1. <i>Introduction to Presidential Address</i>	Thomas S. Kuhn, Massachusetts Institute of Technology	3
2. <i>From Vicious Circle to Infinite Regress, and Back Again</i>	Bas C. van Fraassen, Princeton University	6
Part II. Chaos Theory		
3. <i>A Philosophical Evaluation of the Chaos Theory "Revolution"</i>	Stephen H. Kellert, Indiana University	33
4. <i>Quantum Chaos and Semiclassical Mechanics</i>	Robert Batterman, Ohio State University	50
Part III. Altruism: Evolutionary and Psychological		
5. <i>Experimental Tests for the Existence of Altruism</i>	C. Daniel Batson, University of Kansas	69
Part IV. Cognitive Ethology		
6. <i>Communication and Cognition: Is Information the Connection?</i>	Colin Allen, Texas A&M University Marc Hauser, Harvard University	81
7. <i>Dogs that don't bark in the night: How to investigate the lack of a domain of expertise?</i>	Dorothy L. Cheney, University of Pennsylvania Robert M. Seyfarth, University of Pennsylvania	92
8. <i>On Aims and Methods of Cognitive Ethology</i>	Dale Jamieson, University of Colorado Marc Bekoff, University of Colorado	110
9. <i>Cognitive Ethology: Past, Present and Speculations on the Future</i>	Carolyn A. Ristau, Barnard College of Columbia University	125
Part V. Bayesian Philosophy of Science		
10. <i>The Scope of Bayesian Reasoning</i>	Henry Kyburg, Jr., University of Rochester	139

11.	<i>Acceptance in Bayesian Philosophy of Science</i> Patrick Maher, University of Illinois at Urbana-Champaign	153
12.	<i>Dutch Book Arguments and Consistency</i> Colin Howson, The London School of Economics and Political Science	161
Part VI. Cosmic Censorship		
13.	<i>Cosmic Censorship</i> John Earman, University of Pittsburgh	171
14.	<i>"Weak" Cosmic Censorship</i> Robert M. Wald, University of Chicago	181
Part VII. Mill, Whewell, and the Wave-Particle Debate		
15.	<i>Waves and Scientific Method</i> Peter Achinstein, Johns Hopkins University	193
16.	<i>Waves, Philosophers and Historians</i> Jed Z. Buchwald, Dibner Institute/MIT	205
17.	<i>Waves, Particles, Independent Tests and the Limits of Inductivism</i> Larry Laudan, University of Hawaii	212
Part VIII. Statistical Asymmetries and the Direction of Causation		
18.	<i>The Common Cause Principle</i> Frank Arntzenius, University of Southern California	227
19.	<i>Can We Reduce Causal Direction to Probabilities?</i> David Papineau, King's College London	238
20.	<i>The Direction of Causation: Ramsey's Ultimate Contingency</i> Huw Price, The University of Sydney	253
Part IX. Thought Experiments: The Theoretician's Laboratory		
21.	<i>Why Empiricism Won't Work</i> James Robert Brown, University of Toronto	271
22.	<i>What is Experimental about Thought Experiments?</i> David C. Gooding, University of Bath	280
23.	<i>In the Theoretician's Laboratory: Thought Experimenting as Mental Modeling</i> Nancy J. Nersessian, Princeton University	291

24.	<i>Do Thought Experiments have a Life of Their Own?</i> <i>Comments on James Brown, Nancy Nersessian and David Gooding</i> Ian Hacking, University of Toronto	302
Part X.	New Directions in the Philosophy of Science: Issues of Gender and Race	
25.	<i>After Eurocentrism? Challenges for the Philosophy of Science</i> Sandra Harding, University of California—Los Angeles	311
26.	<i>Towards a Female-friendly Philosophy of Science</i> Janet A. Kourany, University of Notre Dame	320
27.	<i>Taking Gender Seriously in Philosophy of Science</i> Helen E. Longino, Rice University	333
28.	<i>New Directions, Really?</i> Gonzalo Munévar, The Evergreen State College	341
Part XI.	The Dynamics of Rational Deliberation	
29.	<i>Dynamic Deliberation</i> William L. Harper, The University of Western Ontario	353
30.	<i>Probability Kinematics and Causality</i> Richard Jeffrey, Princeton University	365
31.	<i>Chaos and the Explanatory Significance of Equilibrium: Strange Attractors in Evolutionary Game Dynamics</i> Brian Skyrms, University of California—Irvine	374
Part XII.	Logical Inconsistency in Scientific Theories	
32.	<i>Old Quantum Theory: A Paraconsistent Approach</i> Bryson Brown, The University of Lethbridge	397
33.	<i>A Paradox in Newtonian Gravitation Theory</i> John D. Norton, University of Pittsburgh	412
34.	<i>Paraconsistent Logic: the View from the Right</i> Peter K. Schotch, Dalhousie University	421
Part XIII.	Is Foundational Work in Mathematics Relevant to the Philosophy of Science?	
35.	<i>How Foundational Work in Mathematics Can be Relevant to Philosophy of Science</i> John P. Burgess, Princeton University	433

36. *Why a Little Bit Goes a Long Way:
Logical Foundations of Scientifically Applicable Mathematics* 442
Solomon Feferman, Stanford University

37. *On the Scope and Force of Indispensability Arguments* 456
Geoffrey Hellman, University of Minnesota

Part XIV. What Has the History of Science to Say to the Philosophy of Science?

38. *Do the History of Science and the Philosophy of Science
Have Anything to Say to Each Other?* 467
Michael Ruse, University of Guelph

39. *Testing Philosophical Claims about Science* 468
David Hull, Northwestern University

40. *The 'New' History of Science: Implications for Philosophy
of Science* 476
Rachel Laudan, University of Hawaii

41. *Arguments in a Sartorial Mode, or The Asymmetries of
History and Philosophy of Science* 482
Robert J. Richards, The University of Chicago

42. *Is the History of Science Relevant to the Philosophy of Science?* 490
Marga Vicedo, Arizona State University West
