

QUARTERLY REVIEWS OF BIOPHYSICS

VOLUME 13 1980

Editors: A. Engström [*Sweden*], A. Ehrenberg [*Sweden*],
R. D. Keynes [*United Kingdom*],
G. Felsenfeld [*U.S.A.*]

Council of IUPAB

S. Ebashi (*Japan*) *President*
A. R. Gopal-Ayengar [*India*] *Vice-President*
R. D. Keynes [*United Kingdom*] *Vice-President*
B. Chance [*U.S.A.*] *Hon. Vice-President*
K. Wüthrich [*Switzerland*] *Secretary-General*

J. Coursaget (<i>France</i>)	S. Maričić (<i>Yugoslavia</i>)
H. Eisenberg [<i>Israel</i>]	L. D. Peachey (<i>U.S.A.</i>)
M. Errera (<i>Belgium</i>)	D. C. Phillips (<i>United Kingdom</i>)
S. Estrada-O (<i>Mexico</i>)	F. M. Richards (<i>U.S.A.</i>)
V. S. Gurfinkel (<i>U.S.S.R.</i>)	A. J. H. Vendrik (<i>Netherlands</i>)
P. G. Kostyuk (<i>U.S.S.R.</i>)	A. Wada (<i>Japan</i>)

Published for the International Union for
Pure and Applied Biophysics

Cambridge University Press 1980

**Published by the Press Syndicate of the University of Cambridge
The Pitt Building, Trumpington Street, Cambridge CB2 1RP
32 East 57th Street, New York, N. Y. 10022**

Printed in Great Britain at the University Press, Cambridge

Contents

No. 1. FEBRUARY 1980

- P. ANDERSEN and I. A. LANGMOEN. Intracellular studies on transmitter effects on neurones in isolated brain slices 1
- JOACHIM SEELIG and ANNA SEELIG. Lipid conformation in model membranes and biological membranes 19
- LENNART B.-A. JOHANSSON and GORAN LINDBLOM. Orientation and mobility of molecules in membranes studied by polarized light spectroscopy 63
- News from IUPAB 119

No. 2. MAY 1980

- J. N. ISRAELACHVILI, S. MARCELJA and R. G. HORN. Physical principles of membrane organization 121
- CHARLES DELISI. The biophysics of ligand-receptor interactions 201
- C. BLOMBERG, M. EHRENBURG and C. G. KURLAND. Free-energy dissipation constraints on the accuracy of enzymatic selections 231
- ANDREI D. MIRZABEKOV. Nucleosomes structure and its dynamic transitions 255

No. 3. AUGUST 1980

- G. SCHMAHL, D. RUDOLPH, B. NIEMANN and O. CHRIST. Zone-plate X-ray microscopy 297
- CARL-IVAR BRANDEN. Relation between structure and function of α/β -proteins 317
- O. B. PTITSYN and A. V. FINKELSTEIN. Similarities of protein topologies: evolutionary divergence, functional convergence or principles of folding? 339

No. 4. NOVEMBER 1980

- DON DEVAULT. Quantum mechanical tunnelling in biological systems 387

INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origin of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* **1**, 3–33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.

QUARTERLY REVIEWS OF BIOPHYSICS

Reviews on the following topics will appear in forthcoming issues:

Functional reassembly of membrane proteins in planar lipid bilayers
M. MONTAL, A. DARSZON and H. SCHINDLER

Hydrodynamic properties of complex, rigid, biological macromolecules: theory and applications

J. G. de la TORRE and VICTOR A. BLOOMFIELD
